

ITINERARY

HOLIDAY COSTA RICA: RANCHO NATURALISTA

I. December 19-27, 2017

II. December 29, 2017-January 6, 2018

Tawny-chested Flycatcher is a near-endemic to Costa Rica; its range is restricted to northern Costa Rica, and south-eastern Nicaragua. We'll likely find these attractive little birds around Rancho Naturalista. Photo by participant Ivan Sjogren.

We include here information for those interested in the 2017 Field Guides Holiday Costa Rica tour:

- a general introduction to the tour
- a description of the birding areas to be visited on the tour
- an abbreviated daily itinerary with some indication of the nature of each day's birding outings

Those who register for the tour will be sent this additional material:

- an annotated list of the birds recorded on a previous year's Field Guides trip to the area, with comments by guide(s) on notable species or sightings (may be downloaded from the website)
- a detailed information bulletin with important logistical information and answers to questions regarding accommodations, air arrangements, clothing, currency, customs and immigration, documents, health precautions, and personal items
- a reference list
- a Field Guides checklist for preparing for and keeping track of the birds we see on the tour
- after the conclusion of the tour, a list of birds seen on the tour

Rancho Naturalista has long been considered one of Costa Rica's best birding lodges. With its pleasant, spring-like climate, comfortable rooms, delicious food, and superb service, the lodge makes a wonderful base from which to explore the diverse habitats of the country's bird-rich Caribbean slope. Though this is a one-site tour, Rancho's location at 3000 feet in elevation on the Caribbean slope of the Talamanca Mountains makes it relatively easy to visit a good variety of habitats—from the Caribbean lowlands at EARTH to the cloud forests of Tapantí and the montane oak forest on Irazu Volcano—with the added bonus of being able to return to the same comfortable rooms each night. The result will be that

we'll enjoy a birdy, yet relatively relaxed, few days.

We hope to see the magnificent Resplendent Quetzal on our day-trip to Irazu Volcano. Photograph by guide Jay VanderGaast.

The lodge itself boasts an impressive bird list, with nearly 300 species having been recorded from its private reserve, more than 200 from the balcony alone! Some mornings will find us on the balcony at first light, coffee in hand, as we enjoy the spectacle of birds coming in for their daily banana feast. Among the visitors will be Blue-gray and Passerini's tanagers, delightful Black-cheeked Woodpeckers, and gaudy Collared Aracaris, as well as comical Montezuma Oropendolas. Hummingbird feeders at eye level on the balcony attract numerous hummingbirds and allow us close views of spectacular White-necked Jacobins and Green-breasted Mangos, while a flowering hedge which lines the garden may entice in some smaller species, such as the Violet-headed Hummingbird and the incredible Black-crested Coquette.

Days at the lodge will be spent on the private reserve, exploring a network of trails that wind through the forested hillside behind the lodge as well as the ranch's long driveway. One target will certainly be the tiny Snowcap, for which Rancho is rightly famous; the lodge remains the best area in the country to see these wonderful hummingbirds. The forest trails will also give us our best

opportunities for a number of shy, skulking understory birds, from Great Tinamous to a variety of antbirds and wrens, and our time here will be spent tracking down these often tough-to-see birds. Here, too, we hope to come across some mixed feeding flocks, which sometimes have as many as 10 to 15 species of birds—woodcreepers, flycatchers, and tanagers among them. And the late afternoon may find us at a quiet forest stream, watching as a parade of birds, including that delightful Snowcap, comes to the clear water to bathe. All in all our days at Rancho are sure to be filled with many rewarding birding experiences.

On the travel days to and from the lodge or on day trips from the lodge, we'll make visits to other top birding sites at different elevations and in different habitats. The Caribbean lowlands at EARTH hold a wide variety of lowland specialties that we won't see elsewhere. White-necked and Pied puffbird, Snowy Cotinga (rare), and Purple-throated Fruitcrow will be among our many targets here, and there will also be a chance that we'll run into a group of spectacular Great Green Macaws, which are rare but regular visitors to the forests here. At Tapantí National Park, we'll access a pristine area of beautiful cloud forest, home to Black Guan, Prong-billed Barbet, and Spangle-cheeked Tanager, as well as many other species. And at Irazu Volcano, we'll have the opportunity to become familiar with many of the species that are endemic to the highlands of Costa Rica and Panama. Here, Collared Redstart, Flame-throated and Black-cheeked warblers, Large-footed Finch, and Volcano Junco will be among our targets. Small numbers of incredible Resplendent Quetzals are also found here, and with a little luck, we may track down one of these marvelous birds.

Looking to do something different for the holidays this year? What better way to spend them than with a bevy of beautiful tropical birds from a base that offers all the comforts of home, plus more? Come join us in Costa Rica this holiday season, and start your New Year's birding off with a bang!

About the Physical Requirements & Pace: Costa Rica is often thought of as an excellent first taste of the pleasures of Neotropical birding, though folks are sometimes daunted by the sheer number of species that they may encounter. This one-site tour will serve as a good introduction to Costa Rica's incredible birdlife without overwhelming anyone who has never been to the tropics before. Though our potential bird list could be as high as 300 species, the fact that we are based at one site means that many of the species will be seen on several days, thus allowing us to become more familiar with many of them.

As this is a holiday tour, our pace is apt to be a bit more relaxed than on a tour aiming for maximum coverage of the country. Our days at Rancho will typically start with optional early mornings either on the balcony or on trails near the lodge. Those preferring to start a little later will be able to join the group at breakfast. Days here will be spent mainly on

the lodge's private trails, and there will generally be a couple of hours of free time for relaxing or individual birding in the middle of the day. Note that the trails at Rancho can be steep and narrow, and potentially muddy (and thus slick) in places, so be prepared with a walking stick if necessary. There are a number of steep steps down to the hummingbird pools, and the upper trails should only be attempted by those in good physical condition. On the days that we visit other habitats, things will be somewhat different, as we will aim for early morning departures in order to ensure that we hit the best birding areas at an optimal time of day. However, we will try to stagger these early departures so that they don't fall on consecutive days. Overall, the fact that we will be based at one lodge means there will be much flexibility, and those who choose to do so will be able to relax and take time off as they require.

If you are uncertain about whether this tour is a good match for your abilities, please don't hesitate to contact our office; if they cannot directly answer your queries, they will put you in touch with one of the guides.

About the Birding Areas

Rancho Naturalista is a private lodge nestled in the forested Caribbean foothills east of San Jose. Located at about 3200 feet in elevation, Rancho is perfectly sited to allow exploration into some of the richest birding habitats in Costa Rica. Bird activity in these humid middle elevations is characterized by movements of large feeding flocks, often comprising ten to fifteen or more species; these make for exciting (if somewhat frustrating!) birding. Around Rancho Naturalista and some nearby locations, we'll be watching for such species as Bicolored Hawk, Gray-headed Chachalaca, Brown-hooded Parrot, Crimson-fronted Parakeet, Dull-mantled and Zeledon's antbirds, White-collared, White-ruffed, and White-crowned manakins, Tawny-chested and Slaty-capped flycatchers, Scaly-breasted Wren, Black-and-yellow, Carmiol's (Olive), and Speckled tanagers, the striking Crimson-collared Tanager, Scarlet-rumped Cacique, Chestnut-headed Oropendola, and Black-headed Saltator. Hummingbirds on the grounds of the lodge itself, often only a few feet from the observer, include such dazzling gems as Green and Stripe-throated hermits, Green-breasted Mango, Crowned Woodnymph, Green Thorntail, Black-crested Coquette, White-necked Jacobin, Violet Sabrewing, Green-crowned Brilliant, Violet-headed and Rufous-tailed hummingbirds, and Snowcap!

Tapantí National Park is a beautiful cloud forest park tucked away in the northern reaches of the Cordillera de Talamanca. The accessible section of the park ranges from 3500 to 5000 feet in elevation and is home to a good assortment of wet middle elevation species. Black Guan, Black and Ornate hawk-eagles, Green-fronted Lancebill, Black-bellied Hummingbird, White-bellied Mountain-gem, Prong-billed Barbet, Spotted Barbtail, Buffy Tuftedcheek, Red-faced Spinetail, Scaled Antpitta, Barred Becard, Torrent Tyrannulet, Slaty-backed Nightingale-Thrush, Black-faced Solitaire, Golden-browed Chlorophonia, Elegant Euphonia, and Sooty-faced Finch are just some of the many species we could encounter here.

EARTH is an agricultural college in the Caribbean lowlands near the town of Guácimo, along the main highway between San Jose and the coastal city of Limón. The school's large campus has several good areas of habitat, from scrubby pastures to second-growth forest to a good-sized tract of primary lowland forest. With the exception of a few species that require large areas of undisturbed forest, all of the country's lowland species can be found here, and the bird list is very similar to the better-known La Selva Biological Station. Among the lowland specialties we'll search for here are Slaty-tailed Trogon, Cinnamon and Chestnut-colored woodpeckers, White-necked and Pied puffbirds, Snowy Cotinga, Purple-

throated Fruitcrow, Long-tailed Tyrant, Olive-backed Euphonia, and Crimson-collared Tanager. We might also be lucky enough to see some of the rare and spectacular Great Green Macaws that feed in the large *Dipteryx* trees on the campus.

Irazu Volcano National Park is one of Costa Rica's most-visited national parks. Situated just a short distance from the city of San Jose, the volcano looms over the city, and occasionally spews ash over the surrounding countryside, as it did in its most recent period of activity in the mid 1960's. Though still classified as active, the volcano is a little more benign these days, and thus safe to visit. In the high elevation forests of Irazu's slopes, we'll search for a number of species endemic to the Chiriqui highland regions of Costa Rica and Panama, as well as numerous more widespread species. Among the targets here will be Lesser Violetear, Volcano and Fiery-throated hummingbirds, Acorn Woodpecker, Ruddy Treerunner, Barred Becard, Black-capped Flycatcher, Timberline Wren, Black-billed Nightingale-Thrush, Sooty Thrush, both species of silky-flycatcher, Yellow-winged Vireo, Flame-throated and Black-cheeked warblers, Collared Redstart, Flame-colored Tanager, Large-footed Finch, and Volcano Junco. The stunning Resplendent Quetzal, a rare resident of the oak forests here, is also a possibility.

Itinerary for Holiday Costa Rica: Rancho Naturalista

The Research Station at CATIE is one of the best places to find the odd Boat-billed Heron. We'll make a trip for these, and other interesting water birds such as Northern Jacana and Purple Gallinule. Photograph by participant George Sims.

Day 1. Arrival in San Jose. There are many daily flights into San Jose from several US cities. (Give our office a call and we will be happy to help you with the schedule from your home city that best suits your needs.) Upon arrival in San Jose, look for a sign with your name or "Field Guides" on it, as our ground agents will provide a transfer for you to the hotel. We will gather in the hotel lobby at 7:00 p.m. for dinner and to discuss the following day's plans. Night near San Jose.

Day 2. Irazu National Park; to Rancho. After an early breakfast and short walk around the gardens of the hotel, we'll pack up the bus and head to the slopes of Irazu Volcano. As we approach the volcano's summit, we enter the habitat favored by many of the endemics of the Chiriqui Highland region of western Panama and Costa Rica. These birds, which include such species as Fiery-throated Hummingbird, the blue-throated form of Emerald Toucanet, Buffy Tuftedcheek, Black-faced Solitaire, Long-tailed and Black-and-yellow silky-flycatchers, and Flame-throated Warbler, will be among our main targets today. We will also put in some effort to find the beautiful Resplendent Quetzal here. At the end of the road at the top of the volcano, we'll

search for Volcano Hummingbird, Timberline Wren, Large-footed Finch, and Volcano Junco as well as have a look at the magnificent crater lake and cinder covered caldera. We'll have a restaurant lunch on the slopes of the volcano before heading to Rancho with a stop possibly (dependent on time) at the Birris Reservoir. We hope to arrive at Rancho around 5:00 p.m. Night at Rancho Naturalista.

Days 3-7. Rancho Naturalista. For the next five days we will be based at Rancho Naturalista and will spend our time birding the lodge's private reserve as well as several nearby areas. Mornings will typically start on the balcony watching the procession of birds coming to the backyard feeders: Collared Aracaris, Black-cheeked and Golden-olive woodpeckers, Passerini's and Blue-gray tanagers, Orange-billed Sparrows, and both species of oropendolas among many others. Our days will be spent exploring the lodge's trail system for some of the many species that make their home in the forests here. We of course will spend some time at the hummingbird feeders, putting in a special effort to see the bird the lodge is most famous for—the fabulous Snowcap—and we'll also have at least one afternoon to enjoy the wonderful hummingbird pools, where Snowcaps, Crowned Woodnymphs, Purple-crowned Fairies, and others come to bathe late each afternoon. On at least one evening we will also make an attempt to see the local Mottled Owls that we will almost certainly hear on most nights.

In addition to our time spent on the grounds of the lodge, we may also visit several nearby areas with slightly different habitats and mixes of bird species. The valleys of the Río Tuis and/or Platanillo may be visited in hopes of such species as Sunbittern, Fasciated Tiger-Heron, various kingfishers, Torrent Tyrannulet, Buff-rumped Warbler, and a variety of possible raptors. A visit to CATIE, a nearby agricultural research station, will give us the opportunity to see a colony of bizarre Boat-billed Herons in addition to a variety of other waterbirds including Northern Jacanas and Purple Gallinules. Visits to these sites will be scheduled at the discretion of your guides but are just some of the possibilities the area has to offer.

On one of these days we will have an entirely different plan, arising very early and making a roughly two-hour bus journey to the agricultural university campus of EARTH in the Caribbean lowlands. We will spend the full day here, exploring the varied habitats the campus has to offer. Marshy pasturelands are home to White-throated and Gray-breasted crakes, Olive-crowned Yellowthroat, and Thick-billed Seed-Finch. Scrubby overgrown fields may have Striped Cuckoo, Great Antshrike, Slaty Spinetail, and Yellow Tyrannulet. Further along, where tall trees begin to appear among the scrub, we may find Pied Puffbird, Snowy Cotinga, Gartered Trogon, Pale-billed Woodpecker, and Long-tailed Tyrant. And finally, in the primary forests, Slaty-breasted Tinamou, Rufous and Broad-billed motmots, Chestnut-colored Woodpecker, White-necked Puffbird, Black-crowned Antshrike, and Black-striped Woodcreeper are among the many possibilities we may see. With a lot of ground to cover, this is certain to be a full yet rewarding day of lowland birding; we will return to Rancho Naturalista in time for dinner. All nights at Rancho Naturalista.

Broad-billed Motmot. Photograph by participant Ivan Sjogren.

Day 8. Tapantí National Park; to San Jose. We'll make an early start today as we leave Rancho and head to the mid-elevation cloudforests of Tapantí National Park. We will spend the day here searching for the many specialties of this habitat, which may include Black Guan, Barred Hawk, Black-bellied Hummingbird, Red-headed and Prong-billed barbets, Slate-throated Redstart, Silver-throated and Spangle-cheeked tanagers, Sooty-faced Finch, and a variety of Furnariids and flycatchers. We'll have a picnic lunch at the park and continue birding in the early afternoon before making our way towards our hotel where we'll hope to arrive around 5:00 p.m. We will have our final evening dinner at the hotel. Night near San Jose.

Day 9. Departure for home. Time to bid farewell to new friends and this wonderful country as we head for home. Your guides will inform you of your transfer times at the final dinner. *Safe travels!*

About Your Guides

Tour I

Jay VanderGaast was introduced to birding by his father, and his obsession with birds was evident by age seven when he memorized the plates in Peterson's eastern field guide. He went on to earn a B.S. in biology at university and briefly contemplated a career in research, but two years on the mosquito-infested arctic tundra watching ptarmigan do little other than occasionally getting eaten by Gyrfalcons soon put an end to that plan! Instead, he strapped on a backpack and a pair of bins and began roaming the world in search of birds.

His travels eventually led him to Costa Rica, where he stumbled into a job as a birding guide at Rancho Naturalista Lodge. Amazed that he was actually getting paid to watch birds, he jealously guarded his position there for six years. His career with Field Guides coincided with the dawn of the new millennium (if you believe that began in 2000!), and since then he has guided more than 100 tours on several continents.

When he's not on tour, Jay's native habitat is his home near Montreal, where he lives with his partner, Annie, and their children—daughters Ariane and Elodie, and son Noah.

“Jay VanderGaast was a delight to travel with...incredible at finding the birds and extremely helpful in getting us on the birds—which was much appreciated! ...he made the trip an exceptional experience which I will remember for the rest of my life.” L.K., Costa Rica

Tour II

Jesse Fagan (a.k.a. the Motmot or just “Mot”) has been passionate about birds since his teens, when he had an encounter with a flying Pileated Woodpecker. He has birded throughout the United States, including spending seven years in Texas, and since 1995 has been birding and for a time living in northern Central America. He is a co-author of the recently published [Peterson Field Guide to Birds of Northern Central America](#) (Houghton Mifflin Harcourt, 2016), a field guide to the region which includes the countries of Guatemala, El Salvador, Honduras, and Belize.

In addition, Mot has birded in or led tours to Mexico, Costa Rica, Panama, Colombia, Ecuador, Venezuela, Peru, Brazil, Australia, New Zealand, Spain, Sweden, France, Morocco, and Madagascar. He also enjoys leading many of the Field Guides tours in the Caribbean. He likes to think he can bird anywhere at any time and still show you the birds, but most importantly, a good time. Jesse holds a B.S. and an M.S. in mathematics from Texas Tech University. He is currently living in Lima, Peru.

*“Jesse’s a great guide: extremely knowledgeable and helpful with the birds, and a whole lot of fun!” S.P.,
Holiday Costa Rica: Rancho
Naturalista*

Your guide will be accompanied by a local guide throughout the tour.

Financial Information

FEE: \$3375 per person from San Jose

DEPOSIT: \$340 per person

FINAL PAYMENT DUE: August 21, 2017 (Tour I); August 31, 2017 (Tour II)

SINGLE SUPPLEMENT (Optional): \$675

LIMIT: 12

Other Things You Need to Know

TOUR MANAGER: The manager for this tour is Sharon Mackie. Sharon will be happy to assist you in preparing for the tour. If you have any questions, please don't hesitate to call her!

ACCOMMODATIONS Accommodations on this tour are good. Rancho Naturalista has long been considered one of Costa Rica's best birding lodges. With its pleasant climate, comfortable, airy rooms, delicious food, and superb service, the lodge makes a wonderful base from which to explore the diverse habitats of the country's bird-rich Caribbean slope. Note that though all the rooms are different, each one has its own charm and advantages. In San Jose, we will be staying at a very nice, modern hotel. Please be aware that credit cards, checks and traveler's checks cannot be used for purchases (including drinks) at Rancho Naturalista.

DOCUMENTS: A current passport valid 30 days beyond the date of your arrival is necessary for US citizens to enter Costa Rica. Passports should be in good condition; Costa Rican immigration will deny entry if the passport is damaged in any way. Costa Rican authorities generally permit US citizens to stay up to ninety days without a visa; to stay beyond the period granted, travelers must submit an application for an extension to the Office of Temporary Permits in the Costa Rican Department of Immigration.

If you are not a US citizen, please check with the Costa Rican consulate nearest you for entry requirements. Information about consulates and entry requirements is generally available online or you can contact us and we will be happy to look this up for you. Passports should have an adequate number of blank pages for the entire journey. Some countries require a blank page for their stamp and as a precaution it is best to have one blank page per country you will visit or transit.

AIR ARRANGEMENTS: Field Guides is a full service travel agency and your tour manager will be happy to assist you with flights to join this tour. Field Guides does not charge a service fee for these services to clients booking a tour. However, we understand that tech-savvy clients often prefer to shop online or that you may wish to use mileage to

purchase tickets. Regardless of which method you choose, your tour manager will be happy to provide assistance regarding ticket prices and schedules, along with rental cars and extra hotel nights as needed.

Please be sure to check with your tour manager prior to purchasing your ticket to make sure the flights you have chosen will work well with the tour itinerary and that the tour is sufficiently subscribed to operate. Once purchased, most airline tickets are non-refundable and carry a penalty to change. Field Guides cannot be responsible for these fees. **Also, it is imperative that we receive a copy of your comprehensive flight itinerary—including any and all flights not covered in the tour fee—so that we may track you in the event of missed connections, delays, or other mishaps.**

LUGGAGE: Please be aware that many airlines have recently modified their luggage policies and are charging additional fees for checked bags. Updates could easily occur before your departure, so you may wish to contact your airline to verify the policy. Additional charges for bags on any flights, whether these are covered by the tour fee or not, will be the client's responsibility.

TOUR INCLUSIONS/EXCLUSIONS: The tour fee is \$3375 for one person in double occupancy from San Jose. It includes all lodging from Day 1 through Day 8, all meals from dinner on Day 1 through breakfast on Day 9, all ground transportation, entrance fees, and the guide services of the tour leader(s). Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

The above fee does not include your airfare to and from Costa Rica, airport taxes, visa fees, any checked or carry-on baggage charges imposed by the airlines, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

The **single supplement** for the tour is \$675. If you do not have a roommate but wish to share, we will try to pair you with a roommate from the tour; but if none is available, you will be billed for the single supplement. Our tour fees are based on double occupancy; one-half the cost of a double room is priced into the tour fee. The single supplement is calculated by taking the actual cost of a single room and subtracting one-half the cost of a double room (plus any applicable taxes).

TOUR REGISTRATION: To register for this tour, complete the Registration/Release and Indemnity form and return it with a **deposit of \$340** per person. If registering by phone, a deposit must be received within fourteen days, or the space will be released. **Full payment** of the tour fee is due 120 days prior to departure, or **by August 21, 2017 (Tour I) and August 31, 2017 (Tour II). We will bill you for the final payment at either 120 days or when the tour has reached sufficient subscription to operate, whichever date comes later.** Since the cost of your trip insurance and airline tickets is generally non-refundable, please do not finalize these purchases until you have received final billing for the tour or have been advised that the tour is sufficiently subscribed to operate by your tour manager.

SMOKING: Almost all of our clients prefer a smoke-free environment. If you smoke, please be sensitive to the group and refrain from smoking at meals, in vehicles, and in proximity to the group on trails and elsewhere.

CANCELLATION POLICY: Refund of deposit and payment, less \$100 handling fee, will be made if cancellation is received up to 120 days before departure. If cancellation occurs between 119 and 70 days before the departure date, 50% of the tour fee is refundable. Thereafter, all deposits and payments are not refundable.

This policy only applies to payments made to Field Guides for tour (and any services included in those fees). Airline tickets not included in the tour fee and purchased separately often carry penalties for cancellation or change, or are sometimes totally non-refundable. Additionally, if you take out trip insurance the cost of the insurance is not refundable so it is best to purchase the policy just prior to making full payment for the tour or at the time you purchase airline tickets, depending upon the airlines restrictions.

The right is reserved to cancel any tour prior to departure, in which case full refund will constitute full settlement to the passenger. The right is reserved to substitute in case of emergency another guide for the original one.

TRIP CANCELLATION & MEDICAL EMERGENCY INSURANCE: We strongly recommend you consider purchasing trip cancellation (including medical emergency) insurance to cover your investment in case of injury or illness to you or your family prior to or during a trip. Because we must remit early (and substantial) tour deposits to our suppliers, we cannot offer any refund when cancellation occurs within 70 days of departure, and only a partial refund from 70 to 119 days prior

to departure (see CANCELLATION POLICY). In addition, the Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. US medical insurance plans seldom cover health costs incurred outside the United States unless supplemental coverage is purchased. Furthermore, US Medicare and Medicaid programs do not provide payment for medical services outside the United States.

When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the United States may cost well in excess of \$50,000. Uninsured travelers who require medical care overseas often face extreme difficulties. When consulting with your insurer prior to your trip, please ascertain whether payment will be made to the overseas healthcare provider or whether you will be reimbursed later for expenses that you incur.

US citizens will receive from us a brochure regarding optional tour cancellation/emergency medical insurance. Our agent, CSA, will insure for trip cancellation and interruption, medical coverage, travel delay, baggage loss and delay, 24-hour accident protection, and emergency medical transportation. If you purchase the insurance when making final payment for the tour, and cover all non-refundable parts of the trip (including any non-refundable flights), pre-existing conditions are covered. The CSA brochure includes a contact number; you may also purchase your CSA policy on-line by visiting our website at www.fieldguides.com/travelinsurance.htm and clicking the link to CSA. Please note, once the insurance is purchased it is non-refundable, so please check with your tour manager prior to making the purchase to assure the tour will operate as scheduled. Citizens of other countries are urged to consult their insurance broker.

RESPONSIBILITY: For and in consideration of the opportunity to participate in the tour, each tour participant and each parent or legal guardian of a tour participant who is under 18 agrees to release, indemnify, and hold harmless Field Guides Incorporated, its agents, servants, employees, shareholders, officers, directors, attorneys, and contractors as more fully set forth in the Release and Indemnity Agreement on the reverse side of the registration form. Field Guides Incorporated acts only as an agent for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, airplane, or other means, and assumes no liability for injury, damage, loss, accident, delay, or irregularity caused by defect in such vehicles or for any reason whatsoever, including the acts, defaults, or bankruptcies of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. Field Guides Incorporated accepts no responsibility for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. The tour participant shall bear all such losses and expenses. Field Guides Incorporated reserves the right to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. Field Guides Incorporated reserves the right to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely.

Participants should be in good health and should consult a physician before undertaking a tour. If you have questions about the physical requirements of a tour, please contact our office for further information. Participants should prepare for the tour by reading the detailed itinerary, the information bulletin, and other pertinent matter provided by Field Guides. Each participant is responsible for bringing appropriate clothing and equipment as recommended in our bulletins.

THE RECEIPT OF YOUR TOUR DEPOSIT SHALL BE DEEMED TO BE CONSENT TO THE ABOVE CONDITIONS. EACH TOUR PARTICIPANT AND EACH PARENT OR LEGAL GUARDIAN OF A TOUR PARTICIPANT WHO IS UNDER 18 SHALL SIGN AND DELIVER THE RELEASE AND INDEMNITY AGREEMENT AT THE TIME OF REGISTRATION.
