

ITINERARY

ALASKA FALL GOLDMINE

Part I: Rarities on the Pribilofs, September 23 - October 1, 2026

Part II: Ross's Gulls in Barrow, October 2 - 6, 2026

*The lovely Ross's Gull migrates northeast past Barrow in numbers in early October to feeding grounds in the Beaufort Sea. We'll be in place to see this fascinating phenomenon, and we'll hope for favorable winds to bring these beauties close to shore.
Photograph by guide Cory Gregory*

We include here information for those interested in the 2026 Field Guides Alaska Fall Goldmine; Rarities on the Pribilofs and Ross's Gulls in Barrow Tour:

- a general introduction to the tour
- a description of the birding areas to be visited
- an abbreviated daily itinerary with some indication of the nature of each day's birding outings

These additional materials will be made available to those who register for the tour:

- an annotated list of the birds recorded on a previous year's Field Guides trip to the area, with comments by guide(s) on notable species or sightings (may be downloaded from our web site)
- a detailed information bulletin with important logistical information and answers to questions regarding accommodations, air arrangements, clothing, currency, customs and immigration, documents, health precautions, and personal items
- a Field Guides checklist for preparing and keeping track of the birds we see on the tour
- after the conclusion of the tour, a list of birds seen

We'll start with a treasure hunt for Asian migrants (and American ones too!) on St. Paul Island in the Bering Sea before spending several days above 71 degrees North latitude at Barrow, now officially Utqiagvik, the US's northernmost point, looking for the legendary Ross's Gull, Snowy Owls, loons, eiders, and possibly even Polar Bear and Ivory Gull.

Few birds in North America elicited more excitement when they were discovered than the diminutive, elegant Ross's Gull of the High Arctic. To see one in the Lower 48, you need to be lucky; you just can't predict when one will show up. This is often not so in Barrow in early October! Barrow is unique in many ways, and one of the more fascinating attributes of this remote site on the Arctic Ocean shore is its geographic position for witnessing the annual fall migration of Ross's Gulls. It's a migration phenomenon first witnessed here in the late 1800's and first documented in the 1970's and 1980's.

Every fall, beginning in late September, the majority of the world's Ross's Gulls migrate past this remote outpost from the Chukchi Sea in Arctic Russia to the Beaufort Sea in Arctic Alaska. Strong onshore winds often bring these Ross's Gulls within view of land, and local conditions sometimes force thousands of these beautiful, pink-plumaged birds close to shore, and some may linger to feed in the coastal habitats at this season. Small numbers of these gulls would be memorable enough, but the chance to bear witness to the spectacle of large numbers (we saw 1,200+ on one of our tours!) is one of the great opportunities of North American birding.

During this fall season, Barrow offers the chance for other prizes as well, including Spectacled, King, and Common eiders, Yellow-billed Loon, Snowy Owl, and perhaps even an Ivory Gull or a Polar Bear.

*The Brambling is a finch common in Eurasia, that occurs regularly in small numbers on St Paul Island in the Pribilofs.
Photograph by participant Andrew Kenny.*

We precede our proven Barrow trip with a journey to St. Paul Island to search for Asian migrants that stop at this lonely Bering Sea outpost, with peak sightings in late September and early October. Though the avian prizes vary from year to year, some of the exciting birds that have appeared regularly during this date range in recent years have included Tufted Duck, Common Snipe, Jack Snipe, Gray-tailed Tattler, Gyrfalcon, Brambling, Eurasian Skylark, Eyebrowed Thrush, Siberian Accentor, Olive-backed Pipit, Common Rosefinch, McKay's Bunting, Rustic Bunting, and Little Bunting. There has also been a who's who of even rarer "megs" that have shown up on the island at least once during this time span, including multiple first sightings of these species in North America, so you really never know what lies around the next corner there! Some of these rarer birds have included Hawfinch, Eurasian Bullfinch, Mottled Petrel, Marsh Sandpiper, Spotted Redshank, Gray Wagtail, Wood Warbler, Yellow-browed Warbler, Common Redstart, and Pallas's Rosefinch, to mention just a few. We'll check multiple migrant hotspots each day, and we'll walk through dense patches of island vegetation to look for skulking passerines and wetland birds. There is a very large pool of potential migrants we have a chance to encounter, though we will certainly not see all of them – that dynamic is part of the fun of this treasure hunt. The suite of species fluctuates substantially year-to-year and is strongly weather dependent, but we stand an excellent chance of finding some Old World and Arctic goodies during our visit to this special island. The seabird show of the summer months is not at full force during early October, but we should find Short-tailed Shearwaters, both Tufted and Horned Puffins, and Red-faced Cormorants. We stand a reasonable chance of finding Red-legged Kittiwakes and other Alaskan-breeding alcids during our travels around the island.

Bring your jacket, hat, boots, and adventurous spirit, and join us for this special Alaskan quest!

IMPORTANT NOTE: Travel to Saint Paul island is challenging. Flights can be delayed or canceled due to weather or limited airline service. **We strongly advise not planning any important events for at least a week after the tour and recommend bringing extra medication. Trip insurance is required to cover the cost of any additional nights.**

We want to be sure you are on the right tour! Below is a description of the physical requirements of the tour. If you are concerned about the difficulty, please contact us about this and be sure to fully explain your concerns. We want to make sure you have a wonderful time with us, so if you are uncomfortable with the requirements, just let us know and we can help you find a better fitting tour! Field Guides will not charge you a change or cancellation fee if you opt out within 10 days of depositing.

About the Physical Requirements & Pace:

- **TRAILS & WALKING:** On St. Paul Island, moderate amounts of walking (1-2 miles at a time) at slow pace, often on uneven terrain, as over rocks or through dense vegetation, but activity such as this will be interspersed with seawatching, shorter van-based bird checks, and lunch breaks. You have the opportunity to opt out of any walks or portions of walks on St. Paul, as we travel around the island by van.
- **POTENTIAL CHALLENGES:** We will likely stand for long periods to observe birds. On St. Paul, the vegetation is all low, but it is thick in many places, and there are some relatively short inclines that we will walk to get to a couple of the migrant traps. In Anchorage and Barrow, getting in and out of vans and walking for short stretches will be the most challenging aspects of the tour. Walking on snow, ice, and uneven ground requires a good sense of balance.
- **PACE:** No early mornings (sunrise isn't until after 9:00 a.m.), but we will utilize the available daylight hours for birding, weather permitting.
- **WEATHER:** Average temperatures in Alaska in October are cold, usually 30-45 F at St. Paul Island and in the 20's F at Barrow. Strong winds and humid air can make air temperatures feel much colder. The Information Bulletin for this tour has information on recommended cold-weather clothing and gear.
- **VEHICLE SEATING:** So that each participant has equal opportunity during our travel, we employ a seat rotation system on all tours. Participants will need to be flexible enough to maneuver to the back of the vehicle on occasion. Those who experience motion sickness will need to bring adequate medication for the duration of the tour, as we are not able to reserve forward seats for medical conditions.
- **BATHROOM BREAKS:** Bathroom stops at indoor restrooms will be made regularly; comfort stops in nature are also possible, should the need arise.
- **OPTING OUT:** Participants can easily opt to sit out a day or sometimes a half-day except on travel days.

If you are uncertain about whether this tour is a good match for your abilities, please don't hesitate to contact our office; if they cannot directly answer your queries, they will put you in touch with your guide(s) for the tour.

On St. Paul, we'll visit a number of habitats in search of rare migrants. Here, a Field Guides group hikes along the edge of Zapadne Ravine, where Bramblings and other birds were seen in 2024. Photograph by participant Kim Nelson.

About the Birding Areas

St. Paul Island – The Pribilof Islands are among the most isolated in the Bering Sea. While St. Paul Island is world renowned for the cornucopia of wildlife it hosts in spring and summer, fall is often overlooked. The isolation, that makes it so attractive to breeding seabirds, also positions it very well to host southbound migrants blown off course over the sea from either Asia or North America, as well as some trans-Beringian migrants whose routes pass right over the islands.

We will scour all the nooks and crannies of St. Paul in search of rare gems among the expected species. Most of the migrant traps that the birds favor are fairly close to the roads and consist of either rocky windbreaks or tall patches of thick vegetation that simulate forest, a habitat type completely lacking on the island. There are several productive freshwater marshes and lakes on the island that we will regularly check in pursuit of birds such as snipe and waterfowl. Because we would get our feet wet in regular shoes here, we recommend **insulated waterproof knee-high boots** such as Xtra-tuffs or Muck Boots (some people prefer NEOS overshoes over regular shoes or hiking boots). In addition to searching for landbird migrants, we will spend time seawatching from elevated coastal points. Your guide has extensive experience on the island and will help to shape the birding plan to maximize our results based on daily weather conditions.

Due to the remote nature of St. Paul Island and its temperamental weather (which is often good for bringing in rare birds!), flight delays or cancellations are a real possibility. In recent years, we have dealt with groups either not leaving for Saint Paul at all or getting stuck on the island for an extra week. Be prepared for either scenario and plan accordingly.

Anchorage area – Anchorage is the largest city in Alaska and the hub for all of our birding activities in the state. Around 300,000 people live in the Anchorage area, roughly 40% of the state's population! On our day here between birding St. Paul Island and Barrow, we'll search for boreal landbirds like northern finches (crossbills, Pine Grosbeak, redpolls), Bohemian Waxwing, Black-backed and American Three-toed Woodpeckers, Spruce Grouse, American Dipper, and other specialties. Finding the nomadic woodpeckers may involve driving in a van to the north, rounding the Knik Arm, and heading to a recently burned patch of forest near Willow where we've had good success in recent years. We may also search several of Anchorage's lakes and coastal hotspots in pursuit of waterfowl and gulls.

Barrow - The land near the far-northern town of Barrow (now officially known by its native name of "Utqiagvik"—oot-kay-ahg-vik) is a flat, watery expanse in the grip of permafrost. The landscape is fractured into a maze of giant, ice-wedge polygons, a pattern resulting from the continual freezing and thawing of the surface of the land. The "aufeis," overhanging shelves of ice formed by overflow waters of north-flowing rivers, look like rivers of ice from the air. And "pingos," or ice blisters—frozen hills formed by ice forced to expand upward in drained depressions—contribute further to the unique and fascinating aspect of Alaska's North Slope. Our flights from Anchorage take us across 570 miles of northern Alaska and leave us on the coast of the Arctic Ocean at 71 degrees 20 minutes North latitude, more than 300 miles above the Arctic Circle! Clearly, Point Barrow, the northernmost point in Alaska, is off the beaten track. This is not hard to understand, for Barrow is a place of extremes, where the summer sun does not sink below the horizon for 67 days straight (and it is not

dark for another 52 days!). On the other side of the coin, the sun does not shine on the town for 67 days straight in the winter; the weather is calm only 1% of the year; and annual precipitation is a meager 5 to 8 inches, the lowest in Alaska.

Many of you are familiar with the bounty of birds to be found here during the breeding season from taking springtime tours to this fine destination. Breeding shorebirds, loons, eiders, Snowy Owls, Snow Buntings, and others highlight a visit here in late June. By early October, when the daylight hours have been reduced from twenty-four to about ten, nearly all of Barrow's summer residents have long since headed south for the winter. Still, some species linger in the open waters offshore and the Ross's Gull migration, the object of our visit at this season, is well underway. With some luck, we could encounter a few small groups of Spectacled Eiders among the much more common King and Common eiders, good numbers of Yellow-billed Loons, or maybe even an Ivory Gull among the more common Glaucous Gulls. Most of our birding here will be from our comfortable vans or along the roadside. We may also include an afternoon foray to Pt. Barrow to search for Polar Bear if the conditions are right and if local reports indicate that it would be worth our while. Temperatures are likely to range from lows in the 20's or high teens to highs in the low to mid-30's.

*We'll spend time along the beaches of Utqiagvik looking for Ross's Gulls and other high Arctic birds.
Photograph by participant Bob Burgett.*

Itinerary for Alaska Fall Goldmine

Important Note: The tour dates may require adjustment if the flight schedule changes.

Part I: Rarities on the Pribilofs, September 23 - October 1, 2026

Day 1. Arrival in Anchorage. Please plan to arrive in time to meet your guide in the hotel lobby at 6:00pm for a welcome dinner and tour plan review. The hotel is near the airport and offers a courtesy shuttle. Night in Anchorage.

Day 2. To the Pribilofs. Breakfast at our Anchorage hotel. Depending on our flight time, we may have a chance for a walk around a lake adjacent to the hotel and look for waterbirds and songbirds (sunrise is after 8:00am on this date). Mid-morning, we'll transfer to the airport for our lunchtime flight out to St. Paul Island in the Bering Sea. Once on St. Paul, we'll check into our hotel rooms and then head straight out into the field after changing into our field clothes. **Important: wear your boots onto the plane and bring your optics and waterproof outerwear in your carry-on.** Sometimes the airline will delay checked baggage, and we want to make sure you make it to the island with what you need to enjoy the birding there. Night on St. Paul Island.

Days 3-6. St. Paul Island. We will spend our time searching migrant hotspots and scanning the coastline of St. Paul Island. In addition to local specialties like Red-faced Cormorant, a few lingering alcids, and perhaps Red-legged

Kittiwakes, we'll focus our attention on finding migrant birds, hopefully including some vagrants from Asia. Our success will depend on how much time we spend in the field, the weather, and of course, other random variables that only the birding gods can adjust. Whatever happens, this is sure to be an exciting time. Nights on St. Paul Island.

Day 7. St. Paul Island; evening flight to Anchorage. We will spend the whole morning birding on St. Paul Island before packing up for our afternoon flight back to Anchorage. Night in Anchorage.

Day 8. Anchorage. This is a flexible day in Anchorage to help mitigate against possible weather-related delays involving the flight back from St. Paul Island; however, it also gives us the opportunity to pursue some excellent mainland Alaskan species that we wouldn't otherwise find on this tour. After breakfast at our hotel, we'll head into the field. Depending on weather conditions and recent reports, we may go looking for Black-backed and American Three-toed Woodpeckers if they are still present around recent burns (potentially as far north as Willow), take an early morning look for Spruce Grouse, or head to the Anchorage coastline in pursuit of waterbird migrants. In addition to the above-mentioned species, we'll focus on searching for other specialties such as crossbills, American Dipper, and Canada Jay. We'll have a restaurant lunch midday and return back to our hotel before dinner. Night in Anchorage.

Day 9. Departure. You may schedule your departure flight at any time. For those continuing on to Part II, we can arrange an extra hotel night between parts (not included in the tour fee).

We'll have a day to spend birding near Anchorage, where we'll look for northern birds such as the American Three-toed Woodpecker. Photograph by guide Doug Gochfeld.

Part II: Ross's Gulls in Barrow, October 2 - 6, 2026

Day 10. Anchorage. For those arriving early or continuing from Part I, we will cover some local birding in the Anchorage area or a little beyond, taking the opportunity to explore areas not covered in Part I.

If you are arriving in Anchorage for Part II, please plan to meet the group in the hotel lobby at 6:30 p.m. for dinner, unless there's a note at the front desk from your guide stating otherwise. Night in Anchorage.

Day 11. Flight to Barrow. Off to the Far North! This afternoon we fly across the Arctic Circle to Barrow, where we'll have some time to bird after we pick up our rental vans and check into our hotel. Don't worry – there will be a chance to change into cold-weather gear before heading out to the coast to begin our search for Ross's Gulls and more! Night in Barrow.

Days 12-13. Birding the Barrow area. The air temperature will be cold, but we'll stay warm with excitement and regular breaks in the heated vans and indoors for meals. Prepare to search for Ross's Gulls, Yellow-billed Loons, multiple species of eiders, and Polar Bear. Depending on conditions and vehicle availability, on one day we might take an off-road 4x4 tour of Point Barrow. Nights in Barrow.

Day 14. Barrow to Anchorage; departure for home. We will have most of the day in Barrow before our late-afternoon flight back to Anchorage. Please plan your flight home after 9:30pm. Safe travels!

About Your Guides

Part I

Cory Gregory started learning birds on flashcards at the age of three, but it wasn't until the ripe age of ten that things started to get more serious. Since then he has traveled to Central and South America, Australia, and all 50 states to try to get his fill of birding (and it hasn't worked yet!).

Cory earned a B.S. in zoology in Michigan, where he also worked for Whitefish Point Bird Observatory for several seasons. He then ventured to Iowa State University, where he earned a M.S. studying Long-billed Curlews in Nebraska. As an avid shorebird ecologist, he has handled more than 2000 shorebirds of more than 30 species.

After finishing school, Cory worked for several organizations as a shorebird ecologist and guided on St. Paul Island in the Pribilofs of Alaska for the 2014 and 2015 seasons. It was on St. Paul that his dream of stumbling on a first North American record was finally fulfilled. Cory is currently based out of Missouri where, when not on tour, he pursues his interest in birds, butterflies, and dragonflies with abandon.

*"Cory was wonderful. He surely knows his birds, and his calm presence and dry sense of humor made the trip a lot of fun - and very productive as well. I would absolutely take another tour with him."
S.S. Arizona Nightbirds*

Part II

Sam Wilson grew up in New Jersey and had his spark moment as a young adult visiting Hawk Mountain Sanctuary. On his first visit he witnessed an epic migration of 10,000 Broad-winged Hawks as they took to the skies over the Appalachian ridges. He was hooked, and his fascination with bird migration has only grown.

Sam spent four years working in Cape May, New Jersey, for New Jersey Audubon developing bird migration programs for school groups and families and leading group trips for Cape May Bird Observatory and New Jersey Young Birders Club. He enjoyed a stint in the Hawaiian Islands doing breeding bird surveys in the remote Alakai Swamp for the Kauai Forest Birds Recovery project (though his gear didn't recover!).

Eventually, wanderlust led him to Alaska, where he led backcountry trips focused on birds and wildlife in Denali National Park, as well as guided trips for birding festivals along the Kenai Peninsula and Copper River. He has since led group trips as a naturalist-guide in most regions of the country with a special focus on National Parks and Wilderness areas. Sam is an eBird reviewer in Alaska and contributor to both *Cape May Magazine* and ABA's *Birding* magazine.

When not experimenting with flight photography, investigating nocturnal migration, or researching biodiversity hot spots, Sam enjoys backpacking, growing super-hot peppers, discovering new music, and creating experimental dishes (usually Asian cuisine). Sam and his wife, Margeaux, have spent months traveling around the world seeking out rare birds and wildlife. They currently reside in Anchorage, Alaska.

*"Sam is an expert guide and one of the best spotters we've ever experienced. He was great to get us on hard-to-see birds. He worked well with all the participants and was knowledgeable about the birds and plants."
A.D., Texas Coast Migration Spectacle*

Visit <https://fieldguides.com/our-staff/> for complete tour schedules for Cory and Sam; just click on their photos.

Financial Information

	Part I	Part II	Both parts
TOUR FEE per person from Anchorage:	\$7795	\$3325	\$11120
SINGLE SUPPLEMENT (Optional):	\$975*	\$575	\$1550
DEPOSIT:	\$775	\$325	\$1100
FINAL PAYMENT DUE:	March 27, 2026	April 5, 2026	
GROUP LIMIT:	7	7	

*Single rooms are limited and may not be available on Saint Paul Island.

Trip cancellation (including medical emergency) insurance is required for Part I to protect against flight delays.

Other Things You Need to Know

TOUR MANAGER: The manager for this tour is Maria Zaslavskaya. Maria will be happy to assist you in preparing for the tour. If you have any questions, please don't hesitate to call her!

AIR ARRANGEMENTS: The tour begins and ends in Anchorage, AK (ANC).

Arrival: Anchorage (ANC) on September 23 (Part I) or October 2 (Part II), by 5pm.

Departure: Anchorage (ANC) on October 1 (Part I) or October 6 (Part II), after 9:30pm.

Please wait to purchase airline tickets until we notify you that the tour is confirmed to operate. At that time, we'll be glad to assist with your flight arrangements at no service fee.

SMOKING: Almost all of our clients prefer a smoke-free environment. If you smoke, please be sensitive to the group and refrain from smoking at meals, in vehicles, and in proximity to the group on trails and elsewhere.

TOUR INCLUSIONS/EXCLUSIONS: The tour fee is **\$7795 (Part I), \$3325 (Part II), \$11120 (Both parts) per person in double occupancy from Anchorage.** It includes lodging for Days 1-8 (Part I) and Days 10-13 (Part II); meals from dinner on Day 1 through breakfast on Day 9 (Part I), and from dinner on Day 10 through lunch on Day 14 (Part II); flights within Alaska, ground transportation, entrance fees, baggage handling, and the guide services of the tour leader(s).

Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

The above fee does not include your airfare to and from Anchorage, airport taxes, any checked or carry-on baggage charges imposed by the airlines, any taxi hire to or from the airport, trip cancellation insurance (required for Part I), any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature. **If taking both parts, please note** that the lodging for Day 9 and meals from lunch on Day 9 to lunch on Day 10 are not included.

The single supplement is \$975 (Part I)*, \$575 (Part II), \$1550 (Both parts) for those requesting a single room.

***Single rooms are limited and may not be available on Saint Paul island.** If you do not have a roommate but wish to share, we will try to pair you with a roommate from the tour; but if none is available, you will be billed for the single supplement. Our tour fees are based on double occupancy; one-half the cost of a double room is priced into the tour fee. The single supplement is calculated by taking the actual cost of a single room and subtracting one-half of the cost of a double room (plus any applicable taxes).

TOUR REGISTRATION: To register for this tour, please contact us at fieldguides.com/contact-us/. Our office will be in touch with you by email by the next business day (Mon-Fri) with instructions on how to complete our new electronic registration form and medical questionnaire. (We are no longer accepting the paper version.)

Please send your deposit of \$775 (Part I), \$325 (Part II) or \$1100 (both parts) per person, see our Payment Options at <https://fieldguides.com/payment-options/>. **Full payment of the tour fee is due 180 days prior to departure, or March 27, 2026 (Part I) or April 5, 2026 (Part II).** We will bill you for the final payment at either 180 days or when the tour has reached sufficient subscription to operate, whichever date comes later. Since the cost of your trip insurance and airline tickets is generally non-refundable, please do not finalize these purchases until you have received final billing for the tour or have been advised that the tour is sufficiently subscribed to operate by your tour manager.

CANCELLATION POLICY: Refund of deposit and full payment, less \$100 handling fee, will be made if cancellation is received up to 180 days before departure. If cancellation occurs between 179 and 90 days before the departure date, 50% of the full tour fee is non-refundable, which would include the full deposit if the final payment has not yet been paid. Thereafter, all deposits and payments are not refundable and non-transferable.

Our cancellation policy only applies to payments made to Field Guides for tour (and any services included in those fees). Airline tickets not included in the tour fee and purchased separately often carry penalties for cancellation or change, or are sometimes totally non-refundable. Additionally, if you take out trip insurance the cost of that insurance is not refundable, so it is best to purchase the policy just prior to making full payment for the tour or at the time you purchase airline tickets, depending upon the airline's restrictions.

The right is reserved to cancel any tour prior to departure. In most such cases, full refund will constitute full settlement to the passenger. Note this exception, however: If you have been advised pre-tour that there is a non-refundable portion of your tour fee no matter the reason for Field Guides cancellation of the tour, that portion will not be refunded. The right is reserved to substitute in case of emergency another guide for the original one.

TRIP CANCELLATION & MEDICAL EMERGENCY INSURANCE: Required for Part I.

We strongly recommend purchasing trip cancellation (including medical emergency) insurance to protect your investment in case of injury or illness to you or an immediate family member before or during a trip. Because we must remit early and substantial deposits to our suppliers, we cannot offer refunds for cancellations outside of our Cancellation Policy. If a participant is unable to join or continue a tour due to illness, all related expenses will be their responsibility, and no refunds can be issued for missed days. Please wait to purchase insurance until we notify you that the tour is confirmed to operate, as most policies are non-refundable.

For full details, visit our Trip Cancellation Insurance page at <https://fieldguides.com/trip-cancellation-insurance/>.

RESPONSIBILITY: For and in consideration of the opportunity to participate in the tour, each tour participant and each parent or legal guardian of a tour participant who is under 18 agrees to release, indemnify, and hold harmless Field Guides Incorporated, its agents, servants, employees, shareholders, officers, directors, attorneys, and contractors as more fully set forth in the Release and Indemnity Agreement on the registration form. Field Guides Incorporated acts only as an agent for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, airplane, or other means, and assumes no liability for injury, damage, loss, accident, delay, or irregularity caused by defect in such vehicles or for any reason whatsoever, including the acts, defaults, or bankruptcies of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. You acknowledge and agree that Field Guides Incorporated is not responsible for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. The tour participant shall bear all such losses and expenses. Field Guides Incorporated reserves the right to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. Field Guides Incorporated reserves the right to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely.

Participants should be in good health and should consult a physician before undertaking a tour. If you have questions about the physical requirements of a tour, please contact our office for further information. Participants should prepare for the tour by reading the detailed itinerary, the information bulletin, and other pertinent matter provided by Field Guides. Each participant is responsible for bringing appropriate clothing and equipment as recommended in our bulletins.

THE RECEIPT OF YOUR TOUR DEPOSIT SHALL BE DEEMED TO BE CONSENT TO THE ABOVE CONDITIONS. EACH TOUR PARTICIPANT AND EACH PARENT OR LEGAL GUARDIAN OF A TOUR PARTICIPANT WHO IS UNDER 18 SHALL SIGN AND DELIVER THE RELEASE AND INDEMNITY AGREEMENT AT THE TIME OF REGISTRATION.
