

ITINERARY
ALASKA

Tour I

Part One: May 28-June 5, 2022

Part Two: June 4-14, 2022

Tour II

Part One: June 6-14, 2022

Part Two: June 13-23, 2022

The Bluethroat is a gorgeous Eurasian songbird that just reaches North America on the Alaskan tundra. We'll look for them when we visit the Seward peninsula near Nome. Photograph by participant Linnet Tse.

We include here information for those interested in the 2022 Field Guides Alaska tour:

- a general introduction to the tour
- a description of the birding areas to be visited
- an abbreviated daily itinerary with some indication of the nature of each day's birding outings

These additional materials will be made available to those who register for the tour:

- an annotated list of the birds recorded on a previous year's Field Guides trip to the area, with comments by guide(s) on notable species or sightings (may be downloaded from our web site)
- a detailed information bulletin with important logistical information and answers to questions regarding accommodations, air arrangements, clothing, currency, customs and immigration, documents, health precautions, and personal items
- a reference list
- a Field Guides checklist for preparing and keeping track of the birds we see on the tour
- after the conclusion of the tour, a list of birds seen on the tour

One's first glimmer of the immensity of Alaska comes as the airplane drops in for landing at Anchorage International Airport in between snow-capped peaks and the expansive flats of Cook Inlet off the end of the runway. And the sky in this far northern latitude seems indescribably wide and high, the air crisp and pure. The place is nothing short of spectacular! But this is not a national park set aside for its scenic grandeur, center of attraction for thousands of tourists; it's just the outskirts of town. Anchorage itself, a modern, thriving city, is insignificant by comparison, almost out of place in the wilderness of mountains, lakes, and forest that form the landscape all around.

In the shuttle heading to the hotel, one gets the distinct urge to jump out and start birding immediately as the spruce forests and bogs of Alaska glide by outside and breeding-plumaged Mew Gulls course over ponds beckoningly dotted with phalaropes and waterfowl. Red-necked Grebes? Barrow's Goldeneyes? And those scaup were probably a convenient mix of Lessers and Greater. Settling down a bit, you realize that this is the beginning of one of the greatest of birding trips in one of the wildest, most beautiful places on Earth.

Alaska represents, for many birders, North America's ultimate birding frontier. It is a prime place to go for a beguiling mix of species such as King, Common, Spectacled, and Steller's eiders, Harlequin Duck, Gyrfalcon, Bristle-thighed Curlew, Aleutian Tern, Long-tailed, Parasitic, and Pomarine jaegers, Willow and Rock ptarmigans, Spruce Grouse, American Three-toed Woodpecker, Northern Hawk Owl, Slaty-backed Gull, Bluethroat, Northern Wheatear, Bohemian Waxwing, Eastern Yellow Wagtail, Arctic Warbler, Snow Bunting, and many more. The bogs and tundra echo with the cries of displaying shorebirds including American and Pacific golden-plovers, Hudsonian and Bar-tailed godwits, Greater and Lesser yellowlegs, Red and Red-necked phalaropes, Rock Sandpiper, and Wilson's Snipe.

The Horned Puffin is one of 10 or more alcids we'll see on this tour. Photograph by guide Doug Gochfeld.

The Pribilof Islands, nearly 800 miles from Anchorage in the cold waters of the Bering Sea, are home to millions of seabirds! These island comprise one of the most spectacular areas in the world for abundance and diversity of breeding seabirds. Standing at the edge of the nesting cliffs, one is surrounded by hundreds of breeding seabirds: Thick-billed and Common murrelets, Least, Parakeet, and Crested auklets, Horned and Tufted puffins, Northern Fulmars, Black-legged Kittiwakes, Red-faced Cormorants, and one of the world's rarest gulls, Red-legged Kittiwake. It is a thrilling experience that no North American birder should miss!

Denali National Park is host to Caribou, Moose, Brown ("Grizzly") Bears with cubs, Gray Wolf, and Dall's Sheep, as well as a fine variety of birds. With clear weather, we might enjoy spectacular views of snowy Denali - at 20,310 feet, the highest peak in North America.

Our visit to Nome and the intensely scenic Seward Peninsula offers birders the chance to witness the merging of two major avifaunas: the Nearctic and the Palearctic. We'll see Fox Sparrows breeding alongside Bluethroats and Arctic Warblers, while Eastern Yellow Wagtails perform their courtship flights above singing Yellow Warblers and Golden-crowned Sparrows.

The icy waters and rocky intertidal zone of Kenai Fjords National Park provides a home for the likes of Black Oystercatcher, Kittlitz's and Ancient murrelets, Humpback Whales, and Sea Otters. Far to the north, in Utqiagvik (formerly Barrow), we'll try to get good looks at Yellow-billed Loon, Snowy Owl, and all four species of beautiful eiders (especially Spectacled and Steller's) among the numerous displaying shorebirds that roam the flat tundra.

Our grand tour will take us to many of Alaska's finest birding sites. Part I visits the St. Paul Island, the Anchorage area, and Denali National Park. Part II visits Seward (including Kenai Fjords National Park), Utqiagvik (formerly Barrow), Nome, and the Anchorage area. Our late spring-early summer schedule on the Pribilofs and at Nome gives us a very good chance of finding one or more Asiatic strays, in addition to the numerous cliff-nesting species and other regular breeders.

June is a great time to be in Alaska, when the birds are in courtship and full breeding regalia and most of the insects are still underwater. The northern summer is a time of vibrant life, but there is an undertone of urgency, for the season's end is always in sight. This year, head north to Alaska!

All participants will be required to confirm they will have completed a full COVID vaccination course at least two weeks prior to the tour (which, for tours departing on or after March 1, 2022, includes a booster). Having a vaccinated group will greatly diminish but not eliminate the possibility of the group and individual participants being adversely affected by COVID-19. **We are requiring all of our staff guides to be vaccinated, including getting the booster.** Note too, that many travel destinations are or soon will be requiring proof of vaccination for entry to bypass testing delays or quarantine, and that entry requirements for a destination can change at any time. Proof of a booster shot, too, may become a requirement for some travel destinations if they choose to declare that vaccinations do not last indefinitely. And having a booster means your risk is lowered and your travel plans and those of our group are less likely to be disrupted.

We want to be sure you are on the right tour! Below is a description of the physical requirements of the tour. If you are concerned about the difficulty, please contact us about this and be sure to fully explain your concerns. We want to make sure you have a wonderful time with us, so if you are uncomfortable with the requirements, just let us know and we can help you find a better fitting tour! Field Guides will not charge you a change or cancellation fee if you opt out within 10 days of depositing.

Physical Requirements of this tour:

- **TRAILS:** There is one long hike, to find the Bristle-thighed Curlew, on Part II. This hike lasts 3-4 hours; terrain is steep and uneven tundra, approximately 3 miles round-trip. Other hikes are generally shorter, but terrain may be uneven, with obstacles such as fallen logs, grass hummocks and rocks. Some trails may be in wet areas where waterproof footwear is helpful/necessary.
- **POTENTIAL CHALLENGES:** *Part II:* An all-day boat trip onto the Kenai Fjords may be rough, and requires a good sense of balance. Medication is recommended if you suffer from motion sickness. May need to climb stairs at some hotels. Travel will generally be in 15-passenger vans; you'll need to be able to climb in and out several or more times per day.
- **PACE:** Days will be long! Breakfast is typically between 6-7 a.m. and most evenings dinner will be around 7 p.m. On St. Paul, dinner will usually be around 5:30, and we'll have optional birding afterward until about 8 p.m. We will have optional birding after dinner until perhaps 11 p.m. in Nome and Utqiagvik. Some days we will be out in the field all day, lunchtime included. We'll have some long travel days as well; flights to and from the Pribilofs, and up to Nome and Utqiagvik. The day we fly to Utqiagvik will start earlier; time will depend on our flight.
- **ELEVATION:** We don't expect to spend time at any high elevation (5000+ ft) and do not think it will be a problem for any participants.
- **WEATHER:** In general, temps range widely, from lows in the 30s °F to highs in the 70s °F. *Part I:* It can be cold in the Pribilofs, temps of 35-45 °F should be expected, wind and rain are possible/likely. *Part II:* It will be cold in Utqiagvik, potentially down to the teens or 20s °F, with a wind chill. We will be birding areas that may be wet; waterproof boots are needed. Rain is likely; rain gear is needed.
- **VEHICLE SEATING:** Participants will need to be flexible enough to maneuver to the back of the vehicle on occasion. Those who experience motion sickness will need to bring adequate medication for the duration of the tour, as we are not able to reserve forward seats for medical conditions.
- **BATHROOM BREAKS:** Whenever possible, we use modern, indoor restrooms, but on occasion, participants must be prepared to make a comfort stop in nature.
- **OPTING OUT:** You may opt out of the Bristle-thighed Curlew hike, and stay at the van or back at the hotel. You may also opt-out of the Seward boat trip, and stay back at the hotel for the day. It is also possible to take some time off when we are in Utqiagvik, on St. Paul, and possibly in Nome.

If you are uncertain about whether this tour is a good match for your abilities, please don't hesitate to contact our office; if they cannot directly answer your queries, they will put you in touch with one of the guides.

About the Birding Areas

St. Paul Island in the Pribilofs—St. Paul Island lies in the cold waters of the Bering Sea some 770 miles west of Anchorage. In spite of the remote nature of this island, it is a popular destination for birders and others interested in natural history and Native American culture. Populated primarily by Aleuts descended from those brought as slaves to the island by Russian fur traders in the late 1700s and early 1800s, the small town of St. Paul offers visitors comfortable accommodations (with shared bathroom facilities), surprisingly good and plentiful food, and good transportation along the few roads of the island. For birders, the main attractions to this island are the huge numbers of nesting seabirds (at least eight nesting alcid species, plus such specialties as Red-faced Cormorant and Red-legged Kittiwake) and, to a lesser extent, the island's history as a shelter for wayward migrants from both Asia and America. The Pribilofs are also home to the world's largest concentration of Northern Fur Seals (nearly 80% of the world population), whose rookeries dot the beaches and rocky headlands.

Volcanic in origin, St. Paul Island is a mix of marshy wetlands, lakes, dunes, cinder cones,

grassy tundra, ancient lava flows, and low and high sea cliffs. We should have almost two days to explore these varied habitats, allowing us an appropriate amount of time to study and photograph the numerous breeding seabirds of the island and to look for any Asian vagrants that may be present. On one day, we may walk across a stretch of island tundra, through the beach dunes, or around the perimeter of a marshy lake. Walking away from the roads may involve traversing some moderately difficult terrain and marshy habitat, but nothing that a reasonably fit individual cannot do at an unrushed pace.

Denali National Park—Save for the one narrow road winding its way through the park, virtually all of Denali's 5,695,000 acres comprise an untouched wilderness of mountains and valleys, of dark, spruce-lined rivers and rugged alpine meadows. We'll venture into this spectacular park on this road aboard one of the park shuttle buses - the only way for people to access a large stretch of the park road.

The wildlife and scenery of Denali National Park are absolutely phenomenal! We'll be hoping for clear weather on one of our days here to view the incredible 20,310-foot high Denali, North America's highest peak, among the numerous (albeit diminutive by comparison) snow-covered peaks of the Alaska Range. Along with a number of bird possibilities such as Gyrfalcon, Willow Ptarmigan, and Long-tailed Jaeger, large mammals such as Brown "Grizzly" Bear, Caribou, Dall's Sheep, Moose, and Gray Wolf will likely occupy us during our thrilling ride into the park.

At least one day will be spent on the scenic Denali Highway east of the national park. This unpaved road affords easy access to the many spruce bogs, rushing streams, lakes, and upland tundra that harbor the area's special birds, including Barrow's Goldeneye, Trumpeter Swan, Arctic Warbler (typically a late spring arrival unlikely to be seen on the first tour offering), Northern Shrike, and Bohemian Waxwing. The scenery along this road can be spectacular!

Nome and the Seward Peninsula— Accessed by daily jet service from Anchorage, this once-remote outpost in far western Alaska is now easy to reach and offers visitors unexpected comfort. Our lovely hotel looks out to Norton Sound and provides us with an excellent chance to seawatch right outside our doors. Situated on the south coast of the Seward Peninsula, the Nome area is characterized by a mix of moist tussock-heath tundra and drier, upland tundra crossed with shrub-lined creeks. A few good dirt roads give access to large lagoons and inland hills as well. We'll travel these roads in search of the many specialties of the area, some found here more readily than at any other accessible site in North America. Among the many possibilities are Arctic Loon (rare), Gyrfalcon, both American and Pacific golden-plovers, Bar-tailed Godwit, Bristle-thighed Curlew (rare), Red-necked Stint (rare), Slaty-backed Gull (rare), Aleutian Tern, Bluethroat,

Northern Wheatear, White (rare) and Eastern Yellow wagtails, and Hoary Redpoll. The Bristle-thighed Curlews have been found nesting in the central portion of the peninsula, and in order to see them, we will likely have to hike a hill some two to three miles round trip over very challenging tundra. The remainder of our birding will be done primarily from the vehicles and along the roadsides. Scenery in this part of Alaska is no less grand than in other parts of the state, and past clients have been overwhelmed by the extraordinary vistas on the Kougarak and Teller roads.

Seward and Kenai Fjords National Park—One of the many scenic delights in south coastal Alaska is the rugged Kenai Fjords National Park on the southeast side of the Kenai Peninsula. The park and the adjacent Alaska Maritime NWR protect numerous seabird nesting cliffs and islands that host many thousands of alcids, cormorants, kittiwakes, and other seabirds. The combination of thousands of seabirds, numerous marine mammals, lofty snow-covered peaks, and stunning glaciers make this a spectacle not to be missed. Our all-day boat trip out of Seward and into the park should be one of the most memorable days of the trip. Some of the birds that we hope to see during our boating excursion include Pelagic and Red-faced cormorants, Surf and White-winged scoters, Black Oystercatcher, Black-legged Kittiwake, Common and Thick-billed (scarce) murrelets, Pigeon Guillemot, Parakeet (very local) and Rhinoceros auklets, Marbled, Ancient (scarce), and Kittlitz's (scarce and local) murrelets, and both Horned and Tufted puffins.

The tall Sitka Spruce and Mountain (Western) Hemlock forests in the Seward area are typical of southeastern Alaska and are home to a number of birds that we are unlikely to encounter elsewhere, such as Rufous Hummingbird, Chestnut-backed Chickadee, Steller's Jay, Northwestern Crow, and Pine Grosbeak. The waters of Resurrection Bay at Seward support a healthy population of animated Sea Otters, which can easily be seen from shore near town and from our boat. And, if you're partial to great seafood, you won't be disappointed at dinnertime!

Orcas and Humpback Whales, Sea Otters and many pelagic birds, along with the stunning scenery of the Seward area await us on our boat trip to the Kenai Fjords. Photograph by guide Chris Benesh.

Utqiagvik (formerly Barrow)—The land near the far-northern town of Utqiagvik is a flat, watery expanse in the grip of permafrost, which in places is as deep as 2000 feet! The landscape is fractured into a maze of giant, ice-wedge polygons, a pattern resulting from the continual freezing and thawing of the surface of the land. The *aufeis*, overhanging shelves of ice formed by overflow waters of north-flowing rivers, look like rivers of ice from the air. And pingos, or “ice blisters,” frozen hills formed by ice forced to expand upward in drained depressions, contribute further to the unique and fascinating aspect of Alaska's North Slope. Our flight takes us over the Brooks Range and leaves us on the coast of the Arctic Ocean at 71 degrees 20 minutes North latitude, more than 300 miles north of the Arctic Circle! Clearly, Point Barrow, the northernmost point in Alaska, is off the beaten track. This is not hard to understand, for Utqiagvik is a place of extremes, where the summer sun does not sink below the horizon for 67 days straight (and it is not dark for another 52 days!), the sun does not shine on the town for 67 days straight in the winter, the weather is calm only 1% of the year, and annual precipitation (rain and snow combined) is a meager 5 to 8 inches, the lowest in Alaska.

Although such a harsh place would surely seem unable to support many birds, the landscape here swarms with a variety of breeding shorebirds, waterfowl, and others. It is also home to two of the rarest birds of the Far North—the endangered Spectacled and Steller's eiders. Populations of these gaudy ducks have declined in recent years, and each year we anxiously hold our collective breath until finding them here. We hope our good fortune will continue. During our search for the eiders, we will likely encounter a number of other species as well, including Red-throated, Pacific, and

Yellow-billed loons, King Eider, Pectoral and Baird's sandpipers, Long-billed Dowitcher, Red Phalarope, Pomarine Jaeger, Sabine's Gull, Black Guillemot, Snowy Owl, and Hoary Redpoll. Most of our birding here will be from our vehicles or along the roadside, with an occasional foray across the tundra. We may include an afternoon or evening foray to Pt. Barrow to search for Polar Bear (very rare) if off-road vehicles are available during our visit. Temperatures here are likely to be the coldest of the trip, ranging down to the teens or 20s with wind chill factored in (it's often warmer just a few miles inland).

Anchorage, the largest city in Alaska, is our base between excursions to the more remote areas of the state. Situated between Cook Inlet and the rugged Chugach Mountains, Anchorage features several small parks and reserves in and near town that we will visit during our stay. Westchester Lagoon is the centerpiece of a lovely city park that offers a good introduction to the breeding waterbirds of the area and also visual access to the extensive mudflats of Cook Inlet. Potter Marsh, just south of town, has some of the same birds but also harbors a few species not frequently found at Westchester. The numerous parks in town and just outside harbor species typical of south coastal Alaska, including Black-backed (rare) and American Three-toed woodpeckers, Varied Thrush, and White-winged Crossbill.

*The White Wagtail is an uncommon summer resident of western Alaska. We've seen them near Nome on recent tours.
Photograph by guide Cory Gregory.*

NOTE: In 2022 the order for the tour itineraries will vary on Part Two.

On Tour I, we will visit Seward first, then Barrow, and finish up in Nome. On Tour II, we will visit Barrow first, then Nome, and finish up in Seward. The same amount of time will be spent in each of the areas, only the tour order will vary.

Itinerary for Alaska

TOUR I, Part One—May 28-June 5, 2022

TOUR II, Part One—June 6-14, 2022

Day 1. Arrival in Anchorage. If we are not ticketing your flight, please be sure to inform our office of your flight number and arrival time into Anchorage. Please take the hotel's courtesy van to the Coast International Hotel; you'll need to call the hotel after you claim your luggage. **We plan to gather in the hotel lobby at 7:00 p.m. for dinner.** Night in Anchorage.

Day 2. To the Pribilofs. After breakfast and a bit of birding at the hotel, we'll head over to the airport to check in for the mid-day flight to the Pribilofs. After landing on the island and checking into our rooms at the airport hotel, we will head out for some birding, enjoying the characteristic breeding birds of the Pribilof Islands. Some of the common birds that we'll surely see on our first outings include Long-tailed and Harlequin ducks, Rock Sandpiper, Red-necked Phalarope, both

species of kittiwakes, Lapland Longspur, Snow Bunting, and Gray-crowned Rosy-Finch (the large island subspecies *umbrina*). We'll also view one of St. Paul's numerous Northern Fur Seal rookeries near town. Please be prepared for brisk temperatures (35-45 °F) and the possibility of light rain and gusting, cold wind when we arrive on the island. Sturdy, waterproof hiking boots are highly recommended during our entire stay on the island (along with rubber boots or N.E.O.S. carried on the bus for use when needed). Night on St. Paul Island.

Day 3. St. Paul Island. We'll have this day to explore the various seabird rookeries on St. Paul, which will give us a decent chance for clear weather while providing ample time to ensure excellent studies of all resident birds. And with a measure of good luck, we may turn up one or more Asiatic strays (the first half of June is excellent for this). We'll spend our morning (after breakfast) in the field, come back to town for lunch, and then head back out for the afternoon. We will also offer an after-dinner excursion for those interested. All of our outings will be done in 15-passenger vans. During our stay, depending on up-to-date reports, we may offer an extended hike over a difficult, ancient lava flow to search for the rare and local McKay's Bunting (although there has been no breeding for many years now). All of our meals (which are surprisingly good and fresh) will be eaten at a cafeteria-style restaurant located in town. Night on St. Paul Island.

Day 4. St. Paul Island; evening flight to Anchorage. Today we will track down any species that are still eluding us and check the lagoons and marshes near town for any rarities or migrants that may have blown in during the night. After lunch, we'll board our flight to the mainland, transferring to our Anchorage hotel late this evening. Night in Anchorage.

*On St. Paul Island, we'll spend time at the seabird rookeries, where we'll find numerous alcids plus species like Red-faced Cormorant and Red-legged Kittiwake which are specialties of the Pribilofs.
Photograph by guide Chris Benesh.*

Day 5. Anchorage to Denali National Park. We'll leave our hotel this morning to search for American Tree-toed Woodpecker and crossbills before driving to Denali National Park to the north. Because we plan to break up our drive with several birding stops and lunch, it will likely take most of the day. Please be prepared for the eventual rain shower (possible on virtually any day of this tour) and a temperature range of about 45-65 degrees. Night near Denali NP.

Day 6. Denali Highway. After breakfast this morning, we'll drive to the Denali Highway southeast of the park. This dirt highway stretches from the town of Cantwell to Paxson, traversing a mixture of willow/birch streamside habitat, Black Spruce bogs, ponds, and a mix of wet and dry tundra. With good weather, the scenery and the birding on this road are outstanding. Most of our birding will be along the roadside, but we might make a short hike or two out across wet tundra to look for a target species or two. If we haven't come across a Northern Hawk Owl by now, we'll be sure to scan the treetops for this elusive bird today. We plan to have a picnic lunch along the roadside and dinner will be back near our hotel. Night near Denali NP.

Day 7. Denali Highway & Denali National Park. After a restaurant breakfast, we'll head into the park for a full day's adventure. Upon boarding the park bus, we'll begin what is surely one of the most fascinating and scenic drives in North America. We'll be watching today for the likes of Golden Eagle, Willow Ptarmigan, Northern Hawk and Short-eared owls, Northern Shrike, and White-winged Crossbill. From our vantage on the bus, which will typically stop for just about anything that we wish to view, we'll be able to sample the spruce woodlands, alpine tundra, and the rocky ridges and escarpments that harbor Rock Ptarmigan, elegant pairs of Long-tailed Jaegers, and perhaps even Gyrfalcons. With luck we could get close to a Brown Bear or a bull Moose, and maybe even have the chance to view a wolf at a distance. We'll each carry a sack lunch into the park today, and we'll plan to arrive back to our comfortable hotel near the park entrance by early evening. Night near Denali NP.

Day 8. Denali Highway; to Anchorage; or arrival in Anchorage for Part II. This morning will likely find us back out on the Denali Highway searching for any birds that may have eluded us until now, such as Spruce Grouse, American Three-toed Woodpecker, Arctic Warbler, or Bohemian Waxwing. We will spend part of the morning on this road, planning to return to Anchorage by late afternoon.

If you have just arrived in Anchorage for Part II of the tour, please plan to meet the rest of the group in the lobby of our hotel at 6:30 p.m. for dinner unless there's a note at the front desk from your guides stating otherwise. Night in Anchorage.

TOUR I, Part Two—June 4-14, 2022

TOUR II, Part Two—June 13-23, 2022

Day 9. Anchorage to Seward. From Anchorage, we'll board our vans and drive south to Seward, passing along the Turnagain Arm of Cook Inlet and some magnificent scenery en route. A stop at Potter Marsh just south of Anchorage might reward us with a fine variety of nesting waterfowl and displaying shorebirds. Birding in the lush coastal forest near Seward searching for Pine Grosbeak, Red Crossbill, Rufous Hummingbird, American Dipper, and more, we'll slowly make our way to Seward, making a number of stops along the way—including, perhaps, that elusive Spruce Grouse! The trees are taller and the habitats become generally wetter as we near Seward, reflecting the increase of precipitation in this region of Alaska. We'll eat dinner at a wonderful restaurant in the harbor in Seward (if you love seafood, get ready!). Night in Seward.

Day 10. Kenai Fjords National Park. After breakfast, we'll board our boat to visit Kenai Fjords National Park. The trip is planned to last at least nine hours if the weather is good, four hours if not. Most of the waters that we will be visiting are sheltered and quite calm, but there are a few rougher stretches of open water, especially as we round Cape Aialik. If you are prone to motion sickness, you should take the necessary precautions before we board the boat today (or the night before, depending upon the preferred medication). Lunch will be provided on board, and hot and cold drinks will be available in the galley. If you are a photographer, be sure to bring plenty of batteries and memory cards. Dinner will be at a restaurant in Seward. Night in Seward.

Day 11. Seward to Anchorage and Flight to Utqiagvik (formerly Barrow). This morning after breakfast we will drive north again to Anchorage in time to catch our flight to Utqiagvik. Our flight crosses over the Brooks Range en route to the North Slope. Upon arrival at the far-northern outpost of Utqiagvik, we will transfer to our comfortable hotel to check into our rooms. This afternoon, we will bird one of three short roads that lead out of town. The Chukchi and Beaufort seas will likely be icebound when we arrive, so be prepared for cold temperatures (25 to 40 °F without wind-chill) during our stay. All of the tundra here, teeming with displaying shorebirds, is quite wet so rubber boots are a necessity. Since the sun never sets during the summer months, we'll offer optional after-dinner outings for those interested. Night in Utqiagvik.

Day 12. Birding the Utqiagvik area. Depending on local road conditions, we plan to visit all of the accessible birding areas near Utqiagvik, returning to town for lunch and dinner. Most of our birding will be from the roadside, but we will almost surely want to venture out into the wet tundra to scan the margins of ponds for the endangered Spectacled or Steller's eiders or to get a closer look at a distant Snowy Owl sitting on a nest. We will also spend some time scanning the ice for Polar Bear, seals, and perhaps Walrus, which we have rarely sighted. Night in Utqiagvik.

Day 13. Birding Utqiagvik; flight to Anchorage. After a final morning around Utqiagvik, we'll fly back to Anchorage in the early afternoon, arriving in time for dinner. Night in Anchorage.

Day 14. Flight to Nome. This morning we'll board our flight to Nome. Depending upon the time of our flight, we'll either pack a sandwich with us (like we did on our flight to St. Paul on Part I) or we'll eat lunch in Nome at a nearby restaurant after we land. After checking into our hotel in Nome, we'll make our way along the coastal road east of town to bird the coastal tundra and the Nome River mouth area near town, as well as the productive Safety Sound area for the remainder of the afternoon and into the early evening.

Our first afternoon here could produce such quality birds as Bar-tailed Godwit, all three jaegers, Slaty-backed Gull, Aleutian Tern, Eastern Yellow Wagtail, and Hoary Redpoll. Safety Sound is often an extremely bird-rich site and hosts impressive numbers of loons, waterfowl, cranes, shorebirds, gulls, and terns. Most birding will be along the roadside, but we may need to cross some wet tundra or marshy habitat to get a closer look at a suspicious-looking shorebird among the more common species feeding on the mudflats, so rubber boots stored under your vehicle seats may come in handy today. Night in Nome.

*The rare Bristle-thighed Curlew breeds on the tundra near Nome; we'll make a special hike on the tundra to find these birds.
Photograph by participant Holger Teichmann.*

Day 15. Nome area. After a picnic breakfast at our hotel in town, we plan to spend the entire day in the field today, journeying some seventy-five miles inland (if the road is open this year) on the Kougarok Road. A large percentage of our day will be devoted to the search for the rare Bristle-thighed Curlew, which will entail hiking three miles or more over the tundra, much of it uphill and challenging even for those who consider themselves fit. We'll take this hike at a reasonable pace, of course, and we hope to encounter the birds early on. Even if the curlews aren't in the cards for us today, the likes of Golden Eagle, Gyrfalcon, Tundra Swan, Black Scoter, Harlequin Duck, Willow and Rock ptarmigans, American and Pacific golden-plovers, Wandering Tattler, Gray-cheeked Thrush, Bluethroat, Northern Wheatear, and Arctic Warbler will surely hold our attention! We'll eat a picnic lunch in the field and will have dinner in town after our late afternoon return. Night in Nome.

Day 16. Birding Nome. Today's birding will likely take us northwest of town on the road to Teller, where we could find Rough-legged Hawk, Rock Ptarmigan, nesting Black-bellied Plover, Bar-tailed Godwit, Red Knot, Northern Wheatear, White Wagtail, and Muscox! Night in Nome.

Day 17. Birding Nome; flight to Anchorage. After a final hour or two this morning around Nome, we'll fly back to Anchorage, arriving in time for some repacking before dinner. Night in Anchorage.

Day 18. Departure for home. You may schedule your departure for any time today.

About Your Guides

Tour I

Tom Johnson grew up watching birds in central Pennsylvania. Interested in science and the outdoors from a young age, he became involved in a variety of field projects throughout his school years, including banding migrant landbirds and conducting point counts for the 2nd Pennsylvania Breeding Bird Atlas. He was fortunate to pursue undergraduate studies in biology at Cornell University, where he became even more excited to learn about systematics and migration while surrounded by the amazing ornithologists and birders of the Cornell Lab of Ornithology.

Since graduating from college, Tom has spent much of his time studying seabirds off the east coast of North America while conducting line transect surveys from NOAA ships between Nova Scotia and the Bahamas. When he's not otherwise occupied, he loves to devote time to wandering, taking photos, and searching for vagrants and hybrid birds.

Tom has long been interested in sharing his enthusiasm for exploring bird identification, distribution, and migration dynamics; he is a regional editor for *North American Birds*, a regular contributor to *Birding*, and a member of the ABA Checklist Committee.

Perhaps most of all, he loves sharing his passion for the natural world with others out in the field, and he's excited to have the opportunity to do this while leading for Field Guides.

"Tom Johnson [is] everything you would ever want in a birding guide. I have never known anyone who can get the target bird in the scope and ready for viewing faster... He hears the bird, scopes it, and we see it!" G. T., Spring in Cape May

Doug Gochfeld was born and raised in Brooklyn, NY, and his interest in birds was sparked at a young age (he participated in his first CBC at the age of 7), in part by his father. This interest soon spiraled into a full-blown obsession for Doug for a few years before he abruptly shelved it, in favor of baseball, for several adolescent years. He picked up his interest in birds again in College and once again became a dedicated/obsessed birder.

For several years before starting to lead a full slate of tours for Field Guides in 2016, he traveled extensively as a working birder. Field jobs working for multiple seasons monitoring migration at each of the legendary migration hotspots of Cape May, New Jersey, and Eilat in Israel helped to incubate Doug's healthy and dogged obsession with winged migration. He also guided on St. Paul Island, in Alaska's Pribilof Islands, for parts of four years, where the abundance of migrant birds was traded in for the abundance of tundra breeding and cliff-nesting birds. He now leads all over the world for Field Guides. His robust interest in the birds and culture of East and Southeast Asia has brought him to lead a broad spectrum of tours across these fascinating regions. You can also find him exploring, through the lens of bird guiding, Australia, Mexico, New Guinea, Israel, Alaska, and locales beyond and in between.

Doug is a Leica Pro Staff member, and he has been a regular leader at birding festivals throughout the USA. He has worked in Alaska, Suriname, and Brazil studying the breeding and wintering ecology of shorebirds, which hold a special place in his heart. His strongest interests in birding are migration, vagrancy, and patterns of distribution, and he's always excited to share his enthusiasm in, and knowledge of, these subjects and much more (even beyond birds!) on his tours, whether close to home or halfway around the world.

"Doug's enthusiasm, skill and tenacity at finding birds is amazing. He clearly loves showing birds to people - be it a common or not so common bird". D. S. Colorado Grouse

Tour II

Chris Benesh grew up studying natural history in California, where he was inspired by his father to take up birding as a teenager. After earning a degree in zoology from UC Santa Barbara in 1987, Chris moved to Austin to join the Field Guides staff. Since then, his life has undergone a wonderful transformation. The intervening years at Field Guides have taken him to many corners of the world and across both the Arctic and Antarctic circles!

Chris takes an interest in nearly anything that flies, and you might catch him sneaking a peek at a passing aircraft or stopping to examine a butterfly or odonate. You might also notice him getting especially excited at the sighting of a rare or wonderful mammal (heck, he can get excited about a squirrel).

"I would travel with Chris Benesh anywhere, any time. He is calm, pleasant, and good-humored. He is not only brilliant at spotting and finding birds, but equally brilliant at ensuring that every member of the group gets a great look at the bird." B.M., Arizona's Second Spring

Chris's passion for education has led to his serving on the Arizona Bird Committee, leading the occasional workshop, presenting at birding conventions, and—we must add—thoroughly explaining in admirable detail the nuances of flycatchers to tour participants and colleagues alike. Chris has been guiding Field Guides Alaska tours since 1992.

Micah Riegner grew up exploring the Central Arizona Highlands and was fortunate to have parents who took him along on college field courses ranging from the coast of Mexico to the mountains of Costa Rica, where encounters with tinamous, barbets, and jacamars launched him into the birding world at a young age. During his time at Prescott College, he made annual pilgrimages to Amazonia, where he worked as a guide and participated in expeditions, mostly in Brazil. For his master's he studied the foraging ecology of Amazonian woodcreepers. When he's not in the field, he tries to make time to paint birds and other creatures that spark his interest.

Micah guided tours with Bret Whitney, John Coons, Dan Lane, and Tom Johnson before joining Field Guides full time in 2019.

Micah is a generous guide with an easy laugh and is eager to

share his love of birds and nature in the years to come. We know you will have a great time traveling with him, too!

“Micah is a great addition to the FG team - he was kind, attentive, fun, shared lots of his deep knowledge about Amazonia, and is an exceptionally sharp birder that gets folks on the bird quickly. And I loved that he shared his artwork with us.” M.C.; Succinct Suriname

Visit <https://fieldguides.com/our-staff/> for the complete tour schedules of all our Alaska guides.

Financial Information

FEE: \$12500 (includes a \$300 combined tour discount) from Anchorage (Part I only—\$6475; Part II only—\$6325)
All fees include flights within Alaska.

DEPOSIT: \$1275 per person (full tour); \$650 per person for Part I or \$625 for Part II only

FINAL PAYMENT DUE: Tour I-January 28, 2022; Tour II-February 26, 2022

SINGLE SUPPLEMENT (Optional*): \$2350 (full tour); \$1100 (Part I) or \$1250(Part II)

LIMIT: 14

Special Note: Tour fees may be subject to change due to the global economic effects of COVID-19.

We have published the itinerary and price for this tour with the understanding that during these uncertain times we are likely to encounter unforeseen changes. Some of our tours may incur higher costs due to increases in currency exchange rate fluctuations or COVID-19 related fees imposed by countries and/or suppliers. Travel and hospitality companies all over the world have been adversely affected by the pandemic, and there is no guarantee that all of the lodging and transportation we have booked for this tour will still be available at the time of departure. We hope to maintain our services as indicated in our itinerary as well as our published tour fee. However, if changes are required we will make every effort to maintain the quality of the itinerary as it is published with the most appropriate substitutions available. Should any necessary changes or other unforeseen causes result in an increase in service rates to us, we reserve the right to pass on those increases in fees to the tour participant.

Other Things You Need to Know

TOUR MANAGER: The manager for this tour is Karen Turner. Karen will be happy to assist you in preparing for the tour. If you have any questions, please don't hesitate to call her!

AIR ARRANGEMENTS: Field Guides is a full service travel agency and your tour manager will be happy to assist you with flights to join this tour. Field Guides does not charge a service fee for these services to clients booking a tour. However, we understand that tech-savvy clients often prefer to shop online or that you may wish to use mileage to purchase tickets. Regardless of which method you choose, your tour manager will be happy to provide assistance regarding ticket prices and schedules, along with rental cars and extra hotel nights as needed.

Please be sure to check with your tour manager prior to purchasing your ticket to make sure the flights you have chosen will work well with the tour itinerary and that the tour is sufficiently subscribed to operate. Once purchased, most airline tickets are non-refundable and carry a penalty to change. Field Guides cannot be responsible for these fees.

Also, it is imperative that we receive a copy of your comprehensive flight itinerary—including any and all flights

not covered in the tour fee—so that we may track you in the event of missed connections, delays, or other mishaps.

LUGGAGE: Please be aware that many airlines have recently modified their luggage policies and are charging additional fees for checked bags. Updates could easily occur before your departure, so you may wish to contact your airline to verify the policy. Additional charges for bags on any flights, whether these are covered by the tour fee or not, will be the client's responsibility.

TOUR INCLUSIONS/EXCLUSIONS: The fee for the **full-length tour** is \$12,500 for one person in double occupancy* from Anchorage. It includes all lodging from Day 1 through Day 17, all meals from dinner on Day 1 through dinner on Day 17, *all flights within Alaska as outlined in this tour itinerary*, boat trips, all ground transportation, entrance fees, baggage handling, and the guide services of the tour leader(s). Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

The above fee does **not** include your airfare to and from Anchorage, airport taxes, any taxi hire to or from the airport, any checked or carry-on baggage charges imposed by the airlines, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

The **single supplement** for the full tour is \$2350.

The fee for **Part I** is \$6475 for one person in double occupancy* from Anchorage. It includes all lodging from Day 1 through Day 8, all meals from dinner on Day 1 through dinner on Day 9, the flights from Anchorage to the Pribilofs and return as outlined in this tour itinerary, all ground transportation, entrance fees, baggage handling, and the guide services of the tour leader(s). Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

The above fee does **not** include your airfare to and from Anchorage, airport taxes, any taxi hire to or from the airport, any checked or carry-on baggage charges imposed by the airlines, breakfast on the morning of Day 10, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

The **single supplement** for Part I is \$1100* (singles may not be available on the Pribilofs).

The fee for **Part II** is \$6325 for one person in double occupancy* from Anchorage. It includes all lodging from Day 9 through Day 18, all meals from dinner on Day 9 through dinner on Day 17, the flights Anchorage/Nome/Anchorage and Anchorage/ Utqiagvik/Anchorage as outlined in this tour itinerary, boat trips, all ground transportation, entrance fees, baggage handling, and the guide services of the tour leader(s). Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

The above fee does **not** include your airfare to and from Anchorage, airport taxes, any taxi hire to or from the airport, any checked or carry-on baggage charges imposed by the airlines, breakfast on the morning of Day 18, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

The **single supplement** for Part II is \$1250*.

*If you have a trusted friend, relative, or significant other with whom you wish to share a room on tour, please let us know and your tour manager will make that assignment. Field Guides is not currently pairing roommates who do not know each other, and the single supplement will apply if you do not have a roommate. **Note:** There may be occasions on certain tours where singles won't be available at all hotels/lodges. If this is the case, your tour manager will let you know. You will be advised ahead of time who you will be rooming with and you will have the opportunity to connect with that person before the tour, if you would like.

Our tour fees are based on double occupancy; one-half the cost of a double room is priced into the tour fee. The single supplement is calculated by taking the actual cost of a single room and subtracting one-half the cost of a double room (plus any applicable taxes).

TOUR REGISTRATION: To register for this tour, please [contact our office](#). Our office will be in touch with you by email by the next business day (Mon-Fri) with instructions on how to complete our new electronic registration form and medical questionnaire. (We are no longer accepting the paper version.)

Please mail your **deposit of \$1275 (\$650—Part I only; \$625—Part II only)** per person, or see our Payment Options at <https://fieldguides.com/payment-options/>. **Full payment** of the tour fee is due 120 days prior to departure, or **by January 28, 2022 (Tour I), or February 26, 2022 (Tour II). We will bill you for the final payment at either 120 days or when the tour has reached sufficient subscription to operate, whichever date comes later.**

Please note that if you are traveling on a tour **outside your country of domicile** (for example, outside the US for US residents), we will require **proof of travel insurance**. Since the cost of your trip insurance and airline tickets is generally non-refundable, please do not finalize these purchases until you have received final billing for the tour or have been advised that the tour is sufficiently subscribed to operate by your tour manager.

SMOKING: Almost all of our clients prefer a smoke-free environment. If you smoke, please be sensitive to the group and refrain from smoking at meals, in vehicles, and in proximity to the group on trails and elsewhere.

CANCELLATION POLICY: FOR 2022 TOURS: Refund of deposit and payment, less \$100 handling fee, will be made if cancellation is received up to 120 days before departure. If cancellation occurs between 119 and 70 days before the departure date, 50% of the tour fee is refundable. Thereafter, all deposits and payments are not refundable and non-transferable. **FOR 2023 TOURS & BEYOND:** Note that beginning in 2023, the 50% refund period will become 179 to 90 days before departure, with no refund thereafter.

Our cancellation policy only applies to payments made to Field Guides for tour (and any services included in those fees). Airline tickets not included in the tour fee and purchased separately often carry penalties for cancellation or change, or are sometimes totally non-refundable. Additionally, if you take out trip insurance the cost of that insurance is not refundable, so it is best to purchase the policy just prior to making full payment for the tour or at the time you purchase airline tickets, depending upon the airline's restrictions.

The right is reserved to cancel any tour prior to departure. In most such cases, full refund will constitute full settlement to the passenger. Note this exception, however: If you have been advised pre-tour that there is a non-refundable portion of your tour fee no matter the reason for Field Guides cancellation of the tour, that portion will not be refunded. The right is reserved to substitute in case of emergency another guide for the original one.

TRIP CANCELLATION & MEDICAL EMERGENCY INSURANCE: We strongly recommend you consider purchasing trip cancellation (including medical emergency) insurance to cover your investment in case of injury or illness to you or your family prior to or during a trip. If you are traveling on a tour **outside your country of domicile** (for example, outside the US for US residents), we will **require proof of travel insurance**. Because we must remit early (and substantial) tour deposits to our suppliers, you acknowledge and agree that we will not issue a refund when cancellation occurs within 70 days of departure, and only a partial refund from 70 to 119 days prior to departure (see CANCELLATION POLICY). In addition, the Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. US medical insurance plans seldom cover health costs incurred outside the United States unless supplemental coverage is purchased. Furthermore, US Medicare and Medicaid programs do not provide payment for medical services outside the United States.

When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the United States may cost well in excess of \$50,000. Uninsured travelers who require medical care overseas often face extreme difficulties. When consulting with your insurer prior to your trip, please ascertain whether payment will be made to the overseas healthcare provider or whether you will be reimbursed later for expenses that you incur.

US citizens will receive information from us regarding optional tour cancellation/emergency medical insurance. Our agent, CSA, will insure for trip cancellation and interruption, medical coverage, travel delay, baggage loss and delay, and emergency medical transportation. If you purchase the insurance prior to, or within 24 hours of making final payment for the tour, and cover all non-refundable parts of the trip (including any non-refundable flights and in some cases, other arrangements), pre-existing conditions are covered. You may purchase your CSA policy on-line by visiting our website at <https://fieldguides.com/trip-cancellation-insurance/> and clicking the link to CSA. The CSA webpage also includes a contact number.

Currently we are unable to offer CSA insurance policies to residents of New York and Hawaii. We have had clients provide positive feedback after acquiring insurance thru InsureMyTrip (<https://www.insuremytrip.com/>) in the past, and would suggest that company as an alternative. When purchasing insurance with a company other than CSA,

you will want to understand whether the timing of your purchase will affect coverage before paying your first deposit. Insurance purchase requirements can vary from company to company, and such requirements could limit your options if you do not look into this until making your final payment for your tour. Please let us know if you have any questions about this.

Please note, once the insurance is purchased it is non-refundable, so please check with your tour manager prior to making the purchase to assure the tour will operate as scheduled. Citizens of other countries are urged to consult their insurance broker.

RESPONSIBILITY: For and in consideration of the opportunity to participate in the tour, each tour participant and each parent or legal guardian of a tour participant who is under 18 agrees to release, indemnify, and hold harmless Field Guides Incorporated, its agents, servants, employees, shareholders, officers, directors, attorneys, and contractors as more fully set forth in the Release and Indemnity Agreement on the reverse side of the registration form. Field Guides Incorporated acts only as an agent for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, airplane, or other means, and assumes no liability for injury, damage, loss, accident, delay, or irregularity caused by defect in such vehicles or for any reason whatsoever, including the acts, defaults, or bankruptcies of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. You acknowledge and agree that Field Guides Incorporated is not responsible for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. The tour participant shall bear all such losses and expenses. Field Guides Incorporated reserves the right to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. Field Guides Incorporated reserves the right to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely.

Participants should be in good health and should consult a physician before undertaking a tour. If you have questions about the physical requirements of a tour, please contact our office for further information. Participants should prepare for the tour by reading the detailed itinerary, the information bulletin, and other pertinent matter provided by Field Guides. Each participant is responsible for bringing appropriate clothing and equipment as recommended in our bulletins.

THE RECEIPT OF YOUR TOUR DEPOSIT SHALL BE DEEMED TO BE CONSENT TO THE ABOVE CONDITIONS. EACH TOUR PARTICIPANT AND EACH PARENT OR LEGAL GUARDIAN OF A TOUR PARTICIPANT WHO IS UNDER 18 SHALL SIGN AND DELIVER THE RELEASE AND INDEMNITY AGREEMENT AT THE TIME OF REGISTRATION.
