

## **ARIZONA WINTER SPECIALTIES**

*December 27, 2025 – January 2, 2026*

*The beautiful Phainopepla is a desert specialty with an interesting breeding strategy. In late winter, Phainopeplas breed in the lowland deserts, raising one brood; then as the weather heats up, they move to higher, moister woodlands where another round of breeding occurs. It's not known if the same individuals breed in both seasons. Photograph by guide Cory Gregory.*

*We include here information for those interested in the 2025 Field Guides Arizona Winter Specialties tour:*

- a general introduction to the tour
- a description of the birding areas to be visited on the tour
- an abbreviated daily itinerary with some indication of the nature of each day's birding outings

*These additional materials will be made available to those who register for the tour:*

- an annotated list of the birds recorded on a previous year's Field Guides trip to the area, with comments by guide(s) on notable species or sightings (may be downloaded from the website)
- a detailed information bulletin with important logistical information and answers to questions regarding accommodations, air arrangements, clothing, currency, customs and immigration, documents, health precautions, and personal items
- a Field Guides checklist for preparing and keeping track of the birds we see on the tour
- after the conclusion of the tour, a list of birds seen on the tour

**S**outhern Arizona is a great place to bird in winter! Yes, the trogons and hummingbirds have largely departed (but not all of them), and the Hooded Oriole nests hang empty in the sycamores. But other species have arrived to take their place. The wide and scenic Sonoita and San Rafael grasslands secret away a multitude of pipits, larks, sparrows, and longspurs. Bendire's, Crissal, and LeConte's thrashers sing from mesquite trees on the sparse desert flats west of Buckeye. Sandhill Cranes, numbering in the thousands, rise bugling from protected roosting and feeding sites in the Sulphur Springs Valley. A plethora of raptors ply the vast blue desert skies searching for prey and thermals. Winter irruptives, including Lewis's Woodpecker, Mountain Bluebird, and Lawrence's Goldfinch, appear in varying numbers from year to year, brightening the subdued landscapes when they occur. And Mexican species regularly wander across the border to add a tropical twist to the triplist.

This short tour is designed to sample the riches to be found in the lowlands of Southern Arizona in the winter: several productive watering holes and desert haunts around Phoenix and Tucson, the extensive riparian areas around Patagonia and Nogales, the San Rafael Grasslands near Sonoita, and the consistently birdy Sulphur Springs Valley near the Mexican border southeast of Tucson. Among the many species we'll be looking for during our stay are Ferruginous and "Harlan's" hawks, Bald and Golden eagles, Crested Caracara, Prairie Falcon, Mountain Plover, Hammond's, Gray, and Dusky flycatchers, the notoriously difficult-to-see Sprague's Pipit, an impressive assortment of sparrows including Grasshopper, Baird's, Rufous-winged, Rufous-crowned, Sagebrush, Bell's, Black-chinned, and Brewer's, and large numbers of Chestnut-collared and smaller numbers of Thick-billed (formerly McCown's) longspurs.

Additionally, this season has produced some very exciting finds from "south of the border." Ruddy Ground Dove and Rufous-backed Robin are now annual in Arizona in winter. Eared Quetzal, Short-tailed Hawk, Green Kingfisher, Nutting's Flycatcher, Rose-throated Becard, Sinaloa Wren, White-throated and Aztec thrushes, Blue Mockingbird, Crescent-chested and Rufous-capped warblers, Black-capped Gnatcatcher, and Streak-backed Oriole have also made recent appearances at this season. Who knows what it might be this year? Your guide is very experienced in the region and has plenty of local contacts, so we'll have up-to-the-minute information as to where and when any of these unusual species might be present. If you're looking to escape the winter 'blahs' and soak up some winter sun and see some exciting wintering birds, head to southern Arizona for a truly exceptional winter birding experience and see this wonderful state as you never have before!

*A number of Mexican species wander north of the border on occasion, including the tiny Ruddy Ground Dove. On a past tour, we were able to see two females feeding with the resident Inca Doves. Photograph by guide Chris Benesh.*

*We want to be sure you are on the right tour! Below is a description of the physical requirements of the tour. If you are concerned about the difficulty, please contact us about this and be sure to fully explain your concerns. We want to make sure you have a wonderful time with us, so if you are uncomfortable with the requirements, just let us know and we can help you find a better fitting tour! Field Guides will not charge you a change or cancellation fee if you opt out within 10 days of depositing.*

### **Physical requirements of this tour**

- **TRAILS & WALKING:** Light to moderate amounts of walking, some of it on paved roads, but many trails have hazards such as protruding rocks, fallen limbs or tree trunks, and thorny plants. In the mountains, some trails are steep in places. Unless there's an exceptional rarity that pops up along a trail, there will be no single walk exceeding 2 miles in distance; most are much shorter.

- **POTENTIAL CHALLENGES:** We cover much ground on this tour, and some days will feature long periods of time in the vans and lots of roadside birding with lots of getting into and out of vans.
- **PACE:** Moderate pace without a lot of “down time” on this compact tour. Early mornings (6:00-6:30 a.m. breakfasts), usually with no afternoon breaks back at our hotel during the tour.
- **ELEVATION:** All of our birding will take place at moderately high elevations (1500-4500 feet).
- **WEATHER:** Winter weather is relatively mild in southeastern Arizona. Expect temperatures in the 20s-low 40s in the early morning and evening, with days in the 50s to 70s F. Rain and [rarely] snow are both possible during the winter months in s. Arizona.
- **VEHICLE SEATING:** So that each participant has equal opportunity during our travel, we employ a seat rotation system on all tours. Participants will need to be flexible enough to maneuver to the back of the vehicle on occasion. Those who experience motion sickness will need to bring adequate medication for the duration of the tour, as we are not able to reserve forward seats for medical conditions.
- **BATHROOM BREAKS:** Whenever possible, we use modern, indoor restrooms, but on occasion, participants must be prepared to make a comfort stop in nature.

If you are uncertain about whether this tour is a good match for your abilities, please don't hesitate to contact our office; if they cannot directly answer your queries, they will put you in touch with your guide.

## About the Birding Areas

**Phoenix Area**—The Phoenix area (ca. 1200 feet elevation) has long been a favorite for winter visitors (both human and avian!) and the “Valley of the Sun” boasts a number of fine birding sites within easy driving distance from the center of town. The primary site that interests us lies almost due west of town near the small farming community of Buckeye where the sparse vegetation in very alkaline soil hosts a few pairs of the scarce LeConte’s Thrasher, which is often actively singing at this season. The area where these birds are found often harbors a fine variety of other mimids at this season too, with Crissal, Bendire’s, Curve-billed, and Sage thrashers all being possibilities. Sagebrush and Brewer’s sparrows often abound in the sparse scrub here during the winter months as well, and small numbers of Bell’s Sparrow can sometimes be found here (Sage Sparrow was recently split into two species, Sagebrush and Bells’ sparrows, and both can be found wintering in Southern Arizona).

Weather at this season in the Phoenix and Tucson areas is typically great, with clear skies and highs in the mid-60’s to low 70’s F (sometimes a little warmer, sometimes a little cooler) and lows in the upper 30’s or low 40’s. Winter in Arizona can be wet and cool, though, if Pacific cold fronts happen to be moving through the state. If this

is the case, highs can drop to the 40’s and 50’s, light to moderate rain (or very rarely even snow) can be a nuisance all day long, and overnight and morning temperatures can drop to below freezing (that’s *cold* for an Arizonan!). With this possibility in mind, please plan your birding attire accordingly.

**Santa Cruz Flats** – The agricultural area between Tucson and Casa Grande is an excellent area for wintering open-country birds. Raptors abound here, including Ferruginous Hawk, “Harlan’s” Red-tailed Hawk, Prairie Falcon, and Crested Caracara. The Evergreen Sod Farm typically hosts a wintering flock of Mountain Plovers, and we sometimes find Great Horned Owls, Burrowing Owls, Bendire’s Thrashers, and more in the area. The few riparian shelter-belts near farmhouses here can host interesting wintering landbirds such as Ruddy Ground Dove, Rufous-backed Robin, and eastern warblers.

*Black-tailed Gnatcatchers are one of the smallest of North America's birds. Like other gnatcatchers, they are very active and pugnacious, attempting to exclude many larger birds from their territories. Photograph by participant M. Roberts.*

**Tucson Area**—Flanked on three sides by high pine-covered mountains, the open desert of the Tucson Valley (ca. 2600 feet elevation) and the surrounding areas are the best places to find the local Gilded Flicker and Rufous-winged Sparrow. Numerous other species typical of the Lower Sonoran Desert can also be found here, including Gambel's Quail, Gila Woodpecker, Costa's and Anna's hummingbirds, Cactus Wren, Verdin, Black-tailed Gnatcatcher, and Pyrrhuloxia.

**Patagonia/Sonoita Creek and Vicinity**— Although the tall and sturdy Fremont's Cottonwoods and Arizona Sycamores are leafless now and the kingbirds and orioles have long since departed for warmer climes, this area is still one of the richest in Arizona for birding at this season. Other than the Mexican vagrants that this area has attracted in recent years, three species of *Empidonax* flycatchers regularly winter here, as do a fine variety of woodpeckers, raptors, sparrows, and finches. We'll devote most of our time to birding the beautiful stretches of riparian woodland, but we'll also want to check a variety of other characteristic habitats of the area. The Patagonia area (ca. 4100 feet) is considerably cooler than the Phoenix and Tucson areas during the daytime, and it's likely to drop below freezing during the night and early morning hours.

**San Rafael Grasslands**—Seemingly out of place in this land of high mountains and parched desert lands, the expansive San Rafael Grasslands (ca. 5000 feet) offer a pleasant diversion for birders during the winter months. In the rolling, virtually treeless grasslands here, a few birds are found during the colder months with relative ease. A walk through the knee-high grass will give us a chance to see such difficult birds as Sprague's Pipit (rare), Grasshopper and Baird's sparrows, and Chestnut-collared, Thick-billed (formerly McCown's; rare), and possibly even Lapland longspurs. This is an excellent place for raptors as well, and we'll stay alert for the likes of White-tailed Kite, Golden Eagle, Ferruginous Hawk, Merlin, and Prairie and Peregrine falcons.

**Sulphur Springs Valley**—Situated between the Chiricahua and Mule mountains, the Sulphur Springs Valley has long been a favorite winter haunt for Arizona birders. This flat land, devoted to cattle ranching and agriculture, attracts an impressive variety of raptors, waterfowl, finches, and a host of open-country birds to the fields, pastures, open desert, and ponds that make up this land. One of the winter highlights is the large number of Sandhill Cranes that winter in the valley (tens of thousands in recent winters). At dawn and at sunset, thousands of these stately birds can be seen flying to and from roosting grounds and favored feeding sites, and the sound of their constant bugling is not soon forgotten. The Willcox area (including the famous Lake Cochise) should offer some quail, waterbirds, raptors, and shorebirds for us to study. Weather permitting, it should be a memorable day of birding for our group.

*LeConte's Thrasher is a desert specialist, adapted to some of the driest conditions. We'll visit some dry flats where we should be able to find this species and perhaps a few other thrashers and desert sparrows. Photograph by guide Cory Gregory..*

## Itinerary for Arizona Winter Specialties

**Day 1, Sat, Dec 27. Arrival in Phoenix; late afternoon birding nearby.** Please plan to arrive in Phoenix **no later than 2:00 p.m.** today. Complimentary hotel shuttles between Sky Harbor Int'l Airport and our airport hotel are available 24 hours. We will plan to meet in the lobby of the hotel at 3:00 p.m. to start our birding at a nearby birding hotspot such as the Gilbert Water Ranch. Night in Phoenix.

**Day 2, Sun, Dec 28. Buckeye and the greater Phoenix area.** After a 6:00 a.m. breakfast at our hotel, this morning we'll make the drive west of Phoenix to the town of Buckeye where LeConte's Thrasher awaits us. It's not unusual at this season to record up to five or six species of mimids at this site, so we should get our fill of thrashers today. We'll also search for Sagebrush and Bell's sparrows in the area. The area southwest of Phoenix is often productive for such wintering species as Ruddy Ground Dove, a variety of waterfowl, shorebirds, wintering warblers, and the like so there should be plenty in this part of the valley to keep us busy for the morning, at least! We'll be sure to make a stop at a city park that hosts a good population of the introduced Rosy-faced Lovebird, a species recently added to the ABA checklist.

After we track down LeConte's Thrasher and others, in the afternoon we might drive to the Boyce Thompson Arboretum, east of Phoenix near the copper mining town of Superior, which is often home to several exciting winter visitors. It's one of the more reliable spots in the state for the shy Rufous-backed Robin from south of the border, but it also often harbors the likes of Williamson's Sapsucker, Lawrence's Goldfinch, Varied Thrush, or some other rare winter visitor along with the more common desert-dwelling species. Some winters, the Arboretum isn't so productive, and we'll devise an alternative site should we hear that a visit there won't be worth our while. Night in Phoenix.

**Day 3, Mon, Dec 29. Early birding around Phoenix; drive to Tucson via Santa Cruz Flats.** We'll have a couple of hours in the Phoenix area to search for anything that's eluded us up to this point before we start to work our way south along I-10. On our way south we'll check a couple of productive sod farms in the Santa Cruz Flats area south of Casa Grande for a wintering flock of Mountain Plovers, a group of Crested Caracaras or other wintering raptors, a variety of sparrows, and perhaps some wintering longspurs. Should we have missed the Bendire's Thrasher the day before in Buckeye, this area is quite good for the species, too. Night in Tucson.

**Days 4-6, Tue-Thu, Dec 30-Jan 1, 2026.** We'll base ourselves in our comfortable hotel in Tucson for the next three days, making day trips to track down the local specialties present this year and also to see the fine variety of wintering birds in

southeast Arizona. “Mexican” specialties such as Rufous-backed Robin, Sinaloa Wren, Rufous-capped Warbler, Ruddy Ground Dove, Black-capped Gnatcatcher, and Rose-throated Becard have all been reported at this season in the past several years, and the region might again be full of invading Western and Mountain bluebirds and Lawrence’s Goldfinches—a rare winter event that occurs every few years in Southeast Arizona.

In addition to searching for the local rarities present, we’ll also be able to devote some time to the rich grassland birding near Patagonia and the productive agricultural sites in the Sulphur Springs Valley southeast of Tucson. All of these sites are relatively easy day trips. Being based in Tucson for these three nights gives us a large degree of flexibility and we can revise our daily plans as needed just in case some other juicy waif makes an appearance during the course of the tour. Nights in Tucson.

*We’ll visit Whitewater Draw in the Sulphur Springs Valley, where thousands of Sandhill Cranes and other birds spend the winter.  
Photograph by guide Cory Gregory.*

**Day 7, Fri, Jan 2. Departure.** If you are flying out this morning from Tucson, be sure to arrange for the courtesy van to the airport in plenty of time for your flight. Happy New Year!

## About Your Guide

**Cory Gregory**, a lifelong addict of all things birds, started learning birds on flashcards at the age of three. Ever since he can remember, he knew he wanted to pursue his passion and work with birds. Cory earned a B.S. in zoology in Michigan, where he also worked for Whitefish Point Bird Observatory for several seasons. He then furthered his education at Iowa State University, where he earned a M.S. studying Long-billed Curlews in Nebraska. Still to this day, the prairie states mean a lot to him.

As an avian ecologist, Cory has worked with a wide range of birds including Steller’s Eiders in Alaska, Laysan Albatrosses in Hawaii, Red Knots in Georgia, and Upland Sandpipers in Kansas. In 2014 and 2015, Cory served as a local guide on St. Paul Island in the Pribilofs of Alaska and hasn’t stopped guiding since.

Parallel to being a full-time guide, Cory still identifies as a lifelong biologist and will occasionally work field jobs when he can. As recently as 2022, he worked as an avian ecologist in

*“Cory is a wonderful guide. He is very skilled and knowledgeable, but manages to be calm and patient as he responds to all our questions and repetitions. The itinerary was carefully and thoughtfully planned, allowing us to experience so much of Oregon and its birds.” D.M.; Oregon*

northern Michigan where he captured, handled, and banded Northern Saw-whet Owls.

Cory has been based out of Hannibal, Missouri for some time and now serves on the Missouri Birds Record Committee. When not on tour, he and his partner Ashley pursue their interests in birding, traveling, and mostly recently, moths.

In North America, his stomping grounds, Cory has co-lead Field Guides groups to locales coast-to-coast, including Arizona, Alaska, New Mexico, Colorado, Texas, Maine, and Newfoundland. Farther afield, Cory has also guided in Costa Rica, Mexico, Jamaica, Colombia, Peru, France, and Australia. He has a busy and wide-ranging schedule coming up thanks to adding Oregon and Michigan to his portfolio of tours. Be sure to take a look at his upcoming trips--folks have had a great time traveling with Cory, and we think you will, too!

Visit <https://fieldguides.com/our-staff/> for Cory's complete tour schedule; just click on his photo.

## Financial Information

**FEE: \$2925 from Phoenix** (*Please note that the tour begins in Phoenix and ends in Tucson.*)

**DEPOSIT:** \$300 per person

**FINAL PAYMENT DUE:** June 30, 2025

**SINGLE SUPPLEMENT (Optional):** \$425

**LIMIT:** 7

## Other Things You Need to Know

**TOUR MANAGER:** The manager for this tour is Christine Boilard. Christine will be happy to assist you in preparing for the tour. If you have any questions, please don't hesitate to contact her!

**AIR ARRANGEMENTS:** **Please note that this tour begins in Phoenix and ends in Tucson.**

- **Arrival:** please plan to arrive in Phoenix (PHX) on Day 1 no later than 2:00 p.m.
- **Departure:** you may schedule your departure from Tucson (TUS) on Day 7 at any time.

Field Guides is a full-service travel agency and your tour manager will be happy to assist you with flights to join this tour. Field Guides does not charge a service fee for these services to clients booking a tour. However, we understand that tech-savvy clients often prefer to shop online or that you may wish to use mileage to purchase tickets. Regardless of which method you choose, your tour manager will be happy to provide assistance regarding ticket prices and schedules, along with rental cars and extra hotel nights as needed.

Please be sure to check with your tour manager prior to purchasing your ticket to make sure the flights you have chosen will work well with the tour itinerary and that the tour is sufficiently subscribed to operate. Once purchased, most airline tickets are non-refundable and carry a penalty to change. Field Guides cannot be responsible for these fees.

**Also, it is imperative that we receive a copy of your comprehensive flight itinerary—including any and all flights not covered in the tour fee—so that we may track you in the event of missed connections, delays, or other mishaps.**

**LUGGAGE:** Please be aware that many airlines have recently modified their luggage policies and are charging additional fees for checked bags. Updates could easily occur before your departure, so you may wish to contact your airline to verify the policy. Additional charges for bags on any flights, whether these are covered by the tour fee or not, will be the client's responsibility.

**SMOKING:** Almost all of our clients prefer a smoke-free environment. If you smoke, please be sensitive to the group and refrain from smoking at meals, in vehicles, and in proximity to the group on trails and elsewhere.

**TOUR INCLUSIONS/EXCLUSIONS:** The **tour fee** is \$2925 for one person in double occupancy from Phoenix/Tucson. It includes all lodging from Day 1 through Day 6, all meals from dinner on Day 1 through breakfast on Day 7, all ground transportation, entrance fees, and the guide services of the tour leader(s). Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

The above fee does not include your airfare to Phoenix and from Tucson, airport taxes, any checked or carry-on baggage charges imposed by the airlines, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

The **single supplement** for the tour is \$425. If you do not have a roommate but wish to share, we will try to pair you with a roommate from the tour; but if none is available, you will be billed for the single supplement. Our tour fees are based on double occupancy; one-half the cost of a double room is priced into the tour fee. The single supplement is calculated by taking the actual cost of a single room and subtracting one-half the cost of a double room (plus any applicable taxes).

**TOUR REGISTRATION:** To register for this tour, please contact us at [fieldguides.com/contact-us/](https://fieldguides.com/contact-us/). Our office will be in touch with you by email by the next business day (Mon-Fri) with instructions on how to complete our new electronic registration form and medical questionnaire. (We are no longer accepting the paper version.)

Please mail your **deposit of \$300** per person, or see [fieldguides.com/payment-options/](https://fieldguides.com/payment-options/) for our Payment Options. **Full payment** of the tour fee is due 180 days prior to departure, or **by June 30, 2025**. **We will bill you for the final payment at either 180 days or when the tour has reached sufficient subscription to operate, whichever date comes later.** Since the cost of your trip insurance and airline tickets is generally non-refundable, please do not finalize these purchases until you have received final billing for the tour or have been advised that the tour is sufficiently subscribed to operate by your tour manager.

**TOUR LIMITS:** Our limits are firm and we don't exceed the limit by one to accommodate a couple when only one space remains open. However, on occasion, we will send along a guide in training on a tour. In these cases, one seat in the van or bus will be taken by the guide in training. Our guides will have a rotation system within the vehicle so that clients share the inconvenience equally. We hope this minor inconvenience will be more than offset by the advantages of having another guide along.

**CANCELLATION POLICY:** Refund of deposit and full payment, less \$100 handling fee, will be made if cancellation is received up to 180 days before departure. If cancellation occurs between 179 and 90 days before the departure date, 50% of the full tour fee is non-refundable, which would include the full deposit if the final payment has not yet been paid. Thereafter, all deposits and payments are not refundable and non-transferable.

Our cancellation policy only applies to payments made to Field Guides for tour (and any services included in those fees). Airline tickets not included in the tour fee and purchased separately often carry penalties for cancellation or change, or are sometimes totally non-refundable. Additionally, if you take out trip insurance the cost of that insurance is not refundable, so it is best to purchase the policy just prior to making full payment for the tour or at the time you purchase airline tickets, depending upon the airline's restrictions.

The right is reserved to cancel any tour prior to departure. In most such cases, full refund will constitute full settlement to the passenger. Note this exception, however: If you have been advised pre-tour that there is a non-refundable portion of your tour fee no matter the reason for Field Guides cancellation of the tour, that portion will not be refunded. The right is reserved to substitute in case of emergency another guide for the original one.

**TRIP CANCELLATION & MEDICAL EMERGENCY INSURANCE:** We strongly recommend you consider purchasing trip cancellation (including medical emergency) insurance to cover your investment in case of injury or illness to you or your family prior to or during a trip. Because we must remit early (and substantial) tour deposits to our suppliers, you acknowledge and agree that we will not issue a refund when cancellation occurs outside of our cancellation policy as published in the itinerary (see CANCELLATION POLICY). In addition, the Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. US medical insurance plans seldom cover health costs incurred outside the United States unless supplemental coverage is purchased. Furthermore, US Medicare and Medicaid programs do not provide payment for medical services outside the United States.

When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the United States may cost well in excess of \$50,000. Uninsured travelers who require medical care overseas often face extreme difficulties. When consulting with your insurer prior to your trip, please ascertain whether payment will be made to the overseas healthcare provider or whether you will be reimbursed later for expenses that you incur.

US citizens will receive information from us regarding optional tour cancellation/emergency medical insurance. Our agent, CSA, will insure for trip cancellation and interruption, medical coverage, travel delay, baggage loss and delay, and

emergency medical transportation. If you purchase the insurance prior to, or within 24 hours of making final payment for the tour, and cover all non-refundable parts of the trip (including any non-refundable flights and in some cases, other arrangements), pre-existing conditions are covered. You may purchase your CSA policy on-line by visiting our website at <https://fieldguides.com/trip-cancellation-insurance/> and clicking the link to CSA. The CSA webpage also includes a contact number.

**Currently we are unable to offer CSA insurance policies to residents of New York and Hawaii.** We have had clients provide positive feedback after acquiring insurance thru InsureMyTrip (<https://www.insuremytrip.com/>) in the past, and would suggest that company as an alternative. When purchasing insurance with a company other than CSA, you will want to understand whether the timing of your purchase will affect coverage before paying your first deposit. Insurance purchase requirements can vary from company to company, and such requirements could limit your options if you do not look into this until making your final payment for your tour. Please let us know if you have any questions about this.

Please note, once the insurance is purchased it is non-refundable, so please check with your tour manager prior to making the purchase to assure the tour will operate as scheduled. Citizens of other countries are urged to consult their insurance broker.

**RESPONSIBILITY:** For and in consideration of the opportunity to participate in the tour, each tour participant and each parent or legal guardian of a tour participant who is under 18 agrees to release, indemnify, and hold harmless Field Guides Incorporated, its agents, servants, employees, shareholders, officers, directors, attorneys, and contractors as more fully set forth in the Release and Indemnity Agreement on the registration form. Field Guides Incorporated acts only as an agent for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, airplane, or other means, and assumes no liability for injury, damage, loss, accident, delay, or irregularity caused by defect in such vehicles or for any reason whatsoever, including the acts, defaults, or bankruptcies of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. You acknowledge and agree that Field Guides Incorporated is not responsible for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. The tour participant shall bear all such losses and expenses. Field Guides Incorporated reserves the right to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. Field Guides Incorporated reserves the right to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely.

Participants should be in good health and should consult a physician before undertaking a tour. If you have questions about the physical requirements of a tour, please contact our office for further information. Participants should prepare for the tour by reading the detailed itinerary, the information bulletin, and other pertinent matter provided by Field Guides. Each participant is responsible for bringing appropriate clothing and equipment as recommended in our bulletins.

THE RECEIPT OF YOUR TOUR DEPOSIT SHALL BE DEEMED TO BE CONSENT TO THE ABOVE CONDITIONS. EACH TOUR PARTICIPANT AND EACH PARENT OR LEGAL GUARDIAN OF A TOUR PARTICIPANT WHO IS UNDER 18 SHALL SIGN AND DELIVER THE RELEASE AND INDEMNITY AGREEMENT AT THE TIME OF REGISTRATION.
