

ITINERARY

**COLOMBIA'S CLOUDFORESTS:
THE WESTERN AND CENTRAL ANDES**

November 4 - 13, 2022

The newly-named Chami Antpitta is endemic to the western Andes of Colombia. This species, and more than a dozen more, resulted from a split of the Rufous Antpitta in 2020. We got wonderful views of this charming bird in 2021. Photograph by guide Jesse Fagan.

We include here information for those interested in the 2022 Field Guides Colombia's Cloudforests: The Western & Central Andes tour:

- a general introduction to the tour
- a description of the birding areas to be visited on the tour
- an abbreviated daily itinerary with some indication of the nature of each day's birding outings

These additional materials will be made available to those who register for the tour:

- an annotated list of the birds recorded on a previous year's Field Guides trip to the area, with comments by guide(s) on notable species or sightings (may be downloaded from our website)
- a detailed information bulletin with important logistical information and answers to questions regarding accommodations, air arrangements, clothing, currency, customs and immigration, documents, health precautions, and personal items
- a reference list
- a Field Guides checklist for preparing for and keeping track of the birds we see on the tour
- after the conclusion of the tour, a list of birds seen on the tour

Colombia has seemed remote, but it has been open for business (again), certainly including the birding business, for more than a decade now. And yet the earth's most bird rich (over 1,950 species) country is just across a pond, that Caribbean pond, little farther away than Costa Rica and Panama. While "remote" suggests hardship, and there are some simple lodges and the challenges of birding in rainy regions, there is also ease and comfort—our gateways are cities of

millions served by major international airlines, and other good birding areas are located close to major cities with good facilities.

This tour is the southern half of our former Cauca Valley, Western and Central Andes tour, a ten-day departure, covering rich areas of both the Western and Central Andes over a 10,000' elevation span and a portion of the Cauca Valley, along the way encountering a stunning set of tropical birds, especially hummingbirds and tanagers.

One of the hummingbirds we'll be looking for is the Buffy Helmetcrest. This high-elevation specialist has a very small range in the paramo of Nevado del Ruiz in Los Nevados National Park. Photograph by guide Jesse Fagan.

In Colombia, the Andes are split into three long, north-south running cordillera separated by two deep valleys carrying the Rio Cauca and the Rio Magdalena. The valley of the Rio Cauca separates the Western and Central Andes and, in comparison with the valley of the Rio Magdalena, is narrow and slightly higher. The floor and lower slopes of the Cauca Valley are in a modest rainshadow in between the very wet Central Andes and the exceedingly wet Western Andes, the west slope of which is in the Choco, one of the five wettest areas in the world.

With a couple of exceptions, we are not really that interested in the Cauca Valley in the sense of the lowest, driest areas, as compared with the Andean slopes well above the valley floor. However, the valley will very much be a part of this tour, as we cross and re-cross it, and travel along 200 kms of its length, repeatedly seeing the effects of this biogeographic barrier.

There are no major difficulties with this tour, but there are a number of points that need to be considered carefully to determine if this tour is right for you. Some of this relates to basic facts about Colombia: The tourist infrastructure may not be as comfortable as in other tourist destinations, and habitat destruction endemic to this planet means it can be a long way between spots where threatened, endemic birds are to be found. The focus will be on the endemics and other specialties, but we will generally look for and at the widespread species because we like looking at birds and that is often what is in front of us.

All participants will be required to confirm they will have completed a full COVID vaccination course at least two weeks prior to the tour (which, for tours departing on or after March 1, 2022, includes a booster). Having a vaccinated group will greatly diminish but not eliminate the possibility of the group and individual participants being adversely affected by COVID-19. **We are requiring all of our staff guides to be vaccinated, including getting the booster.** Note too, that many travel destinations are or soon will be requiring proof of vaccination for entry to bypass testing delays or quarantine, and that entry requirements for a destination can change at any time. Proof of a booster shot, too, may become a requirement for some travel destinations if they choose to declare that vaccinations do not last indefinitely. And having a booster means your risk is lowered and your travel plans and those of our group are less likely to be disrupted.

We want to be sure you are on the right tour! Below is a description of the physical requirements of the tour. If you are concerned about the difficulty, please contact us about this and be sure to fully explain your concerns. We want to make sure you have a wonderful time with us, so if you are uncomfortable with the requirements, just let us know and we can help you find a better fitting tour! Field Guides will not charge you a change or cancellation fee if you opt out within 10 days of depositing.

Physical requirements of this tour

- **TRAILS & WALKING:** Good amounts of walking (up to 5 miles per day), along roadsides and trails, some of which will be muddy, and some of which will be steep and may have obstacles such as tree roots, rocks, or fallen trees. Rubber or neoprene boots and umbrella are necessary; walking sticks can be useful.
- **POTENTIAL CHALLENGES:** We drive for long periods several times on this tour. Participants should be able to step up (and step down) 10-12 inches to get into and out of our vehicles. Several lodgings are more basic or rustic. We spend part of one day at significant elevation (13,800 feet).
- **PACE:** After breakfast (often set for 5:00 a.m., sometimes earlier), we bird until lunch time. We sometimes pack a picnic lunch (or have one delivered), to extend our time in the field. Normally, weather permitting, we bird after lunch or continue traveling to our next destination. On occasion, we may take a siesta of several hours after lunch.
- **WEATHER:** Temperatures will range from the 60s F at night in higher elevations to the 90s F in valleys during the day. Rain showers, sometimes heavy, are likely, and humidity is high in some areas, especially in Choco.
- **ELEVATION:** We reach elevations of up to 13,800 feet on this tour and spend several nights at an elevation of about 7000 feet.
- **VEHICLE SEATING:** So that each participant has equal opportunity during our travel, we employ a seat rotation system on all tours. Participants will need to be flexible enough to maneuver to the back of the vehicle on occasion. Those who experience motion sickness will need to bring adequate medication for the duration of the tour, as we are not able to reserve forward seats for medical conditions.
- **BATHROOM BREAKS:** Participants should be prepared to make comfort stops in nature, as there are simply no other options (away from our lodgings) on many sections of this tour's route.
- **OPTING OUT:** Where we are staying multiple days in the same lodging, participants can opt to sit out a day or sometimes a half-day. This will not be possible on days when we are changing locations.

*We'll need to use high-clearance vehicles to access some of our birding sites, which means that participants must be able to get in and out. (Hopefully it will not be raining, though!)
Photograph by participant Greg Griffith.*

If you are uncertain about whether this tour is a good match for your abilities, please don't hesitate to contact our office; if they cannot directly answer your queries, they will put you in touch with the guide.

About the Birding Areas

Montane Choco—Be forewarned that one of the mountain ridges of the area translates as "Umbrella Mountain" and that this steep terrain is one of the wettest areas on Earth, with all of its correlates.

On this tour we will visit the **Pueblo Rico** area, where 4WD takes us around a mountain to a tiny community where a young family has converted their farmhouse into a simple, comfortable base at the edge of a spectacular mountain wilderness. An old track covers twelve hundred meters of elevation on forested **Cerro Montezuma**, which is at the base of Cerro Tatamá, a National Park. We expect to access the forest by 4WD. It can be wet; it probably will be wet. The accommodations and food will be simple. But Cerro Montezuma was described by two folks as "an incredible place to bird" and "the best place in highland Choco," and that is how we have found it. The bird list for Cerro Montezuma is replete with two species of *Bangsia* tanagers (Gold-ringed and Black-and-gold) and Black Solitaires; other species of interest include Cloud-forest Pygmy-Owl (we were lucky twice), Toucan Barbet, Orange-breasted and Scaled fruiteaters, Olivaceous Piha, the recently-described Tatama Tapaculo plus Narino and Choco, Buffy Tuftedcheek, Fulvous-dotted (Star-chested) Treerunner, Uniform Treehunter, Yellow-breasted Antpitta, Beautiful Jay, Golden-bellied (Choco) Warbler, Purplish-mantled Tanager, Black-chinned Mountain-Tanager, Indigo Flowerpiercer, Choco (Tricolored) Brushfinch, Olive Finch, Yellow-collared Chlorophonia, and a nice selection of hummingbirds (White-tailed Hillstar, Brown Inca, Empress Brilliant, Violet-tailed Sylph). If we make it to the top and it is not socked in, Munchique Wood-Wren and Chestnut-bellied Flowerpiercer can be found. Choco Vireo, Bicolored Antvireo, and Yellow-green Bush-Tanager are possible, but very difficult here.

Otun-Quimbaya Reserve: Pereira—We are going to an abandoned ash-tree plantation to be knee-deep in Cauca Guans (Endangered) and Red-ruffed Fruitcrows. Of course we promise nothing, but all past visits point to this being a great place to see both of these special species (an endangered cracid of limited distribution and a widespread spectacular that is an E-ticket bird). Although there is great habitat up to treeline, it is the accessible lower elevations (6300 feet; 1900m) here that will be the focus, looking for such endemics as Chestnut Wood-Quail (Near-Threatened; always tough, but common enough here that they can occasionally be seen crossing the track), Bar-crested Antshrike, Multicolored Tanager, and Crested Ant-Tanager. Plus, there are Moustached Antpittas out there, and, from mist-netting evidence, Hooded Antpitta is not uncommon (Vulnerable). Other fun birds: Sickie-winged Guan, Bronze-winged Parrot, Greenish Puffleg, Strong-billed Woodcreeper, Uniform Antshrike, Rufous-breasted Flycatcher, Bronze-olive Pygmy-Tyrant, Chestnut-breasted Wren, Black-billed Peppershrike, White-naped (Yellow-throated) Brush-Finch, and Yellow-bellied Siskin. The clearings have some appealing birds, from Scrub and Flame-rumped tanagers to Black-winged Saltator. And if it is small, orange, and striped, it is a wonderful Blackburnian Warbler! Our lodging here is in the park, offering plenty of rooms with private facilities and birds just out the door.

*The Dusky Piha is found in scattered locations in Colombia. This is an uncommon bird throughout its range, so we'll watch for this species when we visit the Rio Blanco Reserve.
Photograph by participant Greg DuBois.*

Rio Blanco Reserve: Manizales—Situated above the university town of Manizales, this is a gem. Although some of the lower slopes are forested, we are likely to concentrate on the upper part, around 8700 feet (2600m). However, concentration is difficult at 8700 feet because the reserve HQ is ringed with hummingbird feeders, and 50 hummingbirds at once on a drizzling day is absorbing, especially for photographers. Buff-tailed Coronets are common and unfortunately have recently come to dominate the scene, but there are usually also Tourmaline Sunangels, Speckled Hummingbirds, Green Violetears, Fawn-breasted Brilliants, and Long-tailed Sylphs, with a few Collared and Bronzy incas and White-bellied Woodstars; careful looking can reveal rarities such as Wedge-billed Hummingbird, or a Sword-billed out in the garden.

But walking up the track from the HQ offers much more in the forest, including such scarce and local Andean specialties as Tyrannine Woodcreeper, Flammulated Treehunter, Dusky Piha, Black-collared Jay, Masked Saltator, and White-capped Tanager. Rio Blanco has started an antpitta feeding program, and free worms may entice Brown-banded (endemic, Endangered) and Chestnut-crowned antpittas; Chestnut-naped, Slate-crowned, and the near-endemic Bicolored are much less often so enticed (and if the worms have been coming too easily, we may need to find all of them the old-fashioned way, in the forest). Throughout this, we will be listening and looking hard for Rusty-faced Parrot (local population *velezi*) (Vulnerable). Other interesting birds include Tawny-bellied Hermit, Black-billed Mountain-Toucan, Rufous-crowned Tody-Tyrant, Rufous-headed Pygmy-Tyrant, Rufous-breasted and Handsome flycatchers, Black-billed Peppershrike, and Golden-fronted Redstart. Plus, there are plenty of tanagers, such as three species of *Hemispingus* and Buff-breasted and Lacrimose mountain-tanagers.

Los Nevados—We will spend at least a morning around 12,000 feet (3600m) in a tiny portion of the huge Los Nevados National Park in the Central Andes. In treeline forest and scrub we will hope for, but not expect, the endemic Rufous-fronted Parakeet, which has been seen here, and finally by us in 2017. In this habitat we will hope for any of several erratic hummingbirds, such as Black-thighed and Golden-breasted pufflegs, Viridian Metaltail, and Rainbow-bearded Thornbill, all of which have been coming to spectacular new feeders since 2015, feeders that will hopefully endure. We will also try to dig out a Paramo Tapaculo, and look for the small mixed flocks that can include Black-backed Bush-Tanager and several mountain-tanagers. Moving higher into the paramo in places dominated by the fuzzy-leaved composite *Espeletia*, the particular quarry is Buffy Helmetcrest (*O. stubelii*); other species here are more widespread, such as Thick-billed Cinclodes, Andean Tit-Spintail, Many-striped Canastero (the bright subspecies *quindiana*), Tawny Antpitta, Brown-backed Chat-Tyrant, and Sedge (Grass) Wren.

Nature Reserve Manizales: Hotel Tinamú—Located just 40 minutes south of Manizales, this private reserve hosts over 260 species of birds, over 3 kilometers of nature trails, hummingbird feeders, and photography blinds. Some of the specialities for this site include Spectacled Owl, Green Hermit, Brown-throated Parakeet, Blue-lored Antbird, Scaled Antpitta, White-crowned Tapaculo, Black-tailed Flycatcher, Golden-collared Manakin, Speckle-breasted Wren, and Gray-headed Tanager. In addition, there is some overlap with other spots we will have visited on the tour, which gives us a good second chance for species like Grayish Piculet, Parker’s Antbird, Cinereous Becard, Moustached Puffbird, Colombian Chachalaca, Dwarf Cuckoo, Stripe-throated Hermit, Western Emerald, Spot-breasted Woodpecker, Spectacled Parrotlet, Great Antshrike, and Little Tinamou (among others!). The lodge has six large cabins (so we can’t guarantee a single here; however, as of 2019 they were constructing two more cabins) with private bathrooms, hot water, Wi-Fi, and an on-site restaurant.

This tour highlights some of the endemic and near-endemic birds of the Colombian Andes. This Purplish-mantled Tanager is found in small pockets primarily along the western slope in Colombia, although it may also range into parts of Ecuador. Photograph by guide Jesse Fagan.

Itinerary for Colombia’s Cloudforests: The Western & Central Andes

Day 1, Fri, 4 Nov. Arrival in Pereira. We recommend that you arrive one day early to ensure you meet the group at the at the airport at the designated time at 2 p.m. on November 4th. The group will then transferred to our hotel about an hour and fifteen minutes away. However, if you want to fly in on the official arrival day, then we recommend you book the following flight: **AA #1135 departing Miami (MIA) at 10:30 a.m. and arriving Pereira (PEI) at 1:16 p.m. (Subject to change.)** *It is essential that we have your flight information if you have not booked through us.* Night at the Hotel Kumanday in the village of La Florida.

Day 2, Sat, 5 Nov. Otun-Quimbaya; to Manizales. For our birding this morning we will transfer into 4x4 vehicles and venture down a seldom-driven track to the Otún-Quimbaya Sanctuary. While birding the entrance road and adjacent forest we will be watching for Cauca Guan, Red-ruffed Fruitcrow, Crested Ant-Tanager, and Multicolored Tanager, occasionally venturing into the understory in pursuit of a skulker. After lunch at the lodge we will return to Pereira for our drive north to the town of Manizales with possibly a birding stop en route at Camaguadua Reservoir and marsh in Chinchina. Night at Hotel Estelar Recinto del Pensamiento.

Day 3, Sun, 6 Nov. Los Nevados National Park. This morning we’ll take a highway out of Manizales and branch off into an edge of the vast Los Nevados National Park; we will check treeline forest and scrub, and then wonderful *Espeletia* paramo, with tanagers and hummingbirds—including Bearded Helmetcrest—among the best represented families. We

plan to have lunch at a refurbished hotel with some terrific hummingbird feeders before making an afternoon drive back to our hotel in Manizales. Night at Hotel Estelar Recinto del Pensamiento.

Day 4, Mon, 7 Nov. Rio Blanco. We will have a full day at the wonderful Rio Blanco reserve in the Central Andes above Manizales, hoping to see antpittas being fed, enjoying the hummingbird feeders and garden, and birding the little-traveled tracks for mixed flocks in the rich montane forests between 8,000 and 9,000'. After lunch we will have an afternoon drive to Tinamou Lodge. Night at Tinamou Lodge.

*Chestnut Wood-Quail is an uncommon endemic, but is fairly wide-spread in Colombia. Usually they are listed as "heard-only", but we will hope that they will come to a feeder, such as this trio seen on a recent tour.
Photograph by participant Wayne Whitmore.*

Day 5, Tue, 8 Nov. Hotel Tinamú; to Cerro Montezuma. We will have nearly a full morning birding the grounds of Hotel Tinamú. Targets here will include Blue-lored Antbird, White-crowned Tapaculo, Black-tailed Flycatcher, Golden-collared Manakin, and Speckle-breasted (Colombian) Wren, among others that we may have missed during the tour like Grayish Piculet, Parker's Antbird, Dwarf Cuckoo, and Great Antshrike. This site can be very productive. We will have another earlier lunch with a check-out of the hotel around midday, then drive south to Cerro Montezuma. On reaching Pueblo Rico, on a low crest of the Western Andes, we will switch to 4WD vehicle(s), and continue another hour to our base for three nights, Montezuma Rainforest Lodge, a small, rustic lodge, the simplest of the trip (mix of private and shared facilities; hot water), but a most hospitable place. It is at the base of wonderfully forested Cerro Montezuma and Tatama National Park. We should arrive in time for a first immersion in the hummingbirds at the lodge feeders, including Empress Brilliant and White-tailed Hillstar. Night at Cerro Montezuma (Montezuma Rainforest Lodge).

Day 6, Wed, 9 Nov. Cerro Montezuma. We'll have all day to spend on this forested mountain, and we will go as high as possible, which depends on road conditions (the track is periodically repaired and becomes passable for 4WD vehicles, as it has been the last four visits); if we cannot use 4WD, then we will at least reach middle elevations by horseback. Night at Cerro Montezuma (Montezuma Rainforest Lodge).

Day 7, Thu, 10 Nov. Cerro Montezuma. We have another day for the Montane Choco of the Western Andes. Assuming we have had a good day at higher elevations, we will concentrate on the lower slopes and a somewhat different suite of birds, again hoping to encounter as many mixed flocks as possible, as well as searching for skulkers. Night at Cerro Montezuma (Montezuma Rainforest Lodge).

Day 8, Fri, 11 Nov. Cerro Montezuma; to Buga. We will have another morning on Cerro Montezuma to find yet more specialties of the montane Choco. After an early lunch will return by 4WD to Pueblo Rico and continue by our small bus south and east down the Cauca Valley to the town of Buga. Depending on our time, we might stop at a dry forest site, El Vinculo, before checking into our hotel. Night at the Hotel Guadalajara in Buga.

Day 9, Sat, 12 Nov. Laguna de Sonso to Cali. We will start the morning at Laguna de Sonso (a.k.a. “the Buga marshes”), where many widespread species of heron, duck, and shorebird occur, along with Snail Kite, Wattled Jacana, several kingfishers, and a variety of landbirds, including Spectacled Parrotlet, and two Colombia endemics, Grayish Piculet and Apical Flycatcher. Leaving the area in the middle of the morning, we will journey south to the hummingbird feeders and patches of forest in the region of the famed “El 18” of the highway from the Cali to Buenaventura. We will look in particular for the endemic (and stunning) Multicolored Tanager, which could be part of mixed tanager flocks that include many other fabulous tanagers, and our morning should feature ten species of hummingbirds. We will end the day checking into our hotel in Cali and a final group dinner. Night in Cali.

Day 10, Sun, 13 Nov. We will check out of our hotel early. We will return to KM18, visiting two fincas with active feeders, for early morning birding which should be more active than yesterday’s afternoon outing. We will depart mid-morning from here and drive straight to the Cali airport. Do not schedule your afternoon departure for before 2 p.m. **We recommend the following flight on November 13: AA 920 departing Cali (CLO) at 2:01 p.m. and arriving Miami (MIA) at 5:55 p.m.** (All flights are subject to change.) *Que les vayan bien!*

About Your Guide

Jesse Fagan (a.k.a. the Motmot or just “Mot”) has been passionate about birds since his teens, when he had an encounter with a flying Pileated Woodpecker. He has birded throughout the United States, including spending seven years in Texas, and since 1995 has been birding and for a time living in northern Central America. He is a co-author of the recently published [*Peterson Field Guide to Birds of Northern Central America*](#) (Houghton Mifflin Harcourt, 2016), a field guide to the region, which includes the countries of Guatemala, El Salvador, Honduras, and Belize.

In addition, Mot has birded in or led tours to Mexico, Costa Rica, Panama, Colombia, Ecuador, Venezuela, Peru, Brazil, Australia, New Zealand, Spain, Sweden, France, Morocco, and Madagascar. He also enjoys leading many of the Field Guides tours in the Caribbean. He likes to think he can bird anywhere at any time and still show you the birds, but most importantly, a good time. Jesse holds a B.S. and an M.S. in mathematics from Texas Tech University. He is currently living in Lima, Peru.

“Jesse Fagan is a first-rate guide, combining a great ear and eyes with a congenial personality. He manages the group well while being fun to be with. His organization skills matched his birding skills.” C.B.; Peruvian Rainforests of the Tambopata

Visit <https://fieldguides.com/our-staff/> for Jesse’s complete tour schedule; just click on his photo.

Financial Information

FEE: \$4,575 from Pereira

DEPOSIT: \$450 per person

FINAL PAYMENT DUE: May 28, 2022

SINGLE SUPPLEMENT (Optional): \$400 [*singles are not guaranteed at Montezuma Rainforest Lodge (Days 5-7)*]

LIMIT: 8

Special Note: Tour fees may be subject to change due to the global economic effects of COVID-19.

We have published the itinerary and price for this tour with the understanding that during these uncertain times we are likely to encounter unforeseen changes. Some of our tours may incur higher costs due to increases in currency exchange rate fluctuations or COVID-19 related fees imposed by countries and/or suppliers. Travel and hospitality companies all over the world have been adversely affected by the pandemic, and there is no guarantee that all of the lodging and transportation we have booked for this tour will still be available at the time of departure. We hope to maintain our services as indicated in our itinerary as well as our published tour fee. However, if changes are required we will make every effort to maintain the quality of the itinerary as it is published with the most appropriate substitutions available. Should any

necessary changes or other unforeseen causes result in an increase in service rates to us, we reserve the right to pass on those increases in fees to the tour participant.

Other Things You Need to Know

TOUR MANAGER: The manager for this tour is Nicole Cannon. Nicole will be happy to assist you in preparing for the tour. If you have any questions, please don't hesitate to call her!

ACCOMMODATIONS: Montezuma Rainforest Lodge (Cerro Montezuma, three nights) consists of simple rural buildings, improved for tourists, with some private and some shared facilities (again, singles not guaranteed). The accommodations are simple, but overall sufficient, thanks to the hospitality of our hosts, making it possible to stay in a wild and wonderful place. In Nov 2018 & 2019, they had Wi-Fi at this lodge. Our lodging near Otun-Quimbaya is more like a simple hotel with private facilities. Hotel Tinamú is a comfortable lodge with hot water and Wi-Fi. Hotels in larger cities are good (like Manizales) and with all the modern conveniences.

The food is good, fairly basic, and hearty. During recent trips individual health was fine. At the lodges the menu will be fixed. While vegetarian fare is available, it isn't very diverse. At restaurants in the larger cities and hotels, the usual choices are available, but we may try to optimize time with fewer options. Breakfasts tend to be a weak point, but sufficient.

A NOTE ON ALTITUDE: We will have one morning at 10,000 to 13,000 feet at the end of the tour; prior to that we will have two days birding at 7,000-8,500' and several others at 5,000-7,000'. We will take our time at the higher elevations.

DOCUMENTS: A current passport, valid six months beyond the date of your return, is necessary for US citizens to enter Colombia. If you are not a US citizen, please check with the Colombian consulate nearest you for entry requirements. Information about consulates and entry requirements is generally available online or you can contact us and we will be happy to look this up for you. Passports should have an adequate number of blank pages for the entire journey. Some countries require a blank page for their stamp and as a precaution it is best to have one blank page per country you will visit or transit.

AIR ARRANGEMENTS: ***Please note that the tour begins in Pereira and ends in Cali.*** We recommend that you arrive one day early to ensure you meet the group the next day at the designated time at 2 p.m. on November 4th. However, if you want to fly in on the official arrival day, then we recommend you book the following flight: **AA #1135 departing Miami (MIA) at 10:30 a.m. and arriving Pereira (PEI) at 1:16 p.m. (Subject to change.)** You will be picked up at the airport (It is essential that we have your flight information if you have not booked through us.) and transferred to our hotel about an hour and fifteen minutes away. We will depart mid-morning on **November 13th** and drive straight to the Cali airport. ***Do not schedule your afternoon departure for before 2 p.m.*** We recommend the following flight on **November 13: AA 920 departing Cali (CLO) at 2:01 p.m. and arriving Miami (MIA) at 5:55 p.m.** (All flights are subject to change.)

Field Guides is a full service travel agency and your tour manager will be happy to assist you with flights to join this tour. Field Guides does not charge a service fee for these services to clients booking a tour. However, we understand that tech-savvy clients often prefer to shop online or that you may wish to use mileage to purchase tickets. Regardless of which method you choose, your tour manager will be happy to provide assistance regarding ticket prices and schedules, along with rental cars and extra hotel nights as needed.

Please be sure to check with your tour manager prior to purchasing your ticket to make sure the flights you have chosen will work well with the tour itinerary and that the tour is sufficiently subscribed to operate. Once purchased, most airline tickets are non-refundable and carry a penalty to change. Field Guides cannot be responsible for these fees.

Also, it is imperative that we receive a copy of your comprehensive flight itinerary—including any and all flights not covered in the tour fee—so that we may track you in the event of missed connections, delays, or other mishaps.

LUGGAGE: Please be aware that many airlines have recently modified their luggage policies and are charging additional fees for checked bags. Updates could easily occur before your departure, so you may wish to contact your airline to verify the policy. Additional charges for bags on any flights, whether these are covered by the tour fee or not, will be the client's responsibility. **Please limit your luggage to one medium-sized duffel or suitcase and a carry-on.** This will allow for ease of movement and wear-and-tear on your guide's back. Laundry is available at several hotels and lodges.

TOUR INCLUSIONS/EXCLUSIONS: The **tour fee** is **\$4,575** for one person in double occupancy from Cali. It includes all lodging from Day 1 through Day 9, all meals from breakfast on Day 2 through lunch on Day 10, all ground transportation, entrance fees, and the guide services of the tour leader. Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

The above fee does not include your airfare to and from Colombia, airport taxes, visa fees, any checked or carry-on baggage charges imposed by the airlines, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

The **single supplement** for the tour is **\$400**; singles may not be available all nights. If you do not have a roommate but wish to share, we will try to pair you with a roommate from the tour; but if none is available, you will be billed for the single supplement. Our tour fees are based on double occupancy; one-half the cost of a double room is priced into the tour fee. The single supplement is calculated by taking the actual cost of a single room and subtracting one-half the cost of a double room (plus any applicable taxes).

TOUR LIMITS: Our limits are firm and we don't exceed the limit by one to accommodate a couple when only one space remains open. However, on occasion, we will send along a guide in training on a tour. In these cases, the guide in training will be taking a seat in the van or bus. Our guides will have a rotation system within the vehicle so that clients share the inconvenience equally. We hope this minor inconvenience will be more than offset by the advantages of having another guide along.

TOUR REGISTRATION: To register for this tour, please [contact our office](#). Our office will be in touch with you by email by the next business day (Mon-Fri) with instructions on how to complete our new electronic registration form and medical questionnaire. (We are no longer accepting the paper version.)

Please mail your **deposit of \$450** per person, or see our Payment Options at <https://fieldguides.com/payment-options/>. **Full payment** of the tour fee is due 160 days prior to departure, or **by May 28, 2022. We will bill you for the final payment at either 160 days or when the tour has reached sufficient subscription to operate, whichever date comes later.**

Please note that if you are traveling on a tour **outside your country of domicile** (for example, outside the US for US residents), we will require **proof of travel insurance**. Since the cost of your trip insurance and airline tickets is generally non-refundable, please do not finalize these purchases until you have received final billing for the tour or have been advised that the tour is sufficiently subscribed to operate by your tour manager.

SMOKING: Almost all of our clients prefer a smoke-free environment. If you smoke, please be sensitive to the group and refrain from smoking at meals, in vehicles, and in proximity to the group on trails and elsewhere.

CANCELLATION POLICY: FOR 2022 TOURS: Refund of deposit and payment, less \$100 handling fee, will be made if cancellation is received up to 160 days before departure. If cancellation occurs between 159 and 70 days before the departure date, 50% of the tour fee is refundable. Thereafter, all deposits and payments are not refundable and non-transferable. **FOR 2023 TOURS & BEYOND:** Note that beginning in 2023, the 50% refund period will become 179 to 90 days before departure, with no refund thereafter.

Our cancellation policy only applies to payments made to Field Guides for tour (and any services included in those fees). Airline tickets not included in the tour fee and purchased separately often carry penalties for cancellation or change, or are sometimes totally non-refundable. Additionally, if you take out trip insurance the cost of that insurance is not refundable, so it is best to purchase the policy just prior to making full payment for the tour or at the time you purchase airline tickets, depending upon the airline's restrictions.

The right is reserved to cancel any tour prior to departure. In most such cases, full refund will constitute full settlement to the passenger. Note this exception, however: If you have been advised pre-tour that there is a non-refundable portion of your tour fee no matter the reason for Field Guides cancellation of the tour, that portion will not be refunded. The right is reserved to substitute in case of emergency another guide for the original one.

TRIP CANCELLATION & MEDICAL EMERGENCY INSURANCE: We strongly recommend you consider purchasing trip cancellation (including medical emergency) insurance to cover your investment in case of injury or illness to you or your family prior to or during a trip. If you are traveling on a tour **outside your country of domicile** (for example, outside the US for US residents), we will **require proof of travel insurance**. Because we must remit early (and substantial) tour deposits to our suppliers, you acknowledge and agree that we will not issue a refund when cancellation occurs within 70

days of departure, and only a partial refund from 70 to 159 days prior to departure (see CANCELLATION POLICY). In addition, the Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. US medical insurance plans seldom cover health costs incurred outside the United States unless supplemental coverage is purchased. Furthermore, US Medicare and Medicaid programs do not provide payment for medical services outside the United States.

When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the United States may cost well in excess of \$50,000. Uninsured travelers who require medical care overseas often face extreme difficulties. When consulting with your insurer prior to your trip, please ascertain whether payment will be made to the overseas healthcare provider or whether you will be reimbursed later for expenses that you incur.

US citizens will receive information from us regarding optional tour cancellation/emergency medical insurance. Our agent, CSA, will insure for trip cancellation and interruption, medical coverage, travel delay, baggage loss and delay, and emergency medical transportation. If you purchase the insurance prior to, or within 24 hours of making final payment for the tour, and cover all non-refundable parts of the trip (including any non-refundable flights and in some cases, other arrangements), pre-existing conditions are covered. You may purchase your CSA policy on-line by visiting our website at <https://fieldguides.com/trip-cancellation-insurance/> and clicking the link to CSA. The CSA webpage also includes a contact number.

Currently we are unable to offer CSA insurance policies to residents of New York and Hawaii. We have had clients provide positive feedback after acquiring insurance thru InsureMyTrip (<https://www.insuremytrip.com/>) in the past, and would suggest that company as an alternative. When purchasing insurance with a company other than CSA, you will want to understand whether the timing of your purchase will affect coverage before paying your first deposit. Insurance purchase requirements can vary from company to company, and such requirements could limit your options if you do not look into this until making your final payment for your tour. Please let us know if you have any questions about this.

Please note, once the insurance is purchased it is non-refundable, so please check with your tour manager prior to making the purchase to assure the tour will operate as scheduled. Citizens of other countries are urged to consult their insurance broker.

RESPONSIBILITY: For and in consideration of the opportunity to participate in the tour, each tour participant and each parent or legal guardian of a tour participant who is under 18 agrees to release, indemnify, and hold harmless Field Guides Incorporated, its agents, servants, employees, shareholders, officers, directors, attorneys, and contractors as more fully set forth in the Release and Indemnity Agreement on the reverse side of the registration form. Field Guides Incorporated acts only as an agent for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, airplane, or other means, and assumes no liability for injury, damage, loss, accident, delay, or irregularity caused by defect in such vehicles or for any reason whatsoever, including the acts, defaults, or bankruptcies of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. You acknowledge and agree that Field Guides Incorporated is not responsible for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. The tour participant shall bear all such losses and expenses. Field Guides Incorporated reserves the right to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. Field Guides Incorporated reserves the right to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely.

Participants should be in good health and should consult a physician before undertaking a tour. If you have questions about the physical requirements of a tour, please contact our office for further information. Participants should prepare for the tour by reading the detailed itinerary, the information bulletin, and other pertinent matter provided by Field Guides. Each participant is responsible for bringing appropriate clothing and equipment as recommended in our bulletins.

THE RECEIPT OF YOUR TOUR DEPOSIT SHALL BE DEEMED TO BE CONSENT TO THE ABOVE CONDITIONS. EACH TOUR PARTICIPANT AND EACH PARENT OR LEGAL GUARDIAN OF A TOUR PARTICIPANT WHO IS UNDER 18 SHALL SIGN AND DELIVER THE RELEASE AND INDEMNITY AGREEMENT AT THE TIME OF REGISTRATION.
