

ITINERARY  
**COLOMBIA'S CENTRAL ANDES:**  
***The Wild, Wonderful North***  
*June 27 – July 8, 2026*

*The Red-bellied Grackle is found in only a few specialized localities in Colombia. We'll look for them above Medellín and near Jardín. Photograph by guide Richard Webster.*

*We include here information for those interested in the 2026 Field Guides Colombia's Central Andes: The Wild, Wonderful North tour:*

- a general introduction to the tour
- a description of the birding areas to be visited on the tour
- an abbreviated daily itinerary with some indication of the nature of each day's birding outings

*These additional materials will be made available to those who register for the tour:*

- an annotated list of the birds recorded on a previous year's Field Guides trip to the area, with comments by guide(s) on notable species or sightings (may be downloaded from our website)
- a detailed information bulletin with important logistical information and answers to questions regarding accommodations, air arrangements, clothing, currency, customs and immigration, documents, health precautions, and personal items
- a Field Guides checklist for preparing for and keeping track of the birds we see on the tour
- after the conclusion of the tour, a list of birds seen on the tour

**T**rying to come up with fresh adjectives to describe the birding in the country with the world's longest list is not easy, nor is capturing it in itineraries that will be perfect for everyone. **What we have done is take our 17-day survey of the Cauca Valley and the Western and Central Andes and divide it into two shorter tours, visiting many of the same places while adding a few new ones.** These shorter itineraries take advantage of direct flights from the U.S. to Colombia, which is a short flight across the Caribbean.

As for the adjectives, "juicy" is really obvious, but it is also right on target. This tour is going to be fun, visiting a terrific variety of birdy forests with really juicy birds, many of them endemics in remote regions of the Western and Central Andes. While "remote" suggests hardship, and there are some simple lodges and the challenges of birding in rainy regions, there is also ease and comfort—our gateway is a city of millions served by major international airlines. And good birds are not always remote birds—one of the classiest endemics of Colombia, the Red-bellied Grackle, occurs in the hills above Medellín. It is also a list that is still growing, with Antioquia Wren described from the Cauca Valley since we started the tour, and a rediscovery of the Antioquia Brushfinch. Colombia is well known to Field Guides clients, and **if you are looking for a single-visit sampler, this 12-day itinerary traverses almost 10,000' (3000m) of elevation and two of its cordilleras, crossing two major river valleys (the Río Medellín and Cauca River), in pursuit of a dazzling variety of tropical birds.**

*The White-mantled Barbet is another Colombian endemic we'll seek. Photograph by participant Kevin Watson.*

In Colombia, the Andes are split into three long, north-south running cordillera separated by two deep valleys carrying the Rio Cauca and the Rio Magdalena. The valley of the Rio Cauca separates the Western and Central Andes and, in comparison with the valley of the Rio Magdalena, is narrow and slightly higher. The floor and lower slopes of the Cauca Valley are in a modest rainshadow between the very wet Central Andes and the exceedingly wet Western Andes, the west slope of which is in the Choco, one of the five wettest areas in the world.

There are no major difficulties with this tour, but there are a number of points that need to be considered carefully to determine if this tour is right for you. Some of this relates to basic facts about Colombia: The tourist infrastructure is a little basic, but very much adequate, and habitat destruction endemic to this planet means it can be a long way between spots where threatened, endemic birds are to be found.

*The focus will be on the endemics and specialties*, although at times we will pursue the widespread, because in this taxonomic climate, even the widespread can become very interesting. And we will generally look at the widespread species because we like looking at birds, and that is often what is in front of us. Still, this is just to say that there is an emphasis on what makes Colombia unique.

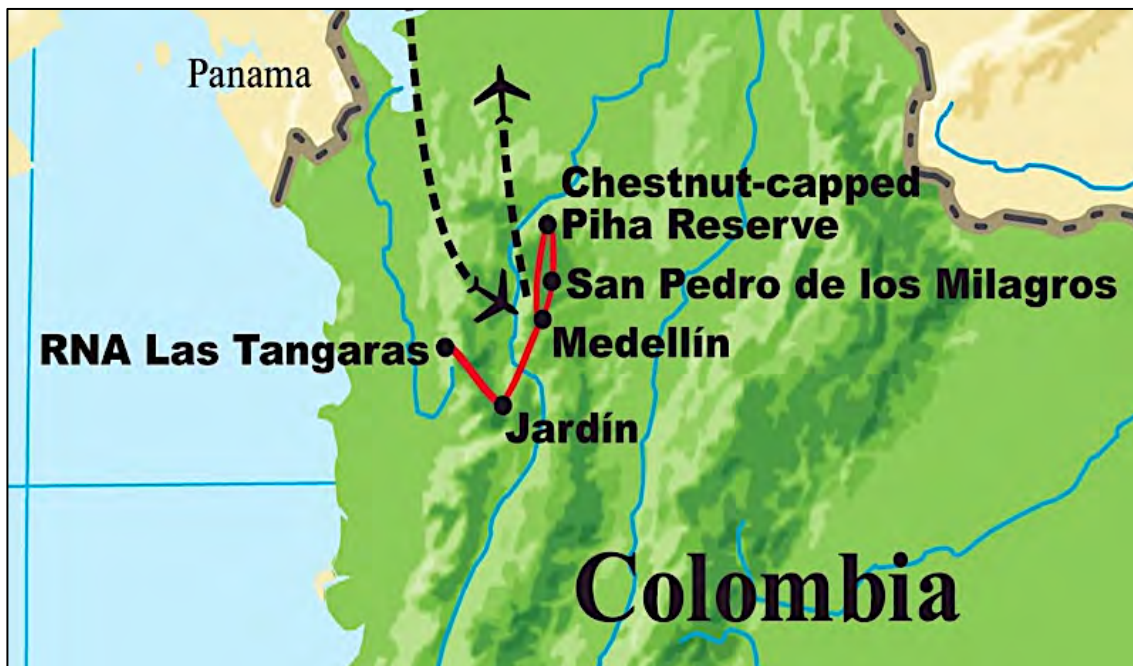

This tour involves a moderate amount of driving. Still, a fingernail length on the map is, in the Andes, a half-day of driving. The countryside is interesting, and while the environment is generally greatly disturbed, in comparison with many countries, there are actually fewer areas that are devastated: There are large trees or riparian corridors or patches of substantial secondary growth. The pros and cons are that when we travel, that is really all we do—little roadside birding, few stops to check out birds; and when we bird, we are immersed in birding on trails and tracks as close to the wild as we can be, escaping from the bustle of the roadside and cities.

We want to be sure you are on the right tour! Below is a description of the physical requirements of the tour. If you are concerned about the difficulty, please contact us about this and be sure to fully explain your concerns. We want to make sure you have a wonderful time with us, so if you are uncomfortable with the requirements, just let us know and we can help you find a better fitting tour! Field Guides will not charge you a change or cancellation fee if you opt out within 10 days of depositing.

## Physical requirements of this tour

- **TRAILS & WALKING:** Good amounts of walking (up to 5 miles per day), along roadsides and trails, some of which will be flat, some of which will be somewhat steep, uneven, and muddy, with obstacles such as rocks or tree roots. Walking sticks are useful.
- **POTENTIAL CHALLENGES:** We do drive for long periods several times on this tour. Participants should be able to step up (and step down) 10-12 inches to get into and out of our vehicles, whether small buses, vans, 4x4 Land Rover-style vehicles, or (in two locations) old “Willies” or coffee jeeps, which require climbing in the back and hanging on! Several roads are rough, and although we drive slowly, there is still a fair bit of bouncing around. Electricity can be intermittent away from Medellín (portable chargers are useful).
- **PACE:** After breakfast (a few as early as 4:30 a.m., usually at 5:00 a.m.), we bird until lunch time. We sometimes pack a picnic lunch to extend our time in the field. Normally, weather permitting, we bird after lunch or continue traveling to our next destination. On occasion, we may take a siesta of several hours after lunch.
- **WEATHER:** Temperatures will range from the low 50s at night in higher elevations to the 90s F in valleys during the day. Rain showers are likely.
- **ELEVATION:** We reach elevations of up to 10,000 feet on this tour and spend several nights at an elevation of 6,000 feet. [Las Tangaras lodge is 5000 ft, Jardín is 6,000 ft.]
- **VEHICLE SEATING:** So that each participant has an equal opportunity during our travel, we employ a seat rotation system on all tours. Participants will need to be flexible enough to maneuver to the back of the vehicle on occasion. Those who experience motion sickness will need to bring adequate medication for the duration of the tour, as we are not able to reserve forward seats for medical conditions.
- **BATHROOM BREAKS:** Participants should be prepared to make comfort stops in nature, as there are simply no other options (away from our lodgings) on many sections of this tour’s route.
- **OPTING OUT:** Where we are staying multiple days in the same lodging, participants can opt to sit out a day or sometimes a half-day. This will not be possible on days when we are changing locations.

*If you are uncertain about whether this tour is a good match for your abilities, please don’t hesitate to contact our office;* if they cannot directly answer your queries, they will put you in touch with one of our guides.

*We'll visit a ProAves reserve known as Las Tangaras, where we'll look for cloud forest specialties, among others.  
Photograph by guide Jesse Fagan.*

## About the Birding Areas

**Jardin and the Reserva Natural de las Aves Loro Orejiamarillo**—We will use a very nice country hotel above the mountain resort town of Jardin as our base to visit the Yellow-eared Parrot reserve. The reserve is on a ridge above town and requires 4WD to reach. We will need to be up at 10,000 feet (3000m) early in order to maximize our chances for the Yellow-eared Parrot (Critically Endangered), which commutes from roost sites to feeding areas (a socked-in morning is the biggest threat to success). This parrot, which resembles a small macaw, has been the subject of recent conservation efforts that have increased its population through nest boxes and education efforts aimed in part at preserving the wax palms (heavily used in religious ceremonies on Palm Sunday) on which the species is partly dependent. The population is now around 1500 in Colombia, and it is almost certainly extirpated from Ecuador. The sooner and better our success with the parrot, the more birding we can do in the forest patches down the mountain, which is also where we occasionally have the best views of Yellow-eared Parrot, if we are lucky enough to find a feeding flock. Specialties and special challenges in the forest patches include Black-billed Mountain-Toucan, skulkers like Ocellated Tapaculo and several antpittas, Chestnut-crested Cotinga (rare), Black-collared Jay, the *richardsoni* form of Citrine Warbler, Golden-fronted Redstart (Whitestart), White-capped and Golden-crowned tanagers, and Tanager Finch (skulking). While looking for those, we could encounter either the Crested or Golden-headed quetzal, and mixed flocks will include a number of flycatchers, warblers, tanagers, mountain-tanagers, and flowerpiercers. Dusky Starfrontlet has been reported here, but not often, and not (yet!) by us, but we should see a number of other hummingbirds, including Tourmaline Sunangel, Collared Inca, and Mountain Velvetbreast, and Sword-billed Hummingbird is possible. We will have information from local contacts on the best current spots for the parrot and the locations in which to search for other specialties. Warning: This can be a very wet spot! Which is why there is all that lovely forest!

Our visit to Jardin will also include a visit to a fabulous lek of Andean Cock-of-the-Rock where a private land owner has provided access to these spectacular birds, almost on the edge of town!

**Montane Choco**— On this tour, we will visit **RNA Las Tangaras**, the ProAves reserve west of Jardin. It features a good trail through lovely cloud forest, with additional birding and feeders along a little-used dirt road. The bird list of this area is replete with the endemic Black-and-gold Tanager and Black Solitaire; other species of interest include Cloud-forest Pygmy-Owl (we were lucky to see it twice), Toucan Barbet, Orange-breasted Fruiteater, Olivaceous Piha, Tatamá (described in 2017) and Narino tapaculos, Beautiful Jay, Buffy Tuftedcheek, Fulvous-dotted (Star-chested) Treerunner, Uniform Treehunter, Purplish-mantled, Glistening-green, Rufous-throated, and Silver-throated tanagers, Black-chinned

Mountain-Tanager, Crested Ant-Tanager, Indigo Flowerpiercer, Choco (Tricolored) Brushfinch, Yellow-collared Chlorophonia, and a nice selection of hummingbirds (White-tailed Hillstar, Brown Inca, Empress Brilliant, Violet-tailed Sylph, Velvet-purple Coronet). On our first visit, we looked for the canopy-loving Choco Vireo and did not find it, but we have connected with this canopy speck on our latest forays. Mixed flocks may include Yellow-vented Woodpecker, Handsome and Ornate flycatchers, Variegated and Marble-faced bristle-tyrants, Red-faced Spinetail, and Rufous-naped Greenlet. We can expect to hear a number of skulkers, such as the tapaculos, Yellow-breasted and Ochre-breasted antpittas, Chestnut-breasted and Sooty-headed wrens, and Olive Finch, and where there is a good spot, we will try to see them. Depending on our success (especially as it relates to the weather), we will likely have time to try a different road that reaches slightly higher elevations where Munchique Wood-Wren and Tanager Finch occur, but we will concentrate on specialties of RNA Las Tangaras first.

*Stile's Tapaculo is a Colombian endemic that we'll look for at the Chestnut-capped Piha Reserve.  
Photograph by participant Joshua Horner.*

**San Pedro de los Milagros**—This small town, located in the Western Cordillera at 2,600 meters above sea-level and about 1 hour from Medellín, is the type locality for the virtually unknown Antioquia Brush-finch (*Atlapetes blancae*). This species was only described formally in 2007 by Thomas Donegan, based on three museum specimens, the last dated from 1971. The species was thought to be extinct (with expeditions failing to find it in 2007 and 2008) until it was recently rediscovered in 2018 near the type locality at San Pedro de los Milagros. The area around San Pedro de los Milagros has been heavily modified for dairy farming and agriculture. Remaining forest patches protect the few individuals of this species that still exist. We will visit one of them with our talented local guide.

**Chestnut-capped Piha Reserve**—Located approx. 4 hours north of Medellín in the foothills of the Central Cordillera, this 1000-hectare reserve protects the Critically Endangered Colombian endemic, Chestnut-capped Piha (*Lipaugus weberi*). This species was discovered as recently as 1999 and described formally in 2001. Localized to pristine foothill forest, this species does not tolerate fragmentation, making it particularly susceptible to habitat alterations. Population estimates range from 250 to 2,500 individuals based on habitat requirements. In addition to the piha, this reserve hosts a number of Colombian endemics and specialties, including Chestnut Wood-Quail, Red-bellied Grackle, Stile's Tapaculo, Black-and-gold Tanager, Multicolored Tanager, Parker's Antbird, Bicolored Antwren, and Scaled Fruiteater. Elevations range from 1,200 to 1,800 meters above sea-level.

*The Chestnut-capped Piha is found in only a few specialized localities in Colombia. One of these is the ProAves Chestnut-capped Piha Reserve, which protects a population of this critically endangered endemic. Photograph by participant Kevin Watson.*

## Itinerary for Colombia's Central Andes: The Wild, Wonderful North 2026

**Day 1, Sat, 27 Jun. Arrival in Medellín.** Flights on several international carriers are available to Medellín; check with your tour manager, Nicole Cannon, for the best flight available from your home. If you need a luggage cart, have a couple of dollar bills handy as you enter the luggage area; you can change money at the bank just before you exit the customs area to the outside. You will be picked up at the airport (we must have your flight information if you have not booked through us) and transferred to our Medellín hotel, located only about 10 minutes from the airport in the small community of Rionegro on a mesa outside of Medellín. If something goes awry, a local taxi costs under \$5, and we will reimburse you. Night in Rionegro/Medellín.

**Day 2, Sun, 28 Jun. El Palacio de los Frijoles.** We will bird the site of El Palacio de los Frijoles, about 1h 30m from our hotel, for a full morning and have lunch nearby. We have the possibility of finding a couple of Colombian endemics here, including White-mantled Barbet and Beautiful Woodpecker. We will have lunch nearby, then return to the hotel in the afternoon. Night in Rionegro/Medellín.

**Day 3, Mon, 29 Jun. To Jardín.** We will have breakfast in the hotel, then pack up and depart for the picturesque town of Jardín, located about 4 hours south of Rionegro/Medellín. We will plan to have lunch in the town, check into our hotel, then spend some time birding near town (possibly visiting sites for Andean Cock-of-the-Rock and Red-bellied Grackle). Night in Jardín.

**Day 4, Tue, 30 Jun. Jardín.** Yellow-eared Parrot, like a small macaw, is the special goal for which we will take 4WDs to almost 10,000' (3,000m), birding a small pass and the basin behind it at dawn (leaving around 5 a.m.), and then drive back down the road birding large patches of forest, returning to our hotel in the late afternoon, having had a picnic breakfast and lunch. Night in Jardín.

**Day 5, Wed, 1 Jul. To RNA Las Tangaras.** We will start with breakfast on the lovely town square and then depart for our destination of RNA Las Tangaras. We might make some birding stops en route, certainly for bathrooms in the town of

Bolivar (and maybe day-roosting Spectacled Owls!). Soon after leaving Bolivar, we will cross a low pass in the Western Andes, arriving at the ProAves reserve, RNA Las Tangaras, and our lodge for the next three nights. Our plan will be to lunch here, then bird the grounds and nearby forest patches in the afternoon. Night at Las Tangaras.

**Days 6-7, Thu-Fri, 2-3 Jul. RNA Las Tangaras.** We will have two full days to visit the reserve, which is located a half-hour by 4WD from the lodge on a little-traveled road. Patches of cloud forest along the road are excellent for many birds of the montane Choco, but we will concentrate on a good, level trail that has already been constructed in the stunning mossy forest, and try any newer trails as well. Depending on the weather/our results, on the second day we may also try a nearby road that offers slightly higher elevations. Our routine here will involve pre-dawn breakfasts, e.g., at 5:15 a.m., a drive to the habitat, potentially a picnic lunch brought to us by the lodge on a trail, and dinner at the lodge. Nights at Las Tangaras.

**Day 8, Sat, 4 Jul. To San Pedro de los Milagros.** We will plan on departing Las Tangaras after breakfast, with some birding stops and lunch, and depart in the afternoon for San Pedro de los Milagros. We will either stay in the city center or below the town, closer to Medellín (about 45 minutes away). We will arrive in the late afternoon and get settled into our hotel for the night. Night in San Pedro de los Milagros.

*The aptly-named Beautiful Woodpecker is a species we'll watch for at El Palacio de los Frijoles.  
Photograph by guide Richard Webster.*

**Day 9, Sun, 5 Jul. San Pedro de los Milagros, to the Chestnut-capped Piha Reserve.** This morning, we will concentrate on finding the virtually unknown and extremely rare Antioquia Brush-finch (*Atlapetes blancae*). We will journey to a small forest patch with our local guide above the town and spend several hours here in search of this rare bird. We will have lunch *en route* to the Chestnut-capped Piha Reserve, arriving to the reserve in the afternoon (a drive of about 4 hours). Night in the Chestnut-capped Piha Reserve.

**Day 10, Mon, 6 Jul. Chestnut-capped Piha Reserve.** We will have a full day at the Chestnut-capped Piha Reserve to explore the pristine forest at different elevations within the 1,000-hectare preserve. This will be a long day with an early breakfast and a possible picnic lunch, returning in the afternoon to the lodge. We will be hiking on forest trails for several hours. Important birds we may find include the piha, Red-bellied Grackle, Stile's Tapaculo, Black-and-gold Tanager, and Multicolored Tanager. Night at Chestnut-capped Piha Reserve.

**Day 11, Tue, 7 Jul. Chestnut-capped Piha Reserve to Rionegro.** We will have a leisurely breakfast with some birding on the grounds of the lodge, then depart for Rionegro. We will plan on a couple of birding stops en route and lunch near Medellín, arriving to our airport hotel in the mid-afternoon. Night in Rionegro/Medellín.

**Day 12, Wed, 8 Jul. Departure for home.** Breakfast is included at the hotel. Participants may plan to depart out of Medellín at any time today.

## About Your Guide

**Jesse Fagan** (a.k.a. the Motmot or just "Mot") has been passionate about birds since his teens, when he had an encounter with a flying Pileated Woodpecker. He has birded extensively throughout North America and in 2016 published the [Peterson Field Guide to Birds of Northern Central America](#) (Houghton Mifflin Harcourt) with co-author Oliver Komar and illustrators Robert Dean and Peter Burke. In addition, Mot has experience in many other areas of Central and South America, Europe, and Africa. He likes to think he can bird anywhere at any time and still show you the birds, but most importantly, a good time.

Jesse holds a B.S. and an M.S. in mathematics from Texas Tech University. He is currently living in Lima, Peru with his wife, Rocio.

*"Jesse is a fantastic guide. He really knows calls, infinitely patient in getting everyone on the difficult birds, fun to be with." L. F. Colombia: Bogotá, the Magdalena Valley, and Santa Marta.*

Visit <https://fieldguides.com/our-staff/> for Jesse's complete tour schedule; just click on his photo.

## Financial Information

**FEE: \$6375 from Medellín**

**SINGLE SUPPLEMENT (Optional): \$475** [Note: singles may not be available all nights]

**DEPOSIT: \$650** per person

**FINAL PAYMENT DUE:** December 29, 2025

**LIMIT: 8**

## Other Things You Need to Know

**TOUR MANAGER:** The manager for this tour is Nicole Cannon. Nicole will be happy to assist you in preparing for the tour. If you have any questions, please don't hesitate to call her!

**ACCOMMODATIONS:** At two places, we will stay at reserve lodges that are simple and small, with private facilities; singles are not guaranteed. Our airport hotel is a standard facility that is just ten minutes from the airport. Our other hotels are like nice "country hotels" in suburban or rural settings; the hotel in San Pedro de los Milagros is in a bustling town, so earplugs might be useful (we are here just one night).

The food is good, and individual health has been fine. At the lodges, the menu will be fixed. While vegetarian fare is available, it isn't diverse. At restaurants in the larger cities and hotels, the usual choices are available.

**A NOTE ON ALTITUDE:** We will have one day of birding at near 10,000 feet (3000m) above Jardin and probably one day to 9000 feet (2700m) above Las Tangaras; the rest of the tour will be below or around 7,500' ("foothill" elevation). We will take our time at the higher elevations.

**DOCUMENTS:** Be sure to verify the latest entry requirements for each country you will visit or transit.

**Passport:** A current passport is required for international travel. It should be in good condition, valid for at least 6 months beyond your return date, and have at least one blank page for each country on your itinerary.

**Visa:** U.S. and Canadian citizens do not require a tourist visa to enter Colombia. Citizens of other countries should check with the consulates of each destination for current entry requirements.

**AIR ARRANGEMENTS:** The tour begins and ends in Medellín, Colombia (José María Córdova International Airport, MDE). Direct flights are available from Miami, with connections via Panama City or Bogotá from other US cities.

**Arrival:** Medellín on **June 27, at any time.**

**Departure:** Medellín on **July 8, at any time.**

Please wait to purchase airline tickets until we notify you that the tour is confirmed to operate. At that time, we'll be glad to assist with your flight arrangements at no service fee.

**SMOKING:** Almost all of our clients prefer a smoke-free environment. If you smoke, please be sensitive to the group and refrain from smoking at meals, in vehicles, and in proximity to the group on trails and elsewhere.

**TOUR INCLUSIONS/EXCLUSIONS:** The tour fee is **\$6375 for one person in double occupancy from Medellín.**

It includes all lodging from Day 1 through Day 11, all meals from breakfast on Day 2 through breakfast on Day 12, all ground transportation, entrance fees, and the guide services of the tour leader. Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

**The above fee does not include** your airfare to and from Colombia, airport taxes, visa fees, any checked or carry-on baggage charges imposed by the airlines, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

**The single supplement for the tour is \$475;** *singles may not be available all nights.* If you do not have a roommate but wish to share, we will try to pair you with a roommate from the tour, but if none is available, you will be billed for the single supplement. Our tour fees are based on double occupancy; one-half the cost of a double room is priced into the tour fee. The single supplement is calculated by taking the actual cost of a single room and subtracting one-half the cost of a double room (plus any applicable taxes).

**TOUR REGISTRATION:** To register for this tour, please contact us at <https://fieldguides.com/contact-us/>.

Our office will be in touch with you by email by the next business day (Mon-Fri) with instructions on how to complete our electronic registration form and medical questionnaire. (We are no longer accepting the paper version.)

**Please send the deposit of \$650 per person,** see <https://fieldguides.com/payment-options/> for our Payment Options. **Full payment of the tour fee is due 180 days prior to departure, or by December 29, 2025.** We will bill you for the final payment at either 180 days or when the tour has reached sufficient subscription to operate, whichever date comes later. Since the cost of your trip insurance and airline tickets is generally non-refundable, please do not finalize these purchases until you have received final billing for the tour or have been advised that the tour is sufficiently subscribed to operate by your tour manager.

**CANCELLATION POLICY:** Refund of deposit and full payment, less \$100 handling fee, will be made if cancellation is received up to 180 days before departure. If cancellation occurs between 179 and 90 days before the departure date, 50% of the full tour fee is non-refundable, which would include the full deposit if the final payment has not yet been paid. Thereafter, all deposits and payments are not refundable and non-transferable.

Our cancellation policy only applies to payments made to Field Guides for tour (and any services included in those fees). Airline tickets not included in the tour fee and purchased separately often carry penalties for cancellation or change, or are sometimes totally non-refundable. Additionally, if you take out trip insurance the cost of that insurance is not refundable, so it is best to purchase the policy just prior to making full payment for the tour or at the time you purchase airline tickets, depending upon the airline's restrictions.

The right is reserved to cancel any tour prior to departure. In most such cases, full refund will constitute full settlement to the passenger. Note this exception, however: If you have been advised pre-tour that there is a non-refundable portion of your tour fee no matter the reason for Field Guides cancellation of the tour, that portion will not be refunded. The right is reserved to substitute in case of emergency another guide for the original one.

**TRIP CANCELLATION & MEDICAL EMERGENCY INSURANCE:** We strongly recommend purchasing trip cancellation (including medical emergency) insurance to protect your investment in case of injury or illness to you or an immediate family member before or during a trip. Because we must remit early and substantial deposits to our suppliers, we cannot offer refunds for cancellations outside of our Cancellation Policy. If a participant is unable to join or continue a tour due to illness, all related expenses will be their responsibility, and no refunds can be issued for missed days. Please wait to purchase insurance until we notify you that the tour is confirmed to operate, as most policies are non-refundable.

For full details, visit our Trip Cancellation Insurance page at <https://fieldguides.com/trip-cancellation-insurance/>.

**RESPONSIBILITY:** For and in consideration of the opportunity to participate in the tour, each tour participant and each parent or legal guardian of a tour participant who is under 18 agrees to release, indemnify, and hold harmless Field Guides Incorporated, its agents, servants, employees, shareholders, officers, directors, attorneys, and contractors as more fully set forth in the Release and Indemnity Agreement on the registration form. Field Guides Incorporated acts only as an agent for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, airplane, or other means, and assumes no liability for injury, damage, loss, accident, delay, or irregularity caused by defect in such vehicles or for any reason whatsoever, including the acts, defaults, or bankruptcies of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. You acknowledge and agree that Field Guides Incorporated is not responsible for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. The tour participant shall bear all such losses and expenses. Field Guides Incorporated reserves the right to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. Field Guides Incorporated reserves the right to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely.

Participants should be in good health and should consult a physician before undertaking a tour. If you have questions about the physical requirements of a tour, please contact our office for further information. Participants should prepare for the tour by reading the detailed itinerary, the information bulletin, and other pertinent matter provided by Field Guides. Each participant is responsible for bringing appropriate clothing and equipment as recommended in our bulletins.

THE RECEIPT OF YOUR TOUR DEPOSIT SHALL BE DEEMED TO BE CONSENT TO THE ABOVE CONDITIONS. EACH TOUR PARTICIPANT AND EACH PARENT OR LEGAL GUARDIAN OF A TOUR PARTICIPANT WHO IS UNDER 18 SHALL SIGN AND DELIVER THE RELEASE AND INDEMNITY AGREEMENT AT THE TIME OF REGISTRATION.
