

ITINERARY

**HOLIDAY COSTA RICA: RANCHO NATURALISTA**

*Tour I: December 19 - 27, 2026*

*Tour II: December 28, 2026 - January 5, 2027*

*How wonderful would it be to start your Christmas or New Year's bird list with a Crimson-collared Tanager? These brilliant birds are endemic to Central America, and are regularly seen at the feeder at Rancho Naturalista. Photograph by participant Joan Baker.*

*We include here information for those interested in the 2026 Field Guides Holiday Costa Rica: Rancho Naturalista tour:*

- a general introduction to the tour
- a description of the birding areas to be visited on the tour
- an abbreviated daily itinerary with some indication of the nature of each day's birding outings

*These additional materials will be made available to those who register for the tour:*

- an annotated list of the birds recorded on a previous year's Field Guides trip to the area, with comments by guide(s) on notable species or sightings (may be downloaded from the website)
- a detailed information bulletin with important logistical information and answers to questions regarding accommodations, air arrangements, clothing, currency, customs and immigration, documents, health precautions, and personal items
- a Field Guides checklist for preparing for and keeping track of the birds we see on the tour
- after the conclusion of the tour, a list of birds seen on the tour

**R**ancho Naturalista has long been considered one of Costa Rica's best birding lodges. With its pleasant, spring-like climate, comfortable rooms, delicious food, and superb service, the lodge makes a wonderful base from which to explore the diverse habitats of the country's bird-rich Caribbean slope. Though this is a one-site tour, Rancho's location at 3000 feet in elevation on the Caribbean slope of the Talamanca Mountains makes it relatively easy to visit a good variety of habitats—from the Caribbean lowlands at Centro Manú to the cloud forests of Tapantí and the montane oak forest on Irazu Volcano—with the added bonus of being able to return to the same comfortable rooms each night. The result will be that we'll enjoy a birdy, yet relatively relaxed, few days.

The lodge itself boasts an impressive bird list, with nearly 300 species having been recorded from its private reserve, more than 200 from the balcony alone! Some mornings will find us on the balcony at first light, coffee in hand, as we enjoy the spectacle of birds coming in for their daily banana feast. Among the visitors will be Blue-gray and Scarlet-rumped tanagers, handsome Lesson's Motmots, and gaudy Collared Aracaris, as well as comical Montezuma Oropendolas. Hummingbird feeders at eye level on the balcony attract numerous hummingbirds and allow us close views of spectacular White-necked Jacobins and Green-breasted Mangos, while a flowering hedge which lines the garden may entice in some smaller species, such as the Violet-headed Hummingbird and Green Thorntail.

*Lesson's Motmot is another regular at Rancho. Photograph by participant Susan Jarnagin.*

Days at the lodge will be spent on the private reserve, exploring a network of trails that wind through the forested hillside behind the lodge as well as the ranch's long driveway and at several nearby locales that are easily visited on a morning or afternoon. In forested areas, we'll be on the lookout for flocks of assorted, colorful tanagers, a variety of enticing (and sometimes confounding) flycatchers, and many other fascinating species. In more open areas, possibilities include handsome Red-breasted Meadowlarks, Gray-crowned and Olive-crowned yellowthroats, Slaty Spinetail, and the elegant White-tailed Kite. Nearby wetlands might turn up Green Ibis, Snail Kite, the odd Boat-billed Heron, several different kingfishers, and even the spectacular Sunbittern. And one late afternoon may find us at a quiet forest stream, watching as a parade of birds, possibly including the delightful Snowcap, come to the clear water to bathe. All in all our days at Rancho are sure to be filled with many rewarding birding experiences.

On the travel days to and from the lodge or on day trips from the lodge, we'll make visits to other top birding sites at different elevations and in different habitats. At Irazú Volcano, we'll have the opportunity to become familiar with some of the species that are endemic to the highlands of Costa Rica and Panama. Here, Collared Redstart, Flame-throated and Black-cheeked warblers, Large-footed Finch, Timberline Wren, Fiery-throated Hummingbird, and Volcano Junco will be among our targets. Small numbers of incredible Resplendent Quetzals are also found here, and with a little luck, we may track down one of these marvelous birds. The Caribbean lowlands at Centro Manú and Donde Cope hold a variety of lowland specialties that we won't see elsewhere. Slaty-tailed Trogon, White-whiskered and Pied puffbirds, Mealy and Red-lore parrots, and the rare Bare-necked Umbrellabird will be among our many targets here, and the lowlands also gives us our best chances of seeing monkeys and sloths. At Tapantí National Park, we'll access a pristine area of beautiful cloud forest, home to Black Guan, Purple-throated Mountain-gem, Prong-billed Barbet, and Spangle-cheeked Tanager, as well as many other species.

Looking to do something different for the holidays this year? What better way to spend them than with a bevy of beautiful tropical birds from a base that offers all the comforts of home, plus more? Come join us in Costa Rica this holiday season, and start your New Year's birding off with a bang!

*We want to be sure you are on the right tour! Below is a description of the physical requirements of the tour. If you are concerned about the difficulty, please contact us about this and be sure to fully explain your concerns. We want to make sure you have a wonderful time with us, so if you are uncomfortable with the requirements, just let us know and we can help you find a better-fitting tour. Field Guides will not charge you a change or cancellation fee if you opt out within 10 days of depositing.*

## Physical requirements for the tour:

- **TRAILS AND WALKING:** For much of the trip, we'll be birding along smooth paved roads or wide, rough dirt tracks. However, trails at Rancho, El Copal and Centro Manú can be steep and/or narrow, and potentially muddy (and thus slick) in places. The terrain at our lowland locations will be flat and easy-going (though possibly quite muddy). Elsewhere, we'll have to deal with some amount of elevation change. This will vary (depending on the day) from gentle climbs on several days to a fairly significant climb on a couple of (optional) trail hikes. We'll also make one or two fairly steep descents along a wide gravel road. Those who use walking sticks should be sure to bring them along. We'll typically walk between one and three miles in a day. Our pace will be leisurely enough so as to present little difficulty to anyone in reasonable health and used to some regular walking.
- **POTENTIAL CHALLENGES:** Rancho's famous balcony (from which we'll bird on several occasions) and some of the guest rooms are up a flight of stairs. Trails can be muddy and slippery with uneven footing. Many of the roads in the Caribbean foothills are narrow and winding, which may present challenges to those who get motion sick. We'll travel in a 21-seater Coaster bus, so you'll need to be able to climb into it using its steps, the lowest of which is about 15 inches off the ground.
- **PACE:** On just over half of the days of the tour, breakfast is served from 7:00 a.m. onwards; we'll offer an optional pre-breakfast outing on those days. On the days that we visit other habitats, things will be somewhat different, as we will aim for early morning departures (with breakfast at 5:00 a.m. on those days and as early as 4:15 a.m. on the day we drive back to San Jose) to ensure that we hit the best birding areas at an optimal time of day. However, we'll try to stagger these early departures so that they don't fall on consecutive days. On most days, we'll return to the lodge for lunch and a bit of a break before heading out again in the late afternoon. On the day we visit El Copal, we'll have a set-menu lunch at the reserve's small café. (There are options for those with restricted diets.) On the day we visit Tapanti and on our return to San Jose, we'll take a packed lunch with us to eat in the field. Dinner is typically served from 6:00 p.m., though we can arrange for slightly later meals if the need arises. Each evening, we'll do the day's checklist after dinner.
- **ELEVATION:** San Jose (and the Hotel Bougainvillea) sits at roughly 3800 feet, and Rancho Naturalista at about 3200 feet. We'll reach our highest altitude on Volcan Irazu. The summit is at 11,200+ feet, and we may spend 2+ hours at that elevation while we search for Timberline Wren and Volcano Junco. We'll spend several more hours lower on the volcano's flanks, at elevations ranging from 7500 – 9500 feet. At Tapanti, we'll bird at elevations between 3500 and 5000 feet.
- **WEATHER:** The climate in Costa Rica varies with the region and participants should be prepared for a range of conditions. Temperatures should be reasonably warm throughout, mainly in the 70-85F range during the day. Exceptions will be in the Caribbean lowlands (where it may be considerably hotter) and on Irazu Volcano, where it might be quite cold, especially if it is cloudy and/or rainy.
- **VEHICLE SEATING:** We'll travel in a 21-seater Coaster bus. You'll need to be able to climb in and out of the vehicle using its steps (the lowest of which is about 15 inches from the ground) and to maneuver into the rear seats of the vehicle. Your guide(s) will implement a rotation system so that everyone has a chance to be "up front". Those who experience motion sickness should bring adequate medication for the duration of the tour, as we are not able to reserve forward seats for those with medical conditions.
- **BATHROOM BREAKS:** While we'll use modern, indoor facilities where they're available, our options in some places will be limited, so participants should be prepared for the occasional latrine or bush stop.
- **OPTING OUT:** On all but our transfer days, participants can easily opt to sit out a day. On many days, it will be possible to take a half-day off.

If you are uncertain about whether this tour is a good match for your abilities, please don't hesitate to contact our office; if they cannot directly answer your queries, they'll put you in touch with a guide.

## About the Birding Areas

**Rancho Naturalista** is a private lodge nestled in the forested Caribbean foothills east of San Jose. Located at about 3200 feet in elevation, Rancho is perfectly sited to allow exploration into some of the richest birding habitats in Costa Rica. Bird activity in these humid middle elevations is characterized by movements of large feeding flocks, often comprising ten to fifteen or more species; these make for exciting (if somewhat frustrating!) birding. Around Rancho Naturalista and some nearby locations, we'll be watching for such species as Bicolored Hawk, Gray-headed Chachalaca, Brown-hooded Parrot, Crimson-fronted Parakeet, Dull-mantled and Zeledon's antbirds, White-collared, White-ruffed, and White-crowned manakins, Tawny-chested and Slaty-capped flycatchers, Stripe-breasted and Bay wrens, Chestnut-headed Oropendola,

and Black-headed Saltator. Colorful mixed flocks might include Black-and-yellow, Emerald, Silver-throated, Speckled, Crimson-collared and Tawny-crowned tanagers, Hummingbirds on the grounds of the lodge itself, often only a few feet from the observer, include such dazzling gems as Green and Stripe-throated hermits, Green-breasted Mango, Crowned Woodnymph, Green Thorntail, Black-crested Coquette, White-necked Jacobin, Violet Sabrewing, Violet-headed and Rufous-tailed hummingbirds, and Snowcap!

**Irazú Volcano National Park** is one of Costa Rica's most-visited national parks. The volcano looms over the city of San Jose, which is situated just a short distance away, and it occasionally spews ash over the surrounding countryside, as it did during its most recent period of activity in the mid 1960's. Though still classified as active, the volcano is more benign these days, and thus safe to visit. In the high-elevation forests of Irazú's slopes, we'll search for a number of species endemic to the Chiriqui highland regions of Costa Rica and Panama, as well as numerous more widespread species. Among the targets here will be Lesser Violetear, Volcano and Fiery-throated hummingbirds, Acorn Woodpecker, Ruddy Treerunner, Black-capped Flycatcher, Timberline Wren, Black-billed Nightingale-Thrush, Sooty Thrush, both species of silky-flycatcher, Yellow-winged Vireo, Flame-throated and Black-cheeked warblers, Collared Redstart, Flame-colored Tanager, Large-footed Finch, and Volcano Junco. The stunning Resplendent Quetzal, a rare resident of the oak forests here, is also a possibility.

**Tapantí National Park** is a beautiful cloud forest park tucked away in the northern reaches of the Cordillera de Talamanca. The accessible section of the park ranges from 3500 to 5000 feet in elevation and is home to a good assortment of wet middle-elevation species. Black Guan, Black and Ornate hawk-eagles, Green-fronted Lancebill, Black-bellied Hummingbird, White-bellied and Purple-throated Mountain-gems, Prong-billed and Red-headed barbets, Spotted Barbtail, Brown-billed Scythebill, Red-faced Spinetail, Scaled Antpitta, Golden-bellied and Olive-streaked flycatchers, Torrent Tyrannulet, Slaty-backed Nightingale-Thrush, Black-faced Solitaire, Golden-browed Chlorophonia, Elegant Euphonia, and Sooty-faced Finch are just some of the many species we could encounter here.

**Centro Manú** is a small private rainforest reserve in the Caribbean lowlands. Famous primarily as a fairly reliable site for Bare-necked Umbrellabird, it also has planted gardens which bring in a host of hummingbirds, and a network of trails that wind through the forest. Among the species possible here are Great Potoo, Black-crested Coquette, Violet-headed and Blue-chested hummingbirds, Russet-naped Wood-Rail, Slaty-tailed and Graceful Black-throated trogons, Yellow-throated Toucan, Rufous-winged and Pale-billed woodpeckers, Red-lored and Mealy parrots, Olive-throated Parakeet, Black-crowned Antshrike, Chestnut-backed Antbird, Red-crowned Manakin, Rufous Mourner, Black-faced Grosbeak, Shining Honeycreeper and many more. Nearby, at Donde Cope, we'll enjoy a host of feeder birds (including Orange-chinned

Parakeet, Shining and Red-legged honeycreepers, Long-billed Hermit, Band-tailed Barbthroat, Bronze-tailed Plumeleteer and Chestnut-headed Oropendola) at very close range as well as have the chance to visit some owl roosts that Cope often has staked out.

*The tiny Snowcap is a near endemic, and Rancho Naturalista is one of the best places to see it. We'll keep an eye on the flowers around the lodge for this appealing little gem. Photograph by participant Karen Hamblett.*

## Itinerary for Holiday Costa Rica: Rancho Naturalista

**Day 1, Sat, Dec. 19 or Mon, Dec 28. Arrival in San Jose.** There are many daily flights into San Jose from several US cities. For those who arrive early enough, we'll meet at 4:30 p.m. in the hotel lobby on Day 1 (weather permitting) and take a walk on the hotel grounds to get our lists started. Otherwise, we'll gather in the hotel lobby at 7:00 p.m. for dinner. If your flight is scheduled to arrive later than 7:00 p.m. that first day, please check for a message from your guide in your emails and at the front desk upon your arrival.

**Day 2, Sun, Dec. 20 or Tue, Dec 29. Irazu National Park; to Rancho.** An optional birding outing will be offered before our 7:00am breakfast, after which we'll pack up the bus and head to the slopes of Irazú Volcano. As we approach the volcano's summit, we'll enter the habitat favored by many of the endemics of the Chiriqui Highland region of western Panama and Costa Rica. These birds, which include such species as Fiery-throated Hummingbird, Northern Emerald-Toucanet, Buffy Tuftedcheek, Black-faced Solitaire, Long-tailed and Black-and-yellow silky-flycatchers, and Flame-throated Warbler, will be among our main targets today. We will also put in some effort to find the beautiful Resplendent Quetzal here. At the end of the road, near the summit of the volcano, we'll search for Volcano Hummingbird, Timberline Wren, Sooty Thrush, Large-footed Finch, and Volcano Junco, as well as have a look at the magnificent crater lake and cinder covered caldera. We'll have a restaurant lunch on the slopes of the volcano before heading to Rancho, possibly with a stop or two on the way (dependent on time). Night at Rancho Naturalista.

**Days 3-7, Mon-Fri, Dec. 21-25 or Wed- Sun, Dec 30-Jan 3. Rancho Naturalista.** For the next five days, we'll be based at Rancho Naturalista and will split our time between the lodge's private reserve and several nearby areas. Mornings will typically start on the balcony watching the procession of birds coming to the feeders: Gray-headed Chachalaca, Collared Aracari, Golden-olive Woodpecker, Scarlet-rumped and Blue-gray tanagers, Orange-billed and Black-striped sparrows, and both species of oropendolas, among others. Some of our days will be spent exploring the lodge's trail system or long driveway for species that make their home in the forests here. We will, of course, spend some time at the hummingbird feeders and vervain hedges, putting in a special effort to see the bird the lodge is most famous for—the fabulous

Snowcap—and we'll also have at least one afternoon to enjoy the wonderful hummingbird pools, where Snowcaps, Crowned Woodnymphs, Purple-crowned Fairies, and others come to bathe late each afternoon. If we haven't already seen Mottled Owls on the grounds of our San Jose hotel, we'll make an attempt to see the local Mottled Owls, which we will almost certainly hear on most nights.

*The colorful Collared Aracari is a regular at the feeders at Rancho.  
Photograph by participant Susan Jarnagin.*

In addition to our time spent on the grounds of the lodge, we'll also visit several nearby areas with slightly different habitats and mixes of bird species. We'll check the valleys of the Río Tuis and/or Platanillo in hopes of finding such species as Sunbittern, Fasciated Tiger-Heron, various kingfishers, Torrent Tyrannulet, Buff-rumped Warbler, and a variety of possible raptors. A visit to CATIE, a nearby agricultural research station, will give us the opportunity to see a colony of bizarre Boat-billed Herons in addition to a variety of other waterbirds including Northern Jacanas and Purple Gallinules. Visits to these sites will be scheduled at the discretion of your guides but are just some of the possibilities the area has to offer.

We'll make an early start on a couple of days (5:00 a.m. breakfast) before leaving Rancho to travel a bit further afield. On one day, we'll head to the mid-elevation cloudforests of Tapantí National Park (about two hours away), where we'll spend the day searching for the many specialties of this habitat: these include Black Guan, Barred Hawk, Black-bellied Hummingbird, Red-headed and Prong-billed barbets, Slate-throated Redstart, Spangle-cheeked Tanager, Sooty-faced Finch, and a variety of furnariids and flycatchers. We'll have a picnic lunch at the park and continue birding in the afternoon before making our way back to Rancho, perhaps with a stop or to in the area's coffee groves if we haven't already found a Cabanis's Ground-Sparrow.

Following another 5:00 a.m. breakfast, we'll head to the private reserve of El Copal (about an hour away), where a plethora of feeders, banks of flowering hedges, and groves of fruiting trees attract a host of species. Possible species here include Barred Hawk, Gray-headed Kite, Barred Forest-Falcon, Brown-billed Scythebill, Speckled, Crimson-collared, Emerald, and Tawny-crested tanagers, Mistletoe Tyrannulet, Tawny-capped and Olive-backed euphonias and many more. Photo opportunities here are superb. Once we've had our fill of the feeder activity (if that's even possible!), we'll leave the balconies and head down to the preserve's modest trail system, where a new group of possibilities – including Collared Trogon, Middle American Leaf-tosser, Dull-mantled and Zeledon's antbirds, Sulphur-rumped Flycatcher, White-breasted Wood-Wren, Black-and-yellow Tanager, Black-faced and Black-thighed grosbeaks, and others – await. We'll have a set-menu lunch at the site's small restaurant (which has flexibility available to cope with food allergies), then head back to Rancho by mid-afternoon. All nights at Rancho Naturalista.

*We'll visit a reserve in the lowlands known as Donde Cope. There, we'll look for a number of lowland birds, hopefully including the wonderful Crested Owl. Photograph by guide Sam Wilson.*

### **Day 8, Sat, Dec 26 or Mon, Jan 4. To San Jose via the lowlands, with visits to Centro Manú and Donde Cope.**

Today, we'll arise early (another 5:00 a.m. breakfast), pack up our bus and make the roughly two-hour bus journey to Centro Manú, a small private rainforest reserve in the Caribbean lowlands. Our primary target will be the bizarre and uncommon Bare-necked Umbrellabird, which regularly feed at understory palms here. However, we'll also have plenty of time to walk the reserve's network of trails, looking for the many species which call these lowland forests home. After thoroughly exploring the site, we'll continue on to a nearby village to visit the extraordinary private garden of artist Jose Cope. We'll have our picnic lunch in the bird observation shelter on the site, while watching a parade of birds visiting the pool and nearby feeders and flowers. Hummingbird species may include Long-billed Hermit, Bronze-tailed Plumeteer, Band-tailed Barbthroat, and the rare White-tipped Sicklebill. Banana feeders draw in Shining and Red-legged honeycreepers, Orange-chinned Parakeets and a host of tanagers and oropendolas, while Pale-vented Pigeons squabble over corn meal. After lunch, we'll venture into the nearby countryside in search of roosting owls and potoos before making the one-hour drive back to San Jose. We will have our final evening dinner at the hotel. Night near San Jose.

**Day 9, Sun, Dec 27 or Tue, Jan 5. Departure for home.** Time to bid farewell to new friends and this wonderful country as we head for home. Your guides will inform you of your transfer times at the final dinner. *Safe travels!*

## **About Your Guides**

### **Tour I**

**Jay VanderGaast's** obsession with birds was evident by age seven when he memorized the plates in Peterson's eastern field guide. He went on to earn a B.S. in biology and briefly contemplated a career in research, but two years on the buggy arctic tundra soon put an end to that plan! Instead, he began roaming the world in search of birds. His travels led him to Costa Rica, where he stumbled into a job as a birding guide at Rancho Naturalista Lodge. Jay joined Field Guides in 2000, and since then he has guided more than 100 tours on several continents. He lives near Montreal.

*"Jay VanderGaast was a delight to travel with...incredible at finding the birds and extremely helpful in getting us on the birds—which was much appreciated! ...he made the trip an exceptional experience which I will remember for the rest of my life." L.K., Costa Rica*

## Tour II

**Sam Wilson** grew up in New Jersey and had his spark moment as a young adult visiting Hawk Mountain Sanctuary. On his first visit he witnessed an epic migration of 10,000 Broad-winged Hawks as they took to the skies over the Appalachian ridges. He was hooked, and his fascination with bird migration has only grown. Sam spent four years working in Cape May, New Jersey, for New Jersey Audubon developing bird migration programs for school groups and families and leading group trips for Cape May Bird Observatory and New Jersey Young Birders Club. He enjoyed a stint in the Hawaiian Islands doing breeding bird surveys in the remote Alakai Swamp for the Kauai Forest Birds Recovery project (though his gear didn't recover!). Eventually, wanderlust led him to Alaska, where he led backcountry trips focused on birds and wildlife in Denali National Park, as well as guided trips for birding festivals along the Kenai Peninsula and Copper River. He has since led group trips as a naturalist-guide in most regions of the country with a special focus on National Parks and Wilderness areas. Sam is an eBird reviewer in Alaska and contributor to both *Cape May Magazine* and *ABA's Birding* magazine. When not experimenting with flight photography, investigating nocturnal migration, or researching biodiversity hot spots, Sam enjoys backpacking, growing super-hot peppers, discovering new music, and creating experimental dishes (usually Asian cuisine). Sam and his wife, Margeaux, have spent months traveling around the world seeking out rare birds and wildlife. They currently reside in Anchorage, Alaska.

*"Sam is an expert guide and one of the best spotters we've ever experienced. He was great to get us on hard-to-see birds. He worked well with all the participants and was knowledgeable about the birds and plants." A.D., Texas Coast Migration Spectacle*

**Both Jay and Sam will be accompanied by a local guide throughout the tour.**

Visit <https://fieldguides.com/our-staff/> for Jay and Sam's complete tour schedules; just click on their photos.

## Financial Information

**FEE: \$4175 per person from San Jose**

**SINGLE SUPPLEMENT (Optional): \$700**

**DEPOSIT: \$425**

**FINAL PAYMENT DUE: June 22, 2026 (Tour I); July 1, 2026 2025 (Tour II)**

**LIMIT: 12**

## Other Things You Need to Know

**TOUR MANAGER:** The manager for this tour is Caroline Lewis. Caroline will be happy to assist you in preparing for the tour. If you have any questions, please don't hesitate to call her!

**ACCOMMODATIONS** Accommodations on this tour are good. Rancho Naturalista has long been considered one of Costa Rica's best birding lodges. With its pleasant climate, comfortable, airy rooms, delicious food, and superb service, the lodge makes a wonderful base from which to explore the diverse habitats of the country's bird-rich Caribbean slope. Note that though all the rooms are different, each one has its own charm and advantages. In San Jose, we will be staying at a very nice, modern hotel. Please be aware that checks and traveler's checks cannot be used for purchases (including drinks) at Rancho Naturalista.

**DOCUMENTS:** Be sure to verify the latest entry requirements for each country you will visit or transit.

**Passport:** A current passport is required for international travel. It should be in good condition, (Costa Rican immigration will deny entry if the passport is damaged in any way), valid for at least 6 months beyond your return date, and have at least one blank page for each country on your itinerary.

**Visa:** Costa Rican authorities generally permit US citizens to stay up to 90 days without a visa; to stay beyond the period granted, travelers must submit an application for an extension to the Office of Temporary Permits in the Costa Rican Department of Immigration. Citizens of other countries should check with the consulates of each destination for current entry requirements.

**AIR ARRANGEMENTS:** This tour begins and ends in San Jose, Costa Rica (Juan Santamaría International Airport, SJO).

**Arrival:** San Jose, by 4:30 PM if possible, Saturday, December 19; or Monday, December 28. We will provide detailed arrival and meeting instructions at a later date.

**Departure:** San Jose, Sunday, December 27 or Tuesday, January 5, 2027.

Please wait to purchase airline tickets until we notify you that the tour is confirmed to operate. At that time, we'll be glad to assist with your flight arrangements at no service fee.

**LUGGAGE:** Please be aware that many airlines have recently modified their luggage policies and are charging additional fees for checked bags. Updates could easily occur before your departure, so you may wish to contact your airline to verify the policy. Additional charges for bags on any flights, whether these are covered by the tour fee or not, will be the client's responsibility.

**SMOKING:** Almost all of our clients prefer a smoke-free environment. If you smoke, please be sensitive to the group and refrain from smoking at meals, in vehicles, and in proximity to the group on trails and elsewhere.

**TOUR INCLUSIONS/EXCLUSIONS: The tour fee is \$4175 for one person in double occupancy from San Jose.**

It includes all lodging from Day 1 through Day 8, all meals from dinner on Day 1 through breakfast on Day 9, all ground transportation, entrance fees, and the guide services of the tour leader(s). Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

**The above fee does not include** your airfare to and from Costa Rica, airport taxes, visa fees, any checked or carry-on baggage charges imposed by the airlines, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

**The single supplement for the tour is \$700 for those requesting a single room.** If you do not have a roommate but wish to share, we will try to pair you with a roommate from the tour; but if none is available, you will be billed for the single supplement. Our tour fees are based on double occupancy; one-half the cost of a double room is priced into the tour fee. The single supplement is calculated by taking the actual cost of a single room and subtracting one-half the cost of a double room (plus any applicable taxes).

**TOUR REGISTRATION: To register for this tour, please contact us at [fieldguides.com/contact-us/](https://fieldguides.com/contact-us/).** Our office will be in touch with you by email by the next business day (Mon-Fri) with instructions on how to complete our electronic registration form and medical questionnaire. (We are no longer accepting the paper version.)

**Please send your deposit of \$425 per person;** see <https://fieldguides.com/payment-options/> for our Payment Options. **Full payment of the tour fee is due 180 days prior to departure, or by June 22, 2026 (Tour I); July 1, 2026 (Tour II).** We will bill you for the final payment at either 180 days or when the tour has reached sufficient subscription to operate, whichever date comes later. Since the cost of your trip insurance and airline tickets is generally non-refundable, please do not finalize these purchases until you have received final billing for the tour or have been advised that the tour is sufficiently subscribed to operate by your tour manager.

**CANCELLATION POLICY:** Refund of deposit and full payment, less \$100 handling fee, will be made if cancellation is received up to 180 days before departure. If cancellation occurs between 179 and 90 days before the departure date, 50% of the full tour fee is non-refundable, which would include the full deposit if the final payment has not yet been paid. Thereafter, all deposits and payments are not refundable and non-transferable.

Our cancellation policy only applies to payments made to Field Guides for tour (and any services included in those fees). Airline tickets not included in the tour fee and purchased separately often carry penalties for cancellation or change, or are sometimes totally non-refundable. Additionally, if you take out trip insurance the cost of that insurance is not refundable, so it is best to purchase the policy just prior to making full payment for the tour or at the time you purchase airline tickets, depending upon the airline's restrictions.

The right is reserved to cancel any tour prior to departure. In most such cases, full refund will constitute full settlement to the passenger. Note this exception, however: If you have been advised pre-tour that there is a non-refundable portion of your tour fee no matter the reason for Field Guides cancellation of the tour, that portion will not be refunded. The right is reserved to substitute in case of emergency another guide for the original one.

**TRIP CANCELLATION & MEDICAL EMERGENCY INSURANCE:** We strongly recommend purchasing trip cancellation (including medical emergency) insurance to protect your investment in case of injury or illness to you or an immediate family member before or during a trip. Because we must remit early and substantial deposits to our suppliers, we cannot offer refunds for cancellations outside of our Cancellation Policy. If a participant is unable to join or continue a tour due to illness, all related expenses will be their responsibility, and no refunds can be issued for missed days. Please wait to purchase insurance until we notify you that the tour is confirmed to operate, as most policies are non-refundable.

For full details, visit our Trip Cancellation Insurance page at <https://fieldguides.com/trip-cancellation-insurance/>.

**RESPONSIBILITY:** For and in consideration of the opportunity to participate in the tour, each tour participant and each parent or legal guardian of a tour participant who is under 18 agrees to release, indemnify, and hold harmless Field Guides Incorporated, its agents, servants, employees, shareholders, officers, directors, attorneys, and contractors as more fully set forth in the Release and Indemnity Agreement on the registration form. Field Guides Incorporated acts only as an agent for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, airplane, or other means, and assumes no liability for injury, damage, loss, accident, delay, or irregularity caused by defect in such vehicles or for any reason whatsoever, including the acts, defaults, or bankruptcies of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. You acknowledge and agree that Field Guides Incorporated is not responsible for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. The tour participant shall bear all such losses and expenses. Field Guides Incorporated reserves the right to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. Field Guides Incorporated reserves the right to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely.

Participants should be in good health and should consult a physician before undertaking a tour. If you have questions about the physical requirements of a tour, please contact our office for further information. Participants should prepare for the tour by reading the detailed itinerary, the information bulletin, and other pertinent matter provided by Field Guides. Each participant is responsible for bringing appropriate clothing and equipment as recommended in our bulletins.

THE RECEIPT OF YOUR TOUR DEPOSIT SHALL BE DEEMED TO BE CONSENT TO THE ABOVE CONDITIONS. EACH TOUR PARTICIPANT AND EACH PARENT OR LEGAL GUARDIAN OF A TOUR PARTICIPANT WHO IS UNDER 18 SHALL SIGN AND DELIVER THE RELEASE AND INDEMNITY AGREEMENT AT THE TIME OF REGISTRATION.
