

ITINERARY  
**OREGON: FROM THE COAST TO THE CASCADES**  
*September 4-14, 2019*

*Wandering Tattler is a west coast specialty that breeds in the far north, and migrates along the coast of Oregon. This is one of more than 20 shorebird species that we'll seek on the tour. Photograph by participant Tony Nastase.*

*We include here information for those interested in the 2019 Field Guides Oregon: From the Coast to the Cascades tour:*

- a general introduction to the tour
- a description of the birding areas to be visited on the tour
- an abbreviated daily itinerary with some indication of the nature of each day's birding outings

*Those who register for the tour will be sent this additional material:*

- an annotated list of the birds recorded on a previous year's Field Guides trip to the area, with comments by guide(s) on notable species or sightings (may be downloaded from our web site)
- a detailed information bulletin with important logistical information and answers to questions regarding accommodations, air arrangements, clothing, health precautions, and personal items
- a reference list
- a Field Guides checklist for preparing for and keeping track of the birds we see on the tour
- after the conclusion of the tour, a list of birds seen on the tour

Fall is a wonderful time to go birding in Oregon. The state is home to some of the most striking scenery of the Pacific Northwest, and it also plays host to an impressive variety of birds. With a rich mixture of nesters augmented by migrants and returning wintering species, birding in Oregon is very pleasant during this time of year. Exploring the coast, mountains, and the Great Basin plains of this large and diverse state, all at the peak of fall migration, we'll have a western birding adventure you'll be sure to remember.

We'll start by birding the rocky and picturesque coastlines for which Oregon is so famous. From the coastal town of Newport south to Coos Bay, we'll explore various beaches and lagoons as we search for 20+ species of shorebirds including Black Oystercatcher, Wandering Tattler, Black Turnstone, and Surfbird, as well as gulls, terns, cormorants, and other offshore species. We'll seawatch from the coast, where we hope to see Sooty Shearwaters and a variety of alcids as well including Pigeon Guillemot, Common Murre, Marbled Murrelet, and maybe even a Cassin's or Rhinoceros auklet.

Eventually we'll pull ourselves away, leave the ocean behind, and ascend to 7000 feet in the Cascade Mountains, where we'll explore the legendary and beautiful Crater Lake National Park before continuing on to the town of Bend. Here, several lofty dormant volcanic peaks, some more than 10,000 feet high, command the horizon. Their dense forests of pine, spruce, and fir are home to the likes of White-headed and Black-backed woodpeckers, Steller's and Canada jays, American Dipper, and other high-elevation specialties. If there are recent reports, we may venture out one night to take a stab at Great Gray Owl (rare) or maybe watch as hundreds of Vaux's Swifts spiral around their roosting chimney at dusk. As we descend the eastern slope of the Cascades, the moisture-loving Douglas Firs yield to Ponderosa Pines and other vegetation more tolerant of the drier climate typical of the vast Great Basin Desert. Since water is in short supply on this side of the mountains, the birding can be particularly good in areas where small springs and streams occur. Among the many birds that we can expect in these areas are Williamson's, Red-naped, and Red-breasted sapsuckers, White-headed Woodpecker, Rock and Canyon wrens, Mountain and Western bluebirds, and MacGillivray's, Townsend's, and Hermit warblers, plus a variety of resident birds and numbers of southbound migrant species.

We will conclude our tour with a visit to productive Malheur National Wildlife Refuge. Malheur, on the high plateau of the eastern Oregon desert, is considered by many to be one of the dozen best birding locations in the country. The refuge's 181,000 acres encompass marsh, small lakes, sagebrush flats, irrigated meadows, willow and cottonwood riparian growth, and alkali flats, and the plantings around the refuge headquarters make it perhaps one of the finest areas for concentrating migrant birds in the Northwest. While at Malheur and in the surrounding area we could see a wide variety of water- and landbirds, including Eared, Horned, Western, and Clark's grebes, American White Pelican, Trumpeter Swan, Cinnamon Teal, Swainson's and Ferruginous hawks, Prairie Falcon, Sandhill Crane, Black-necked Stilt, Wilson's Phalarope, Sage Thrasher, Yellow-headed Blackbird, and Brewer's Sparrow.

*As we traverse the state, from the western shore to the inland deserts, we'll view some spectacular scenery, such as this view of the desert from Steen's Mountain. Photograph by guide Cory Gregory.*

**About the Physical Requirements & Pace:** Oregon is a large state with varied habitats ranging from coastal wetlands, high mountain conifer forest, to interior sagebrush desert. In order to sample from the rich assortment of habitats, we'll have several long drives lasting more than a couple of hours. While on the coast, there will be a few short hikes that might involve some elevation. While on the coast, much of our birding activity will involve seawatching (watching for seabirds and marine mammals from shore) and checking a number of traditional shorebird feeding and resting sites. A spotting scope will be very useful. In the Cascades, we may reach elevation as high as 7000 feet, and on Steens Mountain, southeast of Malheur, we will be at an elevation of 9700 feet.

If you are uncertain about whether this tour is a good match for your abilities, please don't hesitate to contact our office; if they cannot directly answer your queries, they will put you in touch with one of the guides.

## About the Birding Areas

**Eugene area**—We'll start our adventure by birding at Fern Ridge Reservoir, which sits on the Long Tom River just west of the city. This well-known hotspot is an excellent location to look for a variety of ducks, raptors, and an impressive array of shorebirds. Numerous shorebird species typical of this area include Black-necked Stilt, Black-bellied Plover, Semipalmated Plover, Least, Pectoral, and Western sandpipers, dowitchers, and both yellowlegs. Less common species we might find include Marbled Godwit, Pacific Golden-Plover, Baird's Sandpiper, or Red-necked Phalarope. Keep in mind, this is one of the better locations in the Lower 48 to hope for Eurasian vagrants such as Ruff or Sharp-tailed Sandpiper, both of which are almost annual here.

**The Coast**— We'll explore the beautiful Oregon coast from the small fishing town of Newport, our home base for a couple of nights, before heading south to Bandon. Several vantage points provide good

seawatching opportunities, and jaegers and alcids are regularly seen from shore.

Near Newport and Yaquina Bay, the possibilities include Vaux's Swift, Rufous Hummingbird, Chestnut-backed Chickadee, Bewick's Wren, Wrentit (at the northern limit of its restricted range in Oregon), Black-throated Gray, Townsend's, and MacGillivray's warblers, and Western Tanager. Searching the quiet back waters and the turbulent coastline may yield looks at Common, Pacific, and Red-throated loons, three species of cormorants (including Brandt's still feeding young at the "nest"), a variety of waterfowl including Harlequin Duck, all three scoters, and possibly all three mergansers, several species of shorebirds, a variety of gulls including Heermann's, Mew, California, Western, and Glaucous-winged, and a number of alcids such as Pigeon Guillemot, Marbled Murrelet, and Cassin's and Rhinoceros auklets. Marine mammals should be evident also, with numbers of Harbor Seals lounging on their rocky refuges and big California Sea Lions floating among the fishing boats in the harbor. Gray Whales can also be seen at times breaching the surface close to shore on their long migration from the Arctic to the warmer climes of the south.

Not far south of Newport, the Oregon coast undergoes a dramatic change. The scenic, surf-pounded headlands give way to a flatter, sandy terrain that stretches before the southbound traveler nearly to the limit of vision. Near where the rocky coastline again begins to dominate is Oregon's largest estuary, Coos Bay. And not far south of here is what has to be one of the greatest shorebirding localities along the entire West Coast: the Bandon Marsh. Besides a slew of western shorebird species, this location has hosted rarities in the past such as Great Knot and Bar-tailed Godwit.

**The Cascades**— Once we leave the coast, we will pass over the coast range and head towards our night in Roseburg. The following morning we'll continue east to Oregon's only National Park, Crater Lake, one of the most scenic singular views in the Northwest. The highlight of this 180,000-acre park is the crater of Mount Mazama, the remnants of a volcano that erupted and sank into itself around 5700 BC. With time, the caldera eventually filled with rainwater and snow melt, and now this breathtakingly blue lake is nearly 2000 feet deep—the deepest lake in the US and the ninth-deepest in the world! We'll spend time taking in the views of the lake, snapping pictures of the mysterious Wizard and Phantom Ship islands, and learning more about the pinnacles and needle-like spires that rise up from the rim. The temperature will likely be cooler here given our elevation of 6000-8000 feet, but it will be a welcome change as we explore the park in hopes of finding montane species such as Clark's Nutcrackers, Canada Jays, and perhaps some migrant warblers. As the day proceeds, we will travel towards Bend via beautiful high country where we might find a family of Barrow's Goldeneyes on a quiet mountain lake, a magnificent Pileated Woodpecker hammering away on a huge, old snag, a lively American Dipper braving the current of a rushing, icy stream, or a vibrant Townsend's Warbler energetically feeding in order to build up the stores of fat needed for the journey south.

As we descend the eastern slope, the familiar Douglas Firs give way to towering Ponderosa Pines. The avifauna changes dramatically with the drop in moisture, and most of the birds so familiar to us from the previous few days will not be encountered again. Some of the birds for which we will search include Williamson's, Red-naped, and Red-breasted sapsuckers, the striking White-headed Woodpecker, Gray Flycatcher, Mountain Chickadee, Pygmy Nuthatch, Mountain

and Western bluebirds, and Rock and Canyon wrens. Bend lies at the base of the Cascades, and on a clear day (which is the norm here) eight snow-covered peaks can be seen from town. As we venture out in the morning, we may be treated to a chorus of Townsend's Solitaires, a species that descends from the mountains nearby during the fall to the lowlands around Bend. We will frequent the best birding areas along the Deschutes River, seeking a variety of fall migrants and resident birds such as Prairie Falcon, Anna's Hummingbird, Black-backed Woodpecker (at nearby burns), Western Wood-Pewee, Olive-sided, Hammond's, and Dusky flycatchers, Violet-green Swallow, Pinyon Jay, Clark's Nutcracker, a variety of migrant warblers, Western Tanager, Black-headed Grosbeak, Lazuli Bunting, Green-tailed Towhee, and Cassin's Finch.

**Malheur National Wildlife Refuge**— Malheur Refuge is considered by many to be one of the dozen best birding locations in the country. Established in the 1930s, the refuge lies on the high plateau of the eastern Oregon desert at an elevation of about 4100 feet. It is truly a birder's paradise. Its 181,000 acres encompass marsh, small lakes, irrigated meadows, and alkali flats, as well as vast sagebrush flats which are home to such specialties as Sage Thrasher, Brewer's Sparrows, and the newly split Sagebrush Sparrow. And the plantings around the headquarters and other small "oases" make Malheur perhaps the best migrant trap in the Northwest. Among expected migrant songbirds, we'll watch for prizes such as Lewis's Woodpecker, Red-breasted Sapsucker, Varied Thrush, Bay-breasted, Blackpoll, and Worm-eating warblers, and Rose-breasted Grosbeak. Some of the other species that we are almost certain to encounter during our stay here, depending on water conditions, include Eared, Horned, Western, and Clark's grebes, American White Pelican (usually hundreds), White-faced Ibis, Trumpeter Swan, Greater White-fronted Goose, Cinnamon Teal, Ferruginous Hawk, Sandhill Crane, Black-necked Stilt, Baird's Sandpiper, Wilson's Phalarope, Say's Phoebe, Marsh Wren, Orange-crowned, Townsend's, Black-throated Gray, MacGillivray's, and Wilson's warblers, Yellow-headed Blackbird, and Lark, White-crowned, and Lincoln's sparrows. It should prove to be an exciting one-and-a-half days of birding.

*One of the highlights of the tour is the diversity of woodpecker species we'll see, including western species such as this Red-breasted Sapsucker. Last year's tour also saw such western specialties as White-headed and Lewis's woodpeckers.  
Photograph by guide Cory Gregory.*

## Itinerary for Oregon: From the Coast to the Cascades

**Day 1, Wed, 4 Sep. Arrival in Eugene.** Once you arrive in Eugene, please call the hotel and take the courtesy shuttle from the airport. Please plan to arrive at the hotel by 6:00 p.m., as we will meet in the hotel lobby at 6:30 p.m. for our get-acquainted dinner. Night in Eugene.

**Day 2, Thu, 5 Sep. Fern Ridge Reservoir and the Coast Range; on to the coast.** After breakfast this morning, we'll pack our bags and make the short drive to Fern Ridge Reservoir just west of Eugene where we'll search for a variety of shorebirds including less-likely vagrants such as Ruff. Then we'll continue west and climb over the Coast Range, making

an attempt for the hard-to-see species like Mountain Quail, Sooty Grouse, and Northern Pygmy-Owl before continuing towards our lodging for the next two nights. Night in Newport.

**Day 3, Fri, 06 Sep. Newport.** Today we'll have all day to explore the many interesting areas around Newport and we can expect a fun variety of birds including various gulls, terns, and cormorants. We hope to find a variety of shorebirds including Black Oystercatcher, Black Turnstone, Wandering Tattler, as well as chances for Surfbird and Pacific Golden-Plover. We'll also spend time seawatching from shore where, depending on the winds, we might catch glimpses of Sooty Shearwater or some alcids like murres and guillemots. Night in Newport.

**Day 4, Sat, 07 Sep. Newport to Coos Bay.** Today will be spent working our way south along the gorgeous rocky beaches that Oregon is so well-known for. We'll watch for more rock-loving shorebirds and, depending on weather, we'll stop at various bluffs to seawatch. Various lagoons and coastal pools will likely have roosting flocks where we'll watch for Elegant Terns, Heermann's Gulls, and maybe even Snowy Plovers. We should arrive in Bandon in time for a little shorebirding before checking in to the hotel. Night in Bandon.

**Day 5, Sun, 08 Sep. Coos Bay to Roseburg.** We'll spend this morning birding the famous Coos Bay area for shorebirds, seabirds that might be visible from shore, and any other species we might have missed. After a lunch in Bandon, we'll bid farewell to the ocean and start our way inland. We might pause to track down a Wrentit en route. Night in Roseburg.

*The spritely Wrentit is found in chaparral habitats from coastal Oregon to upper Baja California. We'll look for these engaging little birds as we make our way to Roseburg. Photograph by participant Tony Nastase.*

**Day 6, Mon, 09 Sep. Roseburg, Crater Lake, and Bend.** An early start is likely as we make our way to the world-famous Crater Lake National Park. After a morning of birding and taking in the scenery, we'll have lunch in the park. We'll close out the day by continuing through the Coast Range to Bend, making a few stops along the way if time allows. Night in Bend.

**Day 7, Tue, 10 Sep. Bend and the eastern slope of the Cascades.** Today will be spent birding in Bend and other high-elevation areas nearby where we'll focus on a new suite of birds such as finches and a fun variety of woodpeckers including White-headed and Black-backed woodpeckers as well as Williamson's, Red-breasted, and Red-naped sapsuckers. Depending on recent sightings, we may attempt to track down an owl or two after dinner where Great Gray Owl is a very rare possibility! Night in Bend.

**Day 8, Wed, 11 Sep. Bend to Malheur NWR.** Our morning plans around Bend, which might be rather flexible, will depend on what remaining targets we have. We'll eventually load up and travel eastward down into the Great Basin Desert around Malheur NWR. We'll be birding along the way and we'll hope for Mountain Bluebirds, a variety of hawks and falcons, and even Pronghorns. Night in Burns.

**Day 9, Thu, 12 Sep. Malheur NWR.** We'll want an early start as we plan to explore the marshes, grasslands, and deserts of Malheur National Wildlife Refuge. Brace yourself for an impressive show of waterfowl including Trumpeter Swans, more than a dozen species of waterfowl, Western and Clark's grebes, and flocks of American White Pelicans. We'll scour the drier, desert regions for Sage Thrasher, Brewer's Sparrow, and Sagebrush Sparrow as well as check various islands of trees for migrant songbirds. After lunch and depending on weather, we will drive up Steens Mountain in the southeast corner of the state where we'll enjoy fantastic scenery and have a slim chance for the Black Rosy-Finch which breeds in the upper reaches of the mountain. Night in Burns.

**Day 10, Fri, 13 Sep. Malheur NWR to Eugene.** We may return to Malheur NWR one last time this morning or venture north to Malheur National Forest to look for any remaining targets that might have slipped through the cracks. After bidding farewell to the refuge, we'll load up our luggage and start making our way back towards Eugene. Although this will primarily be a travel day, we'll stop along the way for birding breaks to track down any misses and to enjoy the scenery. Night in Eugene.

**Day 11, Sat, 14 Sep. Departure for home.** You can book your flight home for any time today. Please plan to take the hotel courtesy bus to the airport. Safe travels!

## About Your Guides

**Cory Gregory** started learning birds on flashcards at the age of three, but it wasn't until the ripe age of ten that things started to get more serious. Since then he has traveled to Central and South America, Australia, and all 50 states to try to get his fill of birding (and it hasn't worked yet!).

Cory earned a B.S. in zoology in Michigan, where he also worked for Whitefish Point Bird Observatory for several seasons. He then ventured to Iowa State University, where he earned a M.S. studying Long-billed Curlews in Nebraska. As an avid shorebird ecologist, he has handled more than 2000 shorebirds of more than 30 species.

After finishing school, Cory worked for several organizations as a shorebird ecologist and guided on St. Paul Island in the Pribilofs of Alaska for the 2014 and 2015 seasons. It was on St. Paul that his dream of stumbling on a first North American record was finally fulfilled. Cory is currently based out of Missouri where, when not on tour, he pursues his interest in birds, butterflies, and dragonflies with abandon.

**Doug Gochfeld** made the jump from a love of trains, planes, and automobiles typical of many 7-year-olds to an avid interest in birds after a close encounter with a Steller's Jay in the Pacific Northwest. This filled his early formative years with scouring the urban landscape of New York City for birds with his father. After a teenage break from all things avian, he returned to it with a vengeance, and he hasn't looked back.

His first birding job was as a migration counter at the legendary Cape May Bird Observatory, where his love of and interest in the dynamics of migration (of anything with wings, insects included!) was cemented. From 2006 to 2016, he worked with birds from New Hampshire to Arizona, and from Suriname to Israel. He has also spent a substantial amount of time guiding in Alaska, the bulk of which was spent on St. Paul Island in the Pribilofs.

Doug's strongest interests in birding are migration, vagrancy, and overall patterns of distribution. Shorebirds and seabirds (and any other long-distance migrants, really) hold a special place in his heart, and he has done intensive work studying the breeding and wintering ecology of Hudsonian Godwits in Alaska and Semipalmated Sandpipers in Suriname and Brazil.

In addition to being on the New York State Avian Records Committee, Doug is passionate about spreading the gospel of birding and the outdoors, and to this end he participates in youth and urban birding initiatives and has guided at birding festivals across the country. His writing and photographs have been published in a myriad of venues.

Visit <https://fieldguides.com/guides> for complete tour schedules for Cory and Doug; just click on their photos.

*“Cory Gregory is an amazing bird-finder. He also knows A LOT about birds and shared knowledge about habitat, history, nesting, populations, and behavior.”*  
K. K., Oregon.

*“Doug's enthusiasm, skill and tenacity at finding birds is amazing. He clearly loves showing birds to people - be it a common or not so common bird.”*  
D. S.; Colorado Grouse

## Financial Information

**FEE: \$3750 from Eugene**

**DEPOSIT: \$370 per person**

**FINAL PAYMENT DUE: May 7, 2019**

**SINGLE SUPPLEMENT (Optional): \$850**

**LIMIT: 14**

## Other Things You Need to Know

**TOUR MANAGER:** The manager for this tour is Karen Turner. Karen will be happy to assist you in preparing for the tour. If you have any questions, please don't hesitate to call her!

**AIR ARRANGEMENTS:** **On Day 1, please plan to arrive in Eugene in time to meet for dinner at 6:30pm.** The Holiday Inn where you will be staying has a free airport shuttle.

Field Guides is a full service travel agency and your tour manager will be happy to assist you with flights to join this tour. Field Guides does not charge a service fee for these services to clients booking a tour. However, we understand that tech-savvy clients often prefer to shop online or that you may wish to use mileage to purchase tickets. Regardless of which method you choose, your tour manager will be happy to provide assistance regarding ticket prices and schedules, along with rental cars and extra hotel nights as needed.

Please be sure to check with your tour manager prior to purchasing your ticket to make sure the flights you have chosen will work well with the tour itinerary and that the tour is sufficiently subscribed to operate. Once purchased, most airline tickets are non-refundable and carry a penalty to change. Field Guides cannot be responsible for these fees.

**Also, it is imperative that we receive a copy of your comprehensive flight itinerary—including any and all flights not covered in the tour fee—so that we may track you in the event of missed connections, delays, or other mishaps.**

**LUGGAGE:** Please be aware that many airlines have recently modified their luggage policies and are charging additional fees for checked bags. Updates could easily occur before your departure, so you may wish to contact your airline to verify the policy. Additional charges for bags on any flights, whether these are covered by the tour fee or not, will be the client's responsibility.

**TOUR INCLUSIONS/EXCLUSIONS:** The **tour fee** is \$3750 for one person in double occupancy from Eugene. It includes all lodging from Day 1 through Day 10, all meals from dinner on Day 1 through breakfast on Day 11, all ground transportation, entrance fees, and the guide services of the tour leader(s). Tipping at group meals and for drivers, porters, and local guides is included in your tour fee and will be handled for the group by your Field Guides leader(s). However, if you would like to recognize your Field Guides leader(s) or any local guide(s) for exceptional service, it is entirely appropriate to tip. We emphasize that such tips are optional and not expected.

The above fee does not include your airfare to and from Eugene, airport taxes, any checked or carry-on baggage charges imposed by the airlines, any alcoholic beverages, optional tips to local drivers, phone calls, laundry, or other items of a personal nature.

The **single supplement** for the tour is \$850. If you do not have a roommate but wish to share, we will try to pair you with a roommate from the tour; but if none is available, you will be billed for the single supplement. Our tour fees are based on double occupancy; one-half the cost of a double room is priced into the tour fee. The single supplement is calculated by taking the actual cost of a single room and subtracting one-half the cost of a double room (plus any applicable taxes).

**TOUR LIMITS:** Our limits are firm and we don't exceed the limit by one to accommodate a couple when only one space remains open. However, on occasion, we will send along a guide in training on a tour. In these cases, one seat in the van or bus will be taken by the guide in training. Our guides will have a rotation system within the vehicle so that clients share the inconvenience equally. We hope this minor inconvenience will be more than offset by the advantages of having another guide along.

**TOUR REGISTRATION:** To register for this tour, complete the Registration/Release and Indemnity form and return it with a **deposit of \$370** per person. If registering by phone, a deposit must be received within fourteen days, or the space will

be released. **Full payment** of the tour fee is due 120 days prior to departure, or **by May 7, 2019. We will bill you for the final payment at either 120 days or when the tour has reached sufficient subscription to operate, whichever date comes later.** Since the cost of your trip insurance and airline tickets is generally non-refundable, please do not finalize these purchases until you have received final billing for the tour or have been advised that the tour is sufficiently subscribed to operate by your tour manager.

**SMOKING:** Almost all of our clients prefer a smoke-free environment. If you smoke, please be sensitive to the group and refrain from smoking at meals, in vehicles, and in proximity to the group on trails and elsewhere.

**CANCELLATION POLICY:** Refund of deposit and payment, less \$100 handling fee, will be made if cancellation is received up to 120 days before departure. If cancellation occurs between 119 and 70 days before the departure date, 50% of the tour fee is refundable. Thereafter, all deposits and payments are not refundable.

This policy only applies to payments made to Field Guides for tour fees (and any services included in those fees). Airline tickets not included in the tour fee and purchased separately often carry penalties for cancellation or change, or are sometimes totally non-refundable. Additionally, if you take out trip insurance the cost of the insurance is not refundable so it is best to purchase the policy just prior to making full payment for the tour or at the time you purchase airline tickets, depending upon the airlines restrictions.

The right is reserved to cancel any tour prior to departure, in which case full refund will constitute full settlement to the passenger. The right is reserved, in case of emergency, to substitute another guide for the original one.

**TRIP CANCELLATION & MEDICAL EMERGENCY INSURANCE:** We strongly recommend you consider purchasing trip cancellation (including medical emergency) insurance to cover your investment in case of injury or illness to you or your family prior to or during a trip. Because we must remit early (and substantial) tour deposits to our suppliers, we cannot offer any refund when cancellation occurs within 70 days of departure, and only a partial refund from 70 to 119 days prior to departure (see CANCELLATION POLICY). In addition, the Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. US medical insurance plans seldom cover health costs incurred outside the United States unless supplemental coverage is purchased. Furthermore, US Medicare and Medicaid programs do not provide payment for medical services outside the United States.

When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the United States may cost well in excess of \$50,000. Uninsured travelers who require medical care overseas often face extreme difficulties. When consulting with your insurer prior to your trip, please ascertain whether payment will be made to the overseas healthcare provider or whether you will be reimbursed later for expenses that you incur.

US citizens will receive from us a brochure regarding optional tour cancellation/emergency medical insurance. Our agent, CSA, will insure for trip cancellation and interruption, medical coverage, travel delay, baggage loss and delay, and emergency medical transportation. **Currently we are unable to offer CSA insurance policies to residents of New York and Hawaii.** We have had clients provide positive feedback after acquiring insurance with InsureMyTrip ([www.insuremytrip.com](http://www.insuremytrip.com)) in the past, and would suggest that company as an alternative. Please let us know if you have any questions about this. If you purchase the insurance within 24 hours of making final payment for the tour, and cover all non-refundable parts of the trip (including any non-refundable flights), pre-existing conditions are covered. The CSA brochure includes a contact number; you may also purchase your CSA policy on-line by visiting our website at <https://fieldguides.com/travelinsurance.html> and clicking the link to CSA. Please note, once the insurance is purchased it is non-refundable, so please check with your tour manager prior to making the purchase to assure the tour will operate as scheduled. Citizens of other countries are urged to consult their insurance broker.

**RESPONSIBILITY:** For and in consideration of the opportunity to participate in the tour, each tour participant and each parent or legal guardian of a tour participant who is under 18 agrees to release, indemnify, and hold harmless Field Guides Incorporated, its agents, servants, employees, shareholders, officers, directors, attorneys, and contractors as more fully set forth in the Release and Indemnity Agreement on the reverse side of the registration form. Field Guides Incorporated acts only as an agent for the passenger in regard to travel, whether by railroad, motorcar, motorcoach, boat, airplane, or other means, and assumes no liability for injury, damage, loss, accident, delay, or irregularity caused by defect in such vehicles or for any reason whatsoever, including the acts, defaults, or bankruptcies of any company or person engaged in conveying the passenger or in carrying out the arrangements of the tour. Field Guides Incorporated accepts no responsibility for losses or additional expenses due to delay or changes in air or other services, sickness, weather, strike, war, quarantine, or other causes. The tour participant shall bear all such losses and expenses. Field

Guides Incorporated reserves the right to substitute hotels of similar category for those indicated and to make any changes in the itinerary where deemed necessary or caused by changes in air schedules. Field Guides Incorporated reserves the right to decline to accept or to retain any person as a member of any tour. Baggage is at owner's risk entirely.

Participants should be in good health and should consult a physician before undertaking a tour. If you have questions about the physical requirements of a tour, please contact our office for further information. Participants should prepare for the tour by reading the detailed itinerary, the information bulletin, and other pertinent matter provided by Field Guides. Each participant is responsible for bringing appropriate clothing and equipment as recommended in our bulletins.

THE RECEIPT OF YOUR TOUR DEPOSIT SHALL BE DEEMED TO BE CONSENT TO THE ABOVE CONDITIONS. EACH TOUR PARTICIPANT AND EACH PARENT OR LEGAL GUARDIAN OF A TOUR PARTICIPANT WHO IS UNDER 18 SHALL SIGN AND DELIVER THE RELEASE AND INDEMNITY AGREEMENT AT THE TIME OF REGISTRATION.
