

BLUE-NECKED TANAGER (*Tangara cyanicollis*)
SAFFRON-CROWNED TANAGER (*Tangara xanthocephala*)
BLUE DACNIS (*Dacnis cayana*)
WHITE-BROWED CONEBILL (*Conirostrum ferrugineiventre*) – In mixed flocks near treeline.
CAPPED CONEBILL (*Conirostrum albifrons*) – Common in mixed flocks around Aguas Calientes.
CINEREOUS CONEBILL (*Conirostrum cinereum*)
TIT-LIKE DACNIS (*Xenodacnis parina*) – Wow! I've never seen numbers like we saw this trip at treeline! A great experience!
MOUSTACHED FLOWERPIERCER (*Diglossa mystacalis*) – A fancy-pants flowerpiercer that we enjoyed near treeline.
BLACK-THROATED FLOWERPIERCER (*Diglossa brunneiventris*) – Overlapping with the last, but also common on the drier slopes nearer to Ollantaytambo.
RUSTY FLOWERPIERCER (*Diglossa sittoides*) – Most easily seen in the garden of the Pakaritampu.
MASKED FLOWERPIERCER (*Diglossa cyanea*)
PLUSHCAP (*Catamblyrhynchus diadema*) – A great bird, and an obligate bamboo specialist! We had some good views near treeline in a mixed flock.
PLUMBEOUS SIERRA-FINCH (*Geospizopsis unicolor*)
ASH-BREASTED SIERRA-FINCH (*Geospizopsis plebejus*)
CHESTNUT-BREASTED MOUNTAIN-FINCH (*Poospiza caesar*) – A local endemic that we saw near Penas. First, a brief view at Maxima's, but a better view along the road below there. [E]
GRASSLAND YELLOW-FINCH (*Sicalis luteola*)
BAND-TAILED SEEDEATER (*Catamenia analis*)
PLAIN-COLORED SEEDEATER (*Catamenia inornata*)
DULL-COLORED GRASSQUIT (*Tiaris obscurus*)
GOLDEN-BILLED SALTATOR (*Saltator aurantiirostris*) – A fancy, cardinal-like species we saw best around Huacarpay.

MAMMALS

KALINOWSKI'S AGOUTI (*Dasyprocta kalinowskii*) – This agouti we saw while in line to take the bus back from the MP ruins, and again in the gully with the Quail-doves. It is apparently a local endemic, and is characterized by the white rump. Cool!
